

THE MACHINE

Indian politics, samjho jaise ek system hai

Gaon se Delhi tak · 21 chapters

Need → vote-bank → machine → kursi → sanstha

Aug 2026

CONTENTS

PART 0 — THE OPERATING SYSTEM

- 1 Raja kyun chahiye — why the decider job exists
- 2 Vote ki keemat — ek vote bekaar hai, vote-bank sab kuch hai

PART 1 — THE MACHINE'S SMALLEST PARTS

- 3 Sarpanch ka election — poora system, sabse chhote size mein
- 4 Corporator — wahi cell, sheher mein, zyada paise ke saath
- 5 Karyakarta — hazaaron log muft mein kaam kyun karte hain

PART 2 — THE MLA

- 6 Seat ki anatomy — MLA asal mein hai kya
- 7 Ticket — asli election, jo public kabhi nahi dekhti
- 8 Campaign ka paisa aur machine — sabse bada loop
- 9 Election day — jab machine discharge hoti hai
- 10 Paanch saal — jab koi nahi dekh raha hota
- 11 MLA ka business model — college kyun kholte hain

PART 3 — THE PARTY GAME

- 12 High command aur gut — har MLA do zindagi jeeta hai
- 13 Dal-badal — jab system ka bhaav khulke lagta hai
- 14 Ticket se bada banna — aur dynasty kyun banti hai

PART 4 — THE TOP FLOORS

- 15 MP — Delhi ka alag khel
- 16 Mantri aur CM — jeetne ka MATLAB kya hai
- 17 Paise ka rasta — Delhi se gaon tak, aur beech ke haath

PART 5 — THE FORCES

- 18 Jaat ka ganit — system ka sabse gehra variable
- 19 Lehar, media, WhatsApp — jahan naksha dhundhla hai
- 20 Careers ki maut — jo galtiyan system ke niyam dikhati hain

CLOSING

21 Das minute ka naksha — poori machine, ek page par

PART 0

The Operating System

1. Raja kyun chahiye — why the decider job exists

Gaon se shuru

Sau parivaar ek valley mein baste hain. Kheti hai, kuaan hai, mandir hai. Abhi tak koi sarkar nahi, koi neta nahi — kyunki kisi ne abhi tak yeh cheez invent hi nahi ki.

Pehle mahine sab theek chalta hai. Phir zindagi apna kaam karti hai:

- Do bhai zameen ke boundary par lad pade. Dono kehte hain "patthar wahan nahi, yahan tha."
- Upar wale khet ka aadmi poora paani apni taraf mod leta hai. Neeche ke teen khet sookh rahe hain.
- Raat mein kisi ke dhor chori hue. Sab ek doosre par shak kar rahe hain.
- Kuaan sabka hai, lekin uski safai koi nahi karta. Jo cheez sabki hai, woh kisi ki nahi hoti.

Ab dhyan se dekho: yeh char problems kheti se solve nahi hoti, taakat se solve nahi hoti, paise se bhi solve nahi hoti. Inko solve karne ke liye chahiye ek **faisla** — aur faisla tabhi chalta hai jab sab usse maanein.

Yeh hai governance. Tumhari 10 needs ki list mein jo "governance" likha hai, uska asli matlab yeh hai: **jhagde ka faisla, sabki cheezon ki dekhbhal, aur bahar ke khatre se raksha**. Roti jitni real need hai, yeh bhi utni hi real hai. Bas dikhti kam hai, kyunki jab yeh kaam ho raha hota hai, tab kuch hota hua dikhta nahi. Governance sirf tab dikhti hai jab woh fail hoti hai.

Ab village ka sawaal

Gaon ne maan liya ki ek decider chahiye. Ab do naye sawaal khade hote hain, aur poori kitab in dono ke andar hai:

Sawaal 1: Decider ko denge kya?

Farmer anaaj ugata hai, toh anaaj bechke kamata hai. Decider kya "ugata" hai? Faisle. Lekin faisla bikta nahi. Jhagde ka faisla karne ke baad decider haath mein kya lekar ghar jayega?

Gaon kehta hai: theek hai, sab thoda thoda anaaj denge, decider ka pet chal jayega. Yeh hai **salary** — aur dhyan rakhna, yeh hamesha chhoti hoti hai. Kyun? Kyunki gaon kabhi nahi chahega ki decider ki salary badi ho. "Woh toh sirf baithke faisle karta hai" — yeh feeling har gaon mein, har desh mein, har zamane mein same hai.

Sawaal 2: Decider ki baat log maanenge kyun?

Faisla tabhi faisla hai jab dono party maane — haarne wala bhi. Iske liye decider ke paas chahiye **taakat**: gaon ke jawan uske kehne par khade hon, galat karne wale ko saza de sake, sahi karne wale ko inaam.

Aur yahin par woh cheez janam leti hai jisko samjhe bina Indian politics kabhi samajh nahi aayegi:

The strange job — duniya ki sabse ajeeb naukri

Decider ki job description likho toh aisi dikhti hai:

Salary: chhoti (gaon kanjoosi karega, hamesha)
Taakat: bahut badi (faisla, saza, inaam, sab uske haath)

Yeh combination duniya ki kisi aur naukri mein nahi milta. Aur yehi combination poore system ka engine hai.

Kyunki jab **salary chhoti ho aur taakat badi ho**, toh us taakat ki apni ek keemat ban jaati hai:

- Jiska jhagda chal raha hai, woh chahega faisla uske haq mein ho. Woh decider ko khush rakhega.
- Jisko kuaan ke paas ki zameen chahiye, woh decider ke ghar anaaj bhijwayega.
- Jisko raat ki chori mein apna naam saaf karana hai, woh decider ka aadmi ban jayega.

Decider ne kisi se kuch manga nahi. **Taakat ke aas-paas log khud line laga lete hain.** Power apne aap convert hoti hai — favors mein, izzat mein, anaaj mein, aur aage jaake paise mein.

Ab wapas dekho salary wali baat. Gaon ne salary chhoti rakhi thi taaki decider par kharcha kam ho. Result kya nikla? Decider ne apni kamai ka rasta salary se hatakar taakat mein dhoondh liya. **Gaon ne kanjoosi ki, aur usi kanjoosi ne woh cheez paida ki jisko aaj hum corruption kehte hain.** Yeh koi accident nahi hai. Yeh design ka natural result hai. Isko yaad rakhna — aage har chapter mein yeh wapas aayega.

Aaj ke real numbers

Ab gaon se seedha 2026 ke India mein aao. Wahi structure, bade numbers:

MLA ki salary (state ke hisaab se):
Bihar ~Rs 45,000 / mahina (basic)
Uttar Pradesh ~Rs 65,000 / mahina
Maharashtra ~Rs 1.8 lakh basic, ~Rs 2.3-2.5 lakh sab milakar
Telangana ~Rs 2.75 lakh / mahina (sabse zyada)

MLA banne ka legal kharcha limit: Rs 28-40 lakh (ek election)
Asli kharcha jo campaigns mein hota hai: iska kai guna
(reported — exact number koi
kaagaz par nahi likhta)

Ab ek minute ruko aur khud se poocho — yeh chapter ka sabse important sawaal hai:

Ek aadmi 5 saal ki naukri ke liye, jisme total salary ~Rs 60 lakh se 1.5 crore banegi, election par crores kyun kharch karta hai?

Agar yeh naukri sirf salary hoti, toh yeh sauda duniya ka sabse ghatiya investment hai. Koi bania yeh deal kabhi nahi karega.

Lekin log jaan lagakar yeh deal karte hain. Iska matlab sirf ek hai: **jo cheez woh khareed rahe hain, woh salary nahi hai.** Woh khareed rahe hain kursi — matlab taakat — matlab woh sab kuch jo taakat ke aas-paas apne aap line lagata hai: thekede, zameen ke faisle, transfer-posting, institutions, izzat, aur agli election jeetne ki machine.

Village wale decider aur aaj ke MLA mein sirf scale ka fark hai. Structure bilkul same hai: **chhoti salary + badi taakat = kamai taakat se hogi, salary se nahi.**

Incentive equation (yeh har chapter mein hoga)

DECIDER/NETA ka hisaab:

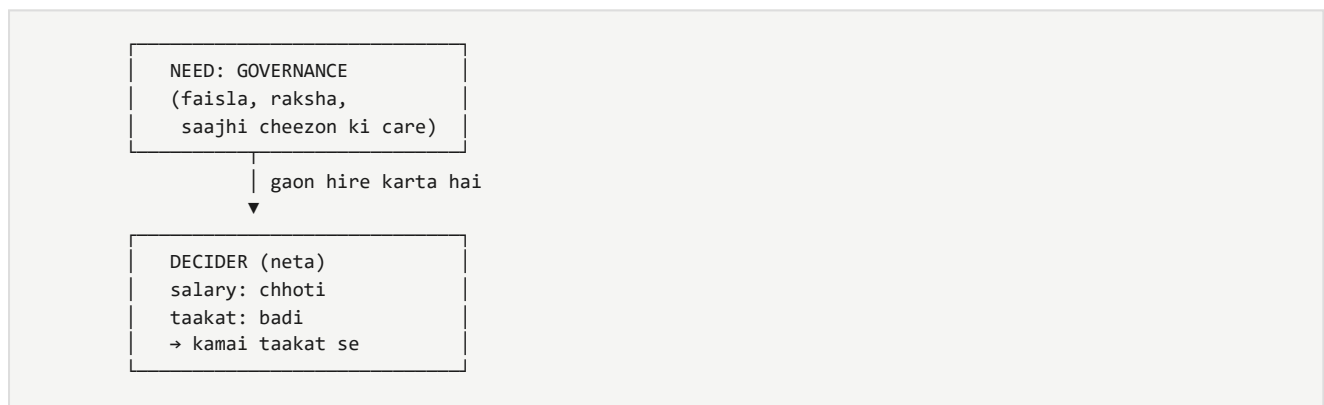

Deta hai: faisle, suraksha, kaam karwana
Paata hai: salary (chhoti) + power-conversion (asli kamai)
Darr: kursi jaana = sab conversion band
Isliye: uska har kaam ka asli maqsad ek hai — kursi bachana

GAON/VOTER ka hisaab:

Deta hai: vote, support
Paata hai: faisle apne haq mein, kaam, suraksha
Darr: galat aadmi ko taakat de di toh 5 saal bhugtna
Isliye: voter bhi apna sauda kar raha hai, bhakti nahi

Dono taraf sauda hai. Yeh samajh lo toh politics mein "achha aadmi / bura aadmi" wali kahani khatam ho jaati hai, aur uski jagah ek system dikhne lagta hai jisme har player apna rational game khel raha hai.

Master map — pehla box

Bas do box. Har chapter mein yeh naksha badhega. Chapter 21 tak poori machine is page par hogi.

Baban ki kahani — part 1

Nimgaon, ek chhota sa gaon. Baban 12 saal ka hai. Uska baap Tatya — chaar ekad ka kisaan, mandi mein jhukkar milne wala aadmi.

Us saal Baban ke chacha aur padosi Ganpat mein zameen ka jhagda hua. Boundary ka patthar raat mein hil gaya tha — kisne hilaya, yeh dono ko "pakka pata" tha, aur dono ka pakka alag tha. Do mahine dono

ghar ek doosre se nahi bole. Chacha ne darwaza band kar liya, Ganpat ne kuein ka rasta rok diya. Baban ne pehli baar dekha ki ek patthar do parivaron ko kaise kha jaata hai.

Baap log police ke paas kyun nahi gaye? Baban ne poocha tha. Tatya hansa: "Police? Police ko patthar dikhega? Police ko kaagaz chahiye, aur kaagaz dono ke paas nahi."

Phir ek shaam sarpanch aaya — safed kurta, dheemi chaal, peeche do aadmi. Aangan mein khatiya bichhi. Sarpanch aadha ghanta baitha. Pehle chacha ko poora bolne diya, beech mein ek baar bhi nahi roka. Phir Ganpat ko. Phir chai pi, aur chai ke baad ek line boli: "Patthar wahan lagega jahan tumhare baap ke waqt tha — Ganpat ke khet mein do haath andar. Aur Ganpat, kuein ka rasta kal se khula."

Dono maan gaye. Dono ko aadha-aadha mila tha, isliye dono haar ke bhi jeet gaye. Jo kaam do mahine, do parivaar, aur ek band darwaza nahi kar paya, woh aadhe ghante mein ho gaya.

Lekin Baban ne woh cheez dekhi jo baaki sab ne miss kar di. Jaate waqt Ganpat sarpanch ke paas gaya aur dheere se bola: "Bhau, mera chhota ladka... school mein naam likhwana hai, master maanta nahi." Sarpanch ne bina ruke kaha: "Somvaar ko bhej dena."

Faisla free tha. Lekin faisle ke saath ek queue shuru ho gayi thi.

Us raat Baban ne apne baap se poocha: "Sarpanch kheti kyun nahi karta?"

Tatya ne kaha: "Uska kaam faisle karna hai."

"Toh usko anaaj kaun deta hai?"

"Gaon deta hai. Panchayat se milta hai thoda."

Baban ne teesra sawaal poocha, jo asli sawaal tha: "Itna thoda milta hai toh uske ghar mein sabse pehle bijli kaise aayi? Pakka ghar kaise bana?"

Tatya chup ho gaya. Phir bola: "So ja."

Jab baap "so ja" bole, tab samajh lo sawaal sahi jagah laga hai. Baban ko poora jawab 30 saal baad milega. Humein agle 14 chapters mein milega.

Self-test (pehle apne dimaag se jawab do, phir neeche check karo)

1. Governance ek "need" kyun hai — sirf ek sarkari system kyun nahi?

Jawab: Kyunki kuch problems sirf faisle se solve hoti hain — jhagde, saajhi cheezein (kuaan), chori/suraksha. Yeh problems har basti mein khud paida hoti hain, koi impose nahi karta. Jahan 100 log saath rahenge, wahan decider ki demand apne aap banegi — isliye yeh need hai, system baad mein aata hai.

2. Decider ki salary hamesha chhoti kyun, aur us kanjoosi ka side-effect kya?

Jawab: Gaon ko lagta hai "yeh sirf baithke faisle karta hai," isliye koi community decider ko zyada dena nahi chahti. Side-effect: decider apni kamai salary ke bahar dhoondta hai — taakat ke conversion mein. Kam salary corruption ko rokta nahi, paida karta hai.

3. MLA candidate crores kharch karke ~Rs 1 crore ki naukri kyun leta hai?

Jawab: Kyunki woh naukri nahi khareed raha, kursi khareed raha hai. Kursi = faisle + saza + inaam ki taakat, aur us taakat ke aas-paas favors, theke, zameen, transfer, institutions ki queue khud lag jaati hai. Salary is deal ka sabse chhota hissa hai.

4. "Power apne aap convert hoti hai" — teen raste jo village mein dikhe?

Jawab: (1) Jiska jhagda pending hai, woh decider ko khush rakhta hai. (2) Jisko saajhi cheez (kuaan ke paas ki zameen) chahiye, woh bhent bhejta hai. (3) Jisko protection/naam saaf karana hai, woh decider ka aadmi ban jaata hai. Teenon mein decider ne kuch manga nahi — line khud lagi.

Chaaron sahi the? Chapter 2 kholo. Koi galat tha? Us section par wapas jao.

What this means for you

Jab bhi kisi neta se milo — MLA ho ya sarpanch — uski salary ko poori tarah bhool jao. Uska asli P&L yeh hai: **kursi bachane ka kharcha vs taakat se hone wali conversion**. Uske har decision ko is lens se dekho, aur uska behavior predict karna shuru ho jayega. Aur jab tum usse kuch bechne jaoge, toh yaad rakhna — jo cheez uski kursi bachaane mein madad kare, wahi cheez uske liye keemti hai. Baaki sab kharcha hai.

Numbers: MLA salaries state-wise (Bihar ~45k, UP ~65k, Maharashtra ~2.3-2.5L all-in, Telangana ~2.75L) — salaryinsight.in, collegesearch.in, tribuneindia.com, prindia.org. Election spend caps Rs 28-40 lakh — drishtiias.com. "Asli kharcha kai guna" is reported/estimate, not an official figure.

2. Vote ki keemat — ek vote bekaar hai, vote-bank sab kuch hai

Gaon se shuru

Nimgaon mein ab decider chunna hai. Gaon ne tay kiya: har aadmi-aurat ka ek vote, jiske zyada vote uski kursi.

Pehli nazar mein yeh barabari ka system lagta hai. Sau log, sau vote, sabki keemat same.

Ab ek kisaan ki nazar se dekho — naam rakho Tatya. Tatya sochta hai: "Mera ek vote hai. Sau mein se ek. Agar main vote dun ya na dun, result shayad hi badle. Toh meri keemat kya hai?"

Tatya bilkul sahi soch raha hai. **Akela vote sach mein bekaar hai.** Yeh koi cynical baat nahi, seedha ganit hai: 100 vote mein 1 vote result 1% badalta hai. 3 lakh mein 1 vote kuch nahi badalta.

Lekin ab dekho kya hota hai. Tatya ke ghar mein 8 vote hain. Uske bhai, chachere bhai, unki gharwaliyan — milakar 40 vote. Aur Tatya ke kehne par poora khaandaan ek taraf jaata hai.

Ab Tatya ki keemat kya hai? **40.** Ab decider banne ka sapna dekhne wala har aadmi Tatya ke ghar chai peene aayega.

Yeh hai is chapter ka poora sach, ek line mein: **vote ki keemat tab paida hoti hai jab vote ek saath BLOCK mein chalta hai.** Akela vote paisa nahi hai. Block ek bank account hai. Isliye naam pada — **vote-bank.**

Neta ki nazar se wahi gaon

Ab kursi ke candidate ki nazar se dekho. Uske paas time limited hai, paisa limited hai. Woh 100 logon se alag-alag nahi mil sakta.

Uske saamne gaon aise dikhta hai:

Tatya ka khaandaan	40 vote	(Tatya se baat karo)
Mandir ka pujari group	15 vote	(pujari se baat karo)
Kuaan ke paas ke ghar	20 vote	(unka mukhiya — Ganpat)
Naye base huye log	10 vote	(koi mukhiya nahi — mehnga sauda)
Idhar-udhar ke	15 vote	(kisi ki nahi sunte — chhod do)

Dekha kya hua? Candidate ne 100 logon ko 5 line mein compress kar diya. Ab usse sirf 3 aadmiyon se baat karni hai — Tatya, pujari, Ganpat — aur 75 vote ka intezaam ho jaata hai.

Yeh compression hi politics hai. **Neta log individuals ko ignore nahi karte kyunki woh bure hain. Ignore karte hain kyunki ganit yehi kehta hai.** Ek-ek vote ke liye baat karna 100 meetings hai; block ke liye baat karna 3 meetings. Jo candidate individuals se milta rahega, woh haar jayega us candidate se jo mukhiyaon se milta hai.

Aur is ganit ka ulta side bhi samajh lo: **jo aadmi apne peeche block khada kar sakta hai, uski political keemat hai. Jo nahi kar sakta, woh kitna bhi padha-likha ho, uski keemat zero hai.** Yehi wajah hai ki gaon ka anpadh Tatya MLA ke saath stage par baithta hai aur sheher ka professor ghar par TV dekhta hai.

Ab asli India ke numbers

Structure wahi, scale badha do:

Ek assembly seat (MLA):	~2-4 lakh voters (approx, state par depend)
Turnout (kitne vote dete):	~60-66% aam taur par (2024 Lok Sabha: 66%; Delhi 2025: ~61%)
Matlab ~3 lakh ki seat par asli pade vote:	~1.8-2 lakh

Aur ab woh number jo sab kuch samjha deta hai:

Jeetne wale ko kitne % vote milte hain?	
2024 Lok Sabha:	jeetne walon ka average 50.58% → 49% winners ne AADHE se KAM vote par jeeta
Delhi 2025:	winners ka average 51%

Iska matlab dhyan se samjho. India mein **First Past The Post** system hai — jiske sabse zyada vote, woh jeeta. 50% ki zaroorat nahi. Agar 4 candidate hain, toh 30-35% vote par bhi seat jeet jaati hai.

Ab poora hisaab jodo:

3,00,000 voters ki seat	
x 62% turnout	= ~1,86,000 vote padenge
x ~35-40% (jeet)	= ~65,000-75,000 vote chahiye
Matlab: 3 LAKH log jinke naam par seat hai, unme se sirf	
~70,000 ko apna banana hai. Baaki 2.3 lakh ka	
kuch bhi socho, farak nahi padta.	

Yeh number — "jeetne ke liye asli kitne chahiye" — har campaign ka starting point hai. Aage chapter 8 mein jab hum booth system kholenge, toh dekhoge ki poori machine isi 70,000 ke ird-gird bani hai: kaun se mohalle, kaun se khaandaan, kaun se block milakar 70,000 banta hai.

Teen cheezein jo is ganit se apne aap nikalti hain

1. Vote todna bhi utna hi keemti hai jitna vote jodna. Agar mere paas 70,000 nahi ban rahe, toh doosra rasta hai: saamne wale ke block ko do hisson mein todo. Uske jaati ke doosre neta ko khada karwa do, uska vote batega, mera 60,000 bhi jeet jayega. Jab bhi koi "chhota candidate" khada dikhe jo jeet nahi sakta, yeh mat poochho "yeh kyun lada?" — yeh poochho **"iske ladne se kiska ganit sudhra?"**

2. Turnout ek hathiyar hai. Mere block ke log vote dene niklein, saamne wale ke log ghar baithe rahein — result wahi hai jo vote badalne se aata. Isliye election ke din ki asli ladai persuasion nahi, **transportation** hai: gaadi, parchi, "chalo chalo" karne wale ladke. Yeh chapter 9 ka poora subject hai.

3. Numbers pehle se pata hote hain. Voter list public hoti hai. Har candidate ko mahino pehle pata hota hai kaun se booth par kitne vote hain, pichhli baar kya hua tha. Election ke din surprise kam hota hai, hisaab zyada. Jo cheez TV par "lehar" dikhti hai, woh zameen par spreadsheet hai.

Contested corner (yahan map fuzzy hai)

Ek sawaal jispe khud experts ek raay nahi rakhte: **kya paisa dekar vote sach mein khareed sakte ho?**

- **Camp A kehta hai:** haan — sharaab, cash, saree bat-ti hai, aur close seats mein yehi farak banati hai.
- **Camp B kehta hai:** nahi — log paisa sabse le lete hain aur vote apne block ke hisaab se hi dete hain. Paisa vote nahi khareedta, sirf "race mein serious hoon" ka signal deta hai.

Zameen ka sach shayad beech mein hai, aur seat-by-seat alag hai. Is kitab mein jab bhi aisi jagah aayegi jahan ek settled answer nahi hai, main tumhe dono camp dikhaunga. Clarity ka matlab yeh bhi hai ki pata ho **kahan par certainty fake hoti hai.**

Incentive equation

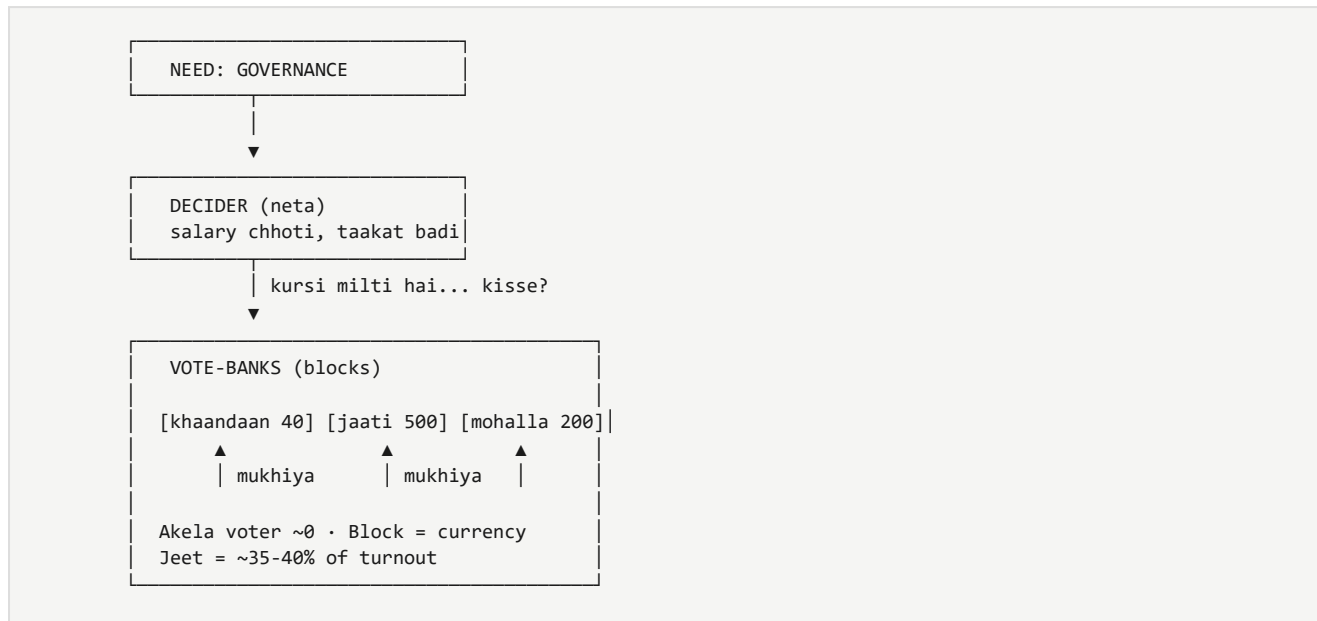

```
NETA ka hisaab:
70,000 ka target → blocks se banta hai → mukhiyaon se banta hai
Isliye: neta ka asli customer VOTER nahi, MUKHIYA hai
Voter ke liye kaam = retail (mehnga, dheema)
Mukhiya ke liye kaam = wholesale (sasta, tez)

MUKHIYA (Tatya) ka hisaab:
Deta hai: apna block (40-500 vote)
Paata hai: neta ka direct access, apne logon ke kaam,
           gaon mein izzat, "MLA mera aadmi hai" ki taakat
Darr: block toot gaya toh keemat zero
Isliye: mukhiya apna block jodkar rakhne mein hi zinda hai

VOTER ka hisaab:
Akele vote ki keemat ~zero, yeh usse pata hai
Block ke saath rehne par: kaam hote hain, suraksha milti hai
Isliye: block ke saath vote dena voter ke liye RATIONAL hai,
       bhed-chaal nahi
```

Yeh aakhri line dobara padho. Bahar se dekhne par "yeh log jhund mein vote kyun dete hain, apna dimaag kyun nahi lagate" wali feeling aati hai. Andar se dekho toh block ke saath rehna hi voter ka sabse samajhdar sauda hai — akela voter kuch nahi manwa sakta, block sab kuch manwa leta hai.

Master map — doosra box juda

Teen box. Machine dikhna shuru ho gayi: need se kursi banti hai, kursi vote se, vote blocks se, blocks mukhiyaon se.

Baban ki kahani — part 2

Baban ab 15 saal ka hai. Sarpanch ka election aaya — 20 saal mein pehli baar purane sarpanch ko koi serious challenger mila hai: Bhaskar, jo sheher mein thekedaari karke wapass aaya hai, jeep ke saath.

Ek shaam purana sarpanch khud Baban ke ghar aaya. Baithak mein baitha, Tatya se kheti ki baat ki — paani ki, mandi ke bhaav ki, sab ki. Vote ka naam tak nahi liya. Chai pi, aur jaate waqt darwaze par ruk kar sirf itna bola: "Tatya bhau, ghar ke sab vote yaad rakhna."

Baban ne pehli baar dekha ki uska baap — jo mandi mein sabse jhukkar milta hai — apne ghar ki baithak mein sarpanch se **barabar ki kursi par** baitha tha. Aur sarpanch chai peene *aaya* tha, bulaya nahi gaya tha.

Do din baad Bhaskar ki jeep bhi aayi. Bhaskar seedha bola: "Kaka, chaalis vote tumhare haath mein hain. Main sarpanch bana toh tumhara chhota ladka panchayat office mein kaam karega."

Ab Tatya ke paas do offer the. Aur yahan Baban ne apni zindagi ki pehli political galti hote dekhi — apne hi baap se.

Tatya ne dono ko haan bol di. Sochta tha dono taraf se fayda lega. Baban ne dheere se kaha bhi: "Baba, dono ko haan bologe toh dono ko pata chal jayega." Tatya ne daant diya: "Tu abhi bachcha hai."

Result aaya. Purana sarpanch teen vote se jeeta. Aur agle hafte se dono taraf ke aadmi Tatya ko mandi mein dekh kar muskurana band ho gaye. Dono ko pata chal chuka tha ki Tatya ne dono ko haan boli thi — gaon mein baat chhupti nahi. Tatya ka block abhi bhi 40 vote ka tha, lekin uski **keemat gir gayi thi**,

kyunki keemat vote mein nahi, BHAROSE mein hoti hai. Jo mukhiya apna word nahi rakhta, uska block agli baar ginti mein nahi aata.

Raat ko Baban ne apni copy ke aakhri page par gaon ka hisaab likha: 600 vote. Jeet ~250 par. Khaandaan ke 40, mama-side ke 30, kuaan wale mohalle ke 25... aur har block ke aage ek naya column banaya jo uske baap ne kabhi nahi banaya tha: **"word ka pakka?"**

Woh 15 saal ka tha, aur usne is chapter ka sabak apne ghar ki izzat girte hue seekha tha: block currency hai, lekin us currency ki backing bharosa hai. Jis din bharosa gaya, us din 40 vote sirf 40 log reh jaate hain.

Self-test (pehle apne dimaag se, phir check)

1. Akela vote bekaar, lekin block ke saath jaana rational — dono ek saath sach kaise?

Jawab: Akela vote result nahi badal sakta (1 in 3 lakh), yeh ganit hai. Lekin block ke member ke roop mein voter ko kaam, suraksha aur access milta hai — block ki taakat ka hissa milta hai. Matlab vote ki keemat individual level par zero hai aur block level par poori — voter block join karke apne zero ko non-zero bana leta hai.

2. 3 lakh ki seat par asli kitne vote chahiye?

Jawab: $3,00,000 \times \sim 62\% \text{ turnout} = \sim 1,86,000 \text{ pade vote}$. FPTP mein 4-5 candidates ke beech ~35-40% par jeet = **~65,000-75,000 vote**. Seat 3 lakh ki dikhti hai, ladai ~70 hazaar ki hoti hai.

3. Na-jeetne wala candidate kyun ladta hai?

Jawab: Kyunki uske ladne se kisi aur ka ganit sudhrta hai — woh kisi block ko todta hai (vote-katwa). Ya khud ko agli baar ke liye register kar raha hai: "mere paas 15,000 vote hain" dikha kar woh agli deal mein seat ya post maang sakta hai. Haarna bhi ek business model hai.

4. Neta ka asli customer kaun?

Jawab: Mukhiya/block-leader, voter nahi. Ek voter = 1 vote (retail). Ek mukhiya = 40-500 vote (wholesale). Limited time aur paise mein wholesale hi rational hai. Isliye neta ka network voters ka nahi, mukhiyaon ka hota hai.

5. "Vote kharide ja sakte hain?" — dono camps.

Jawab: Camp A: haan — cash/sharaab/saree close seats mein margin bana deti hai. Camp B: nahi — log sabse le lete hain, vote apne block ke hisaab se dete hain; paisa sirf "main serious candidate hoon" ka signal hai. Settled answer nahi hai — seat-by-seat alag, aur yehi is sawaal ka sahi jawab hai.

What this means for you

Jab bhi koi seat ya koi neta samajhna ho, sabse pehle yeh mat poochho "log kise pasand karte hain." Yeh poochho: **"is seat ka 70,000 kaise banta hai — kaun se blocks, kaun se mukhiya?"** Popularity TV ka subject hai. Blocks zameen ka subject hai. Aur jo aadmi tumhare saamne baitha hai (MLA ho ya uska PA), uski har raat ki tension yehi spreadsheet hai — kaun sa block pakka hai, kaun sa hil raha hai. Uski duniya mein sabse keemti cheez woh hai jo usse yeh spreadsheet zyada saaf dikha de.

Numbers: 2024 Lok Sabha winners' average vote share 50.58%, 49% of winners below 50% — [deccanherald.com/ADR](https://www.deccanherald.com/ADR); Delhi 2025 winners avg 51%, turnout ~61% — [ADR Delhi 2025, deccanherald.com](https://www.deccanherald.com); 2024 national turnout 66% — same ADR coverage. Assembly seat size ~2-4 lakh voters is approximate and varies by state. Nimgaon, Tatya, Baban are fictional.

PART 1

The Machine's Smallest Parts

3. Sarpanch ka election — poora system, sabse chhote size mein

Gaon se shuru

Scientist ko cell samajhna ho toh woh poora sharir nahi kholta. Ek cell microscope ke neeche rakhta hai, kyunki cell mein wahi sab kuch hai jo sharir mein hai — bas itna chhota ki ek nazar mein dikh jaye.

Indian politics ka cell hai **sarpanch ka election**. 600-1000 voters. Har cheez jo aage Delhi tak milegi — block ka ganit, paisa, jaati, todne ki chaal, sarkari fund ka khel — sab yahan maujood hai, aur itne chhote size mein ki tum poora game ek saath dekh sakte ho.

Isliye yeh chapter dhyan se padho. Aage ke 18 chapters isi ka bada version hain.

Pehla sawaal: is kursi mein hai kya?

Sarpanch ka honorarium mazaak jaisa hota hai — kai states mein kuch hazaar rupaye mahina. Lekin sarpanch ke elections mein log lakhs kharch karte hain, aur kuch jagah (jahan zameen mehngi hai) crores tak ki khabrein aati hain. (*Reported — aise numbers kaagaz par nahi hote.*)

Toh chapter 1 wala sawaal wapas: **yeh log kya khareed rahe hain?**

Kursi ke andar jo hai, uski list banao:

SARPANCH KE HAATH MEIN KYA HAI:

1. PAISA (upar se aata hua)
Central/state government ab gaon ke development ka paisa SEEDHA gram panchayat ke account mein bhejti hai — sadak, naali, paani, shauchalay, sab ke fund. Kaam kaun karega, kis thekedar se, kis quality ka — panchayat decide karti hai. Matlab sarpanch decide karta hai.
2. LISTS (sabse underrated taakat)
Garib kalyan ki har scheme ko ek LIST chahiye — kis parivar ko ghar milega, kise pension, kise ration ka labh. Yeh beneficiary lists banane mein panchayat ka haath hota hai. Jo list banata hai, woh decide karta hai kiska number pehle aayega.
3. KAAGAZ
Rehne ka dakhla, character ka dakhla, chhoti NOCs — gaon ki zindagi ke choti-choti kaagazi zarooratein panchayat se hokar jaati hain.
4. IZZAT + LADDER
Sarpanch gaon ka chehra hai. Tehsil aur zila ke neta usse baat karte hain. Yeh political career ki seedhi ka pehla danda hai — yahan se panchayat samiti, zila parishad, aur phir MLA ticket ka raasta dikhta hai.

Ab equation clear hai: honorarium chhota, control bada. **Chapter 1 ka formula, sabse chhote scale par: kamai kursi ki taakat se hogi, salary se nahi.**

Campaign kaise ladta hai — 600 voters ka game

Yahan TV nahi hai, akhbaar nahi hai, speech ka stage nahi hai. Sab kuch chapter 2 ka ganit hai, seedha aur nanga:

Step 1: Hisaab. Har serious candidate ke dimaag mein (ya kisi Baban ki copy mein) gaon ka poora map hota hai: kaun sa khaandaan kitne vote, kaun sa mohalla kiske saath, pichhli baar kya hua tha. 600 vote = 12-15 blocks. Bas.

Step 2: Mukhiya deals. Har block ke mukhiya se alag baat. Kisi ko naali ka waada, kisi ko bete ke kaam ka, kisi ko sirf izzat — "tumhare aangan se hi parcha bharunga." Deal block se hoti hai, voter se nahi.

Step 3: Bhandara. Khaana politics ka sabse purana instrument hai. Community bhoj ka matlab sirf pet bharna nahi — yeh public commitment hai. Jo tumhara khaana kha gaya, woh gaon ke saamne tumhare aangan mein baitha. Ab uska palatna mehnga ho gaya.

Step 4: Aakhri raat. Jahan paisa ya sharaab chalti hai (aur bahut jagah chalti hai — reported), woh aakhri 48 ghante mein chalti hai, mukhiyaon ke through, list ke hisaab se. Chapter 2 ka contested corner yaad rakhna: yeh paisa vote pakka karta hai ya sirf "serious candidate" ka signal deta hai — iska settled jawab kisi ke paas nahi. Lekin itna settled hai ki jo candidate yeh nahi karta, usko log serious nahi maante.

Step 5: Todna. Agar saamne wale ka ganit tumse behtar hai, toh uska block todo. Uski jaati ka, uske mohalle ka ek aur candidate khada karwa do. Yeh vote-katwa chapter 2 mein mila tha — sarpanch election mein yeh sabse aam chaal hai.

Reservation — ek rule jo poora game palat deta hai

Ek cheez sarpanch level par hai jo upar ke chapters mein alag roop mein milegi: **seat reservation ka rotation.** Sarpanch ki seat rotation se mahilaon ya SC/ST ke liye reserved hoti rehti hai.

Ab dekho system ka asli behavior. Jis saal seat mahila ke liye reserve hui, gaon ke purane players kya karte hain? Apni gharwali, bahu, ya behen ko khada kar dete hain. Gaon janta hai asli sarpanch kaun hoga. Iske liye ek khula naam bhi hai — "**sarpanch pati**" (sarpanch ka pati / asli operator).

Isko cynically mat padho, architecture ki tarah padho: **rule ne kursi ka NAAM badla, toh system ne kursi ke PEECHE ka aadmi same rakh liya.** Rule sudharne walon ne form badla; incentive same tha, toh function same raha. Yeh pattern yaad rakhna — aage har level par milega: jab bhi koi naya rule aata hai, system usko todta nahi, uske ird-gird naya rasta bana leta hai.

(Doosra side bhi sach hai, aur contested hai: kai jagah reserved seat se aayi mahila sarpanch ne dheere-dheere asli control le liya. Rule kabhi-kabhi function bhi badal deta hai — bas hamesha nahi,

aur dheere.)

Incentive equation

CANDIDATE ka hisaab:

Lagata hai: lakhs (bhandara, aakhri raat, mukhiya deals)
Paata hai: funds ka control + lists ka control + kaagaz
+ izzat + ladder ka pehla danda
Darr: haar gaya toh paisa gaya AUR izzat bhi –
gaon mein haar chhupti nahi
Isliye: sarpanch election mein dushmani asli hoti hai;
yeh career ka sabse personal election hai

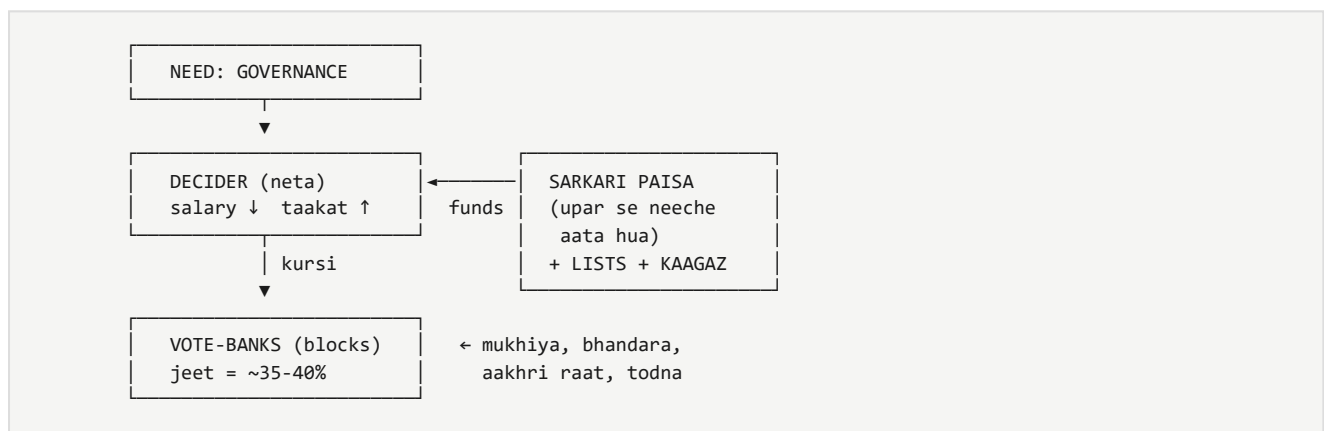

MUKHIYA ka hisaab:

Yeh uska quarterly results season hai. 5 saal mein ek baar uske block ki keemat khulke lagti hai. Dono taraf se offer aayenge. (Aur Tatya wali galti yaad hai? Dono ko haan nahi bolna hota.)

GAON ka hisaab:

Gaon jaanta hai ki jeetne wala paisa nikalega (thekon se, lists se). Phir bhi vote deta hai. Kyun? Kyunki sawaal "imaandaar vs be-imaan" ka hai hi nahi. Sawaal hai: "MERE block ka kaam kaun karega?" Apna be-imaan paraye imaandaar se behtar hai – yeh voter ka rational sauda hai.

Master map — teesra box

Naya box: **sarkari paisa upar se aata hai**. Yeh chhota lag raha hai abhi — chapter 17 mein yeh box poori nadi ban jayega.

Baban ki kahani — part 3

Baban ab 19 ka hai. Sarpanch ka agla election aa gaya, aur is baar Bhaskar thekedaar phir khada hai — lekin is baar Bhaskar ne ladke ko bulaya jiske baare mein sab kehte the: "Tatya ka beta, hisaab ka pakka."

Bhaskar ne kaha: "Pichhli baar teen vote se haara. Is baar tu mera hisaab rakh."

Baban ne teen mahine kaam kiya, aur teen cheezein ki.

Pehli: copy ka vote-map update kiya. 600 nahi, ab 640 vote the. Har block ke aage teen columns: kitne vote, mukhiya kaun, word ka pakka? Usne apne baap wali galti ulti karke istemaal ki — jin mukhiyaon ka record "dono taraf haan bolne ka" tha, unke blocks ko usne ginti se hi nikal diya. Unpe kharcha zero. "Jo bikta hai roz, woh khareedna bekaar."

Doosri: usne dekha ki purane sarpanch ka sabse bada block — 90 vote ka — do khaandaanon ka joint block hai, aur dono khaandaanon mein bahu ke lene-dene par andar hi andar khatas hai. Baban ne Bhaskar se kaha: "In dono ko todna paisa se nahi hoga. Chhote khaandaan ke ladke ko panchayat member ka ticket do — apne panel se khada karo." Woh ladka mana. 90 ka block toot ke 55-35 ho gaya, aur 35 Bhaskar ke panel mein aa gaye.

Teesri: aakhri hafte mein Bhaskar bola: "Ab bhandara bada karte hain, poore gaon ka." Baban ne roka: "Poora gaon nahi. Sirf woh 5 blocks jahan hum 250 tak pahunchte hain. Baaki blocks ka khaana kharcha hai, vote nahi." Bhaskar ne pehli baar kisi 19 saal ke ladke ki baat par 30,000 ka plan kaata.

Result: Bhaskar 31 vote se jeeta.

Us shaam Bhaskar ke aangan mein dhol baja. Baban peeche khada tha, copy haath mein. Panchayat ke naye members mithai baant rahe the, aur ek purana aadmi Baban ke paas aakar dheere se bola: "Ladke, tune kitna liya is kaam ka?"

Baban ne sach bola: "Kuch nahi."

Aadmi hansa: "Toh tu sabse mehnga aadmi hai is gaon ka. Jiska bhaav abhi laga nahi, uska bhaav sabse zyada hota hai."

Baban ko baat us waqt samajh nahi aayi. Chapter 5 mein aayegi — usko bhi, tumko bhi.

Self-test (pehle dimaag, phir check)

1. Sarpanch ka honorarium hazaaron mein hai, election ka kharcha lakhs mein. Kursi ke andar woh 4 cheezein kya hain jo is gap ko explain karti hain?

Jawab: (1) Sarkari funds ka control (kaam, thekedar, quality decide karna), (2) beneficiary lists ka control (kiska number pehle), (3) kaagaz/dakhle/NOCs, (4) izzat + political ladder ka pehla danda. Yeh sab milakar kursi ki asli keemat hai.

2. Bhandara sirf khaana kyun nahi hai?

Jawab: Woh public commitment hai. Gaon ke saamne tumhare aangan mein baithkar khaana = sabke saamne tumhare side dikhna. Iske baad palatna socially mehnga ho jaata hai. Politics mein khaana contract-signing ceremony hai.

3. "Sarpanch pati" phenomenon architecture ke baare mein kya sikhata hai?

Jawab: Rule ne kursi ka naam badla (mahila reserved), lekin incentive same raha, toh system ne form ke peeche function same rakh liya — asli operator wahi purana aadmi. General sabak: naya rule system ko todta nahi, system uske ird-gird rasta bana leta hai. (Contested side: kabhi-kabhi, dheere-dheere, rule function bhi badal deta hai.)

4. Voter jaanta hai ki jeetne wala paisa nikalega. Phir bhi vote deta hai — rational kaise?

Jawab: Voter ka sawaal "imaandaar vs be-imaan" nahi hai, "mere block ka kaam kaun karega" hai. Jo candidate uske block ka kaam karega, woh thoda kha bhi lega toh voter ka net sauda positive hai. Apna be-imaan > paraya imaandaar.

5. Baban ne Bhaskar ka poore-gaon-ka-bhandara kyun kaata?

Jawab: Chapter 2 ka ganit: jeet 250 par hai, 640 par nahi. Jo blocks ginti mein nahi aate (pakke virodhi ya bikau), unpe kharcha vote nahi banata. Campaign ka paisa target blocks par lagta hai, poore gaon par nahi. Precision > volume.

What this means for you

Jab bhi koi bada political phenomenon samajhna ho — MLA ki chaal, party ka faisla, defection — usko sarpanch size par chhota karke socho: "600 voters ke gaon mein yeh cheez kaisi dikhti?" 90% baar wahi structure niklega: blocks, mukhiya, funds, todna. Aur jab kisi neta se milo, yaad rakhna ki woh is cell-level game ko jeet kar aaya hai — usse blocks aur hisaab ki bhasha mein baat karoge toh woh tumhe apna aadmi samjhega, upar-upar ki "development" bhasha mein karoge toh bahar ka.

Numbers note: sarpanch honorarium (kuch hazaar/mahina, state-wise alag) aur "lakhs/crores ka kharcha" reported hai — is level par audited data nahi hota. Central funds ka gram panchayat ke account mein seedha aana (Finance Commission grants) verified structure hai. Nimgaon/Baban/Bhaskar fictional.

4. Corporator — wahi cell, sheher mein, zyada paise ke saath

Gaon se sheher

Ab Nimgaon chhodo. Sheher chalo.

Sheher mein bhi wahi need hai jo gaon mein thi — jhagde, saajhi cheezein, suraksha. Lekin teen cheezein badal jaati hain, aur teenon system ka behavior badal deti hain:

	GAON	SHEHER (ward)
Voters	600-1,000	15,000-60,000
Log ek doosre ko	sab sabko jaante	koi kisi ko nahi jaanta
Sabse badi cheez	zameen (kheti)	zameen (construction)
Paisa	thoda, sarkari	bahut, sarkari + private

Teesri line sabse important hai. Gaon mein zameen se anaaj nikalta hai. Sheher mein zameen se **building** nikalti hai, aur building se paisa nikalta hai — gaon ke kisi bhi hisaab se hazaar guna zyada.

Isliye sheher ka corporator gaon ke sarpanch ka bada bhai nahi hai. Woh **ek alag jaanwar** hai, jo ek alag cheez ke ird-gird bana hai: **construction**.

Ward mein kya hota hai

Corporator ek ward se jeetta hai — sheher ka ek tukda. Municipal corporation (mahanagar palika) mein woh ek member hota hai, sau-do sau members mein se ek.

Uske haath mein kya hai:

1. WARD KA KAAM
Sadak, naali, paani ki line, street light, kachra, garden. Chhota kaam, lekin ROZ ka kaam — aur har kaam ka ek thekedar hota hai.
2. PERMISSIONS KA RASTA
Building plan pass hona, water connection, drainage connection, trade licence, shop ka NOC. Corporator khud sign nahi karta — officer karta hai — lekin corporator ke bina file "chalti" nahi. Iska matlab samajhna is chapter ka asli kaam hai (neeche).
3. ATIKRAMAN (encroachment) KA SWITCH
Footpath par thela, awaidh floor, awaidh shed — yeh sab technically illegal hai. Toh chalta kyun hai? Kyunki hatana bhi ek DECISION hai. Jiske haath mein "hatao ya rehne do" ka switch hai, uske paas roz ki taakat hai — poore sheher ke chhote dhandhon par.
4. SLUM KA VOTE-BANK
Sheher ka sabse solid block. Wahan har cheez — paani, bijli ka connection, ration card, ghar ka proof — kisi na kisi permission par tiki hai. Aur permission ka rasta corporator se hokar jaata hai.

Sheher ka block gaon se alag kyun hota hai

Gaon mein block khaandaan ka tha — khoon ka rishta. Sheher mein khoon nahi chalta, kyunki padosi ka naam bhi nahi pata.

Toh sheher mein block kis cheez se banta hai? **Zaroorat se.**

GAON KA BLOCK	SHEHER KA BLOCK
khaandaan (40 vote)	slum/basti (2,000 vote)
jaati (500 vote)	society/apartment (300 vote)
mohalla (200 vote)	bhasha/region ke log (5,000 vote)
	hawker/vyapari association (800 vote)

Dhyan do: sheher ke blocks **institutions** hain, parivaar nahi. Basti ka ek leader, society ka secretary, hawker union ka pramukh, mandir/masjid committee — yeh sheher ke mukhiya hain.

Aur inme sabse solid kaun hai? **Basti.** Kyunki wahan zaroorat sabse gehri hai. Apartment wale ko corporator ki zaroorat saal mein shayad ek baar padti hai. Basti wale ko har mahine padti hai — paani, kaagaz, hatane ki dhamki, bachche ka school. Jahan zaroorat roz ki hai, wahan block sabse pakka hai.

Yeh ek line yaad rakhna, kyunki yeh poori kitab mein sach rahegi:

Vote-bank wahan sabse majboot hota hai jahan zaroorat sabse gehri hai — jahan log sabse zyada padhe-likhe ya sabse zyada paisewale hain wahan nahi.

Isliye sheher ka corporator apna zyada waqt basti mein deta hai, un colonies mein nahi jahan bade log rehte hain. Bade log shikayat karte hain ki "hamare yahan koi neta aata hi nahi." Woh sahi keh rahe hain — aur wajah simple hai: unka block loose hai, unki turnout kam hai, aur unko corporator ki roz zaroorat nahi. Woh ganit mein bhaari nahi padte.

Builder ka rishta — sheher ka asli engine

Ab is chapter ka core. Dhyan se, kyunki yeh mechanism aage har level par milega, bas naam badal ke.

Ek builder ko project banane ke liye kya chahiye? Zameen, paisa, aur **kaagaz ka pahaad** — plan approval, height clearance, water/drainage connection, occupancy certificate, aur beech mein aane wale local virodh ka settlement.

Kaagaz technically **officer** deta hai — corporator nahi. Toh builder corporator ke paas kyun jaata hai?

Teen wajah:

1. Speed. Har file mein delay ka option hota hai. "Objection" lagana, "clarification" maangna, file ko table par rakh dena — yeh sab legal hai. Ek project mein 6 mahine ka delay builder ke liye interest aur cost ka pahaad hai. **Corporator file ko haan nahi karwata, woh file ko RUKNE se bachata hai.** Yeh farak samajhna zaroori hai — taakat mostly "haan" karwane mein nahi hoti, "na" ko rokne mein hoti hai.

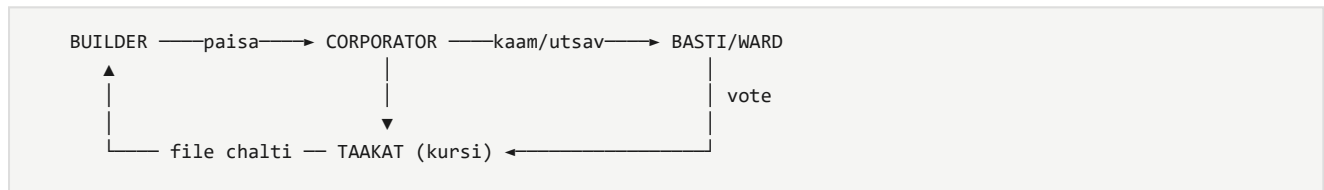

2. Zameeni virodh. Project ke saamne wale log dhool, rasta band, paani ki shikayat leke khade ho jaate hain. Corporator un logon ka hi leader hai. Woh chahe toh virodh khada karwa sakta hai, chahe toh baitha sakta hai.

3. Corporation ke andar ki awaaz. Standing committee, general body — jahan tenders aur proposals pass hote hain, wahan corporator baitha hai.

Iske badle builder kya deta hai? Yahan honest raho:

KHULA (declared, legal):
- Ward ke kaam ke liye "CSR" type contribution
- Ganesh utsav / navratri / cricket tournament ka sponsorship
- Society ke liye garden, gym, ambulance donate karna
CHHUPA (undeclared – reported, kaagaz par nahi):
- Cash percentage, project size par
- Flats: project mein ek-do flat "book" ho jaate hain naam par ya kisi rishtedaar ke naam par, kaagaz par kam daam mein
- Partnership: corporator ya uska rishtedaar seedha project mein hissedaar
- Election ka poora kharcha builder uthata hai

Ab poora circle dekho, kyunki yehi is chapter ka architecture hai:

Yeh loop khud ko chalata hai. Builder ka paisa corporator ke ward ke kaam aur utsav mein lagta hai. Us kaam se vote aate hain. Vote se kursi rehti hai. Kursi se builder ki file chalti hai. Aur phir se.

Is loop mein koi villain nahi hai — sirf players hain jinke incentives fit ho jaate hain.

Builder ko speed chahiye, basti ko kaam chahiye, corporator ko vote chahiye. Teenon ko jo chahiye woh mil raha hai. Jo nahi mil raha, woh sheher ki planning hai — kyunki us loop mein "acchi planning" ki koi party hai hi nahi.

Yehi wajah hai ki sheher badhte hain lekin plan ke hisaab se nahi badhte. Galat log nahi hain — loop mein planning ka koi customer nahi hai.

Contested corner

Kya corporator sach mein itna taakatwar hai?

- **Camp A:** Haan. Ward level par woh gatekeeper hai; officer usse ladta nahi kyunki officer ko roz kaam karna hai.
- **Camp B:** Nahi — asli taakat commissioner (IAS) aur bade neta ke paas hai. Corporator sirf messenger hai, aur badle mein choti-moti cheezein paata hai. Bada paisa upar jaata hai, corporator

ko sirf hissa milta hai.

Sach shayad sheher ke size par depend karta hai: chhote sheher mein corporator asli player, bade metro mein woh chain ka ek hissa. Chapter 16 mein jab officer-neta ka rishta khulega, tab yeh saaf hoga.

Incentive equation

CORPORATOR:

Deta hai: file ka na-rukna, virodh ka settlement, basti ka kaam
Paata hai: builder ka paisa + election ka kharcha + ward par roz ka control
Darr: ward chhota hai – 15-60 hazaar vote. Ek basti naraz hui toh seat gayi. Isliye corporator ka phone 24 ghante khula rehta hai.
Isliye: woh sabse ZYADA available neta hota hai (MLA se bhi zyada) – yeh uski majboori hai, achhai nahi

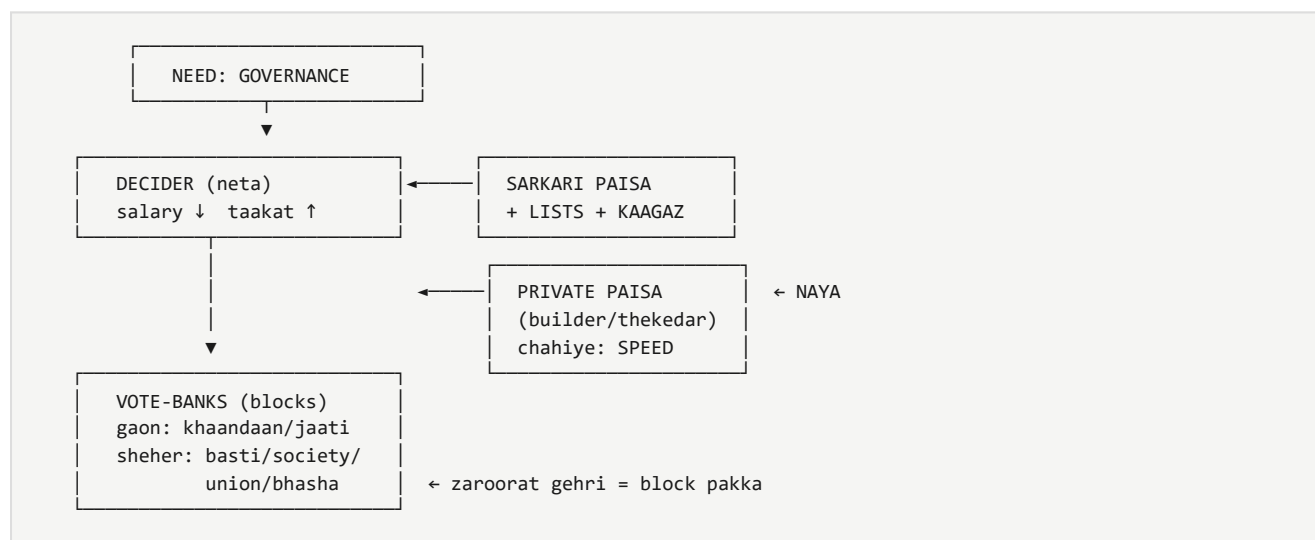

BUILDER:

Deta hai: paisa (khula + chhupa)
Paata hai: time – aur real estate mein time hi paisa hai
Darr: project atka toh interest kha jayega
Isliye: woh corporator ko kharcha nahi, INSURANCE maanta hai

BASTI ka voter:

Deta hai: block vote (sabse solid)
Paata hai: paani, kaagaz, bulldozer se bachav
Darr: ghar par nishaan lag jaye
Isliye: uska vote sabse loyal hai, kyunki uska risk sabse bada hai

Master map — chautha box

Naya box: **private paisa**. Chapter 3 tak sirf sarkari paisa tha. Ab system mein doosra source juda, aur woh sarkari se bada hai. Chapter 8 mein yeh box election ka engine banega, chapter 11 mein career ka.

Baban ki kahani — part 4

Bhaskar sarpanch ban gaya. Baban ka gaon mein kaam khatam.

22 saal ki umar mein Baban sheher aaya — ek rishtedaar ke through, ek corporator ke office mein "ladka" banke. Tankha 4,000 rupaye mahina. Kaam: register likhna, phone uthana, aur logon ko baithana.

Pehle hafte mein usko ek jhatka laga. Gaon mein sarpanch ke paas din mein 10 log aate the. Yahan corporator ke office mein subah 8 baje se 40-50 log baithe hote the — aur corporator sabse milta tha. Har ek se do minute, teen minute. Baban ko lagta tha yeh aadmi pagal hai, itna time kyun de raha hai.

Ek din usne poocha: "Saheb, aap sabse kyun milte ho? Aadha to kaam bhi nahi hota."

Corporator ne jawab diya jo Baban ne 30 saal yaad rakha: **"Kaam nahi hota, lekin milna hota hai. Log kaam ke liye nahi aate, sune jaane ke liye aate hain. Jo unko sunta hai, unka vote uska hai — kaam ho ya na ho."**

Doosra jhatka do mahine baad laga. Ek shaam office khali tha, aur ek aadmi aaya — mehanga kurta, gaadi bahar. Woh baithne wali kursi par nahi baitha; seedha andar chala gaya. Baban ne register nikala uska naam likhne ke liye. Corporator ne haath se ishara kiya — mat likh.

Woh builder tha.

Us raat Baban ne apni copy mein — wahi purani aadat — do column banaye:

JO REGISTER MEIN LIKHE JAATE HAIN	JO NAHI LIKHE JAATE
40-50 log roz	hafte mein 2-3
paani, kaagaz, shikayat	file, plan, zameen
dete hain: VOTE	dete hain: PAISA

Aur neeche ek line likhi, jo is kitab ka aadha hissa hai:

Neta do log se milta hai. Ek se vote milta hai, doosre se paisa. Dono zaroori hain. Ek ke bina kursi nahi, doosre ke bina chunav nahi.

Teesri cheez Baban ne dheere-dheere samjhi, aur woh sabse zaroori thi. Corporator basti mein har Sunday jaata tha — bina kaam ke, bina camera ke. Baban ko lagta tha yeh waqt ki barbadi hai. Ek Sunday corporator ne usse kaha: "Basti ke 2,000 vote hain. Society waalon ke 400. Society waale mujhe gaali dete hain ki main sirf basti jaata hoon. Sahi kehte hain. Lekin unko meri zaroorat saal mein ek baar padti hai. Basti waalon ko har mahine. **Jiski zaroorat roz ki hai, uska vote pakka hai.** Main achha aadmi nahi hoon, main ginti ka aadmi hoon."

Baban ne pehli baar samjha ki gaon aur sheher mein farak sirf size ka nahi hai. Gaon mein block khoon se banta tha. Sheher mein block **zaroorat** se banta hai — aur zaroorat khoon se zyada wafadaar hoti hai.

Self-test (pehle dimaag, phir check)

1. Sheher ka block gaon ke block se kis cheez par bana hota hai, aur sabse solid block kaunsa hota hai?

Jawab: Gaon mein khoon/khaandaan par; sheher mein zaroorat par (basti, society, union, bhasha-group). Sabse solid = basti, kyunki wahan zaroorat roz ki hai — paani, kaagaz, bulldozer se bachav. Rule: jahan zaroorat sabse gehri, wahan vote sabse pakka.

2. Builder corporator ke paas kyun jaata hai jab kaagaz officer deta hai?

Jawab: Kyunki corporator file ko "haan" nahi karwata — usko **rukne se bachata** hai. Delay legal hai aur builder ke liye sabse mehngi cheez hai (interest + cost). Saath mein zameeni virodh baithana aur corporation ki committee mein awaaz. Taakat "na" ko rokne mein hai, "haan" karwane mein nahi.

3. Sheher plan ke hisaab se kyun nahi badhte — kaun galat hai?

Jawab: Koi nahi. Builder-corporator-basti ka loop teenon ko woh de raha hai jo unhe chahiye (speed, vote, kaam). Us loop mein "acchi planning" ka koi customer hi nahi hai — jo cheez kisi ka incentive nahi hoti, woh apne aap nahi hoti.

4. Corporator MLA se zyada available kyun hota hai?

Jawab: Uska ward chhota hai (15-60 hazaar vote). Ek basti naraz = seat gayi. Chhoti seat = zyada nazuk = zyada availability. Yeh uski achhai nahi, ganit ki majboori hai.

5. "Kaam nahi hota, lekin milna hota hai" — iska ganit kya hai?

Jawab: Har aadmi ka kaam karwana namumkin hai (resources limited). Lekin sunna free hai, aur sune jaane wala aadmi apne block mein tumhara naam leta hai. Milna ek scalable product hai, kaam nahi. Chapter 10 mein yeh janta darbar ke roop mein poora khulega.

What this means for you

Sheher ka koi bhi neta samajhna ho toh do sawaal poocho: **"iske blocks kahan hain?"** aur **"iske ward mein construction chal raha hai kya?"** Pehla batayega uski kursi kis par tiki hai, doosra batayega uska paisa kahan se aata hai. Aur agar tum kabhi kisi corporator ya MLA ko kuch bechne jao — yaad rakhna uske paas do alag queue hain, aur woh tumhe pehle 5 minute mein decide kar lega ki tum kis queue ke ho: register wali, ya jo register mein nahi likhi jaati.

Structure verified: corporators sit in municipal corporations, wards vary roughly 15,000-60,000 voters by city size; building permissions are issued by corporation officers, not corporators. The undeclared side of builder-corporator exchange (cash %, flats, partnerships) is reported/journalistic, not documented — treat as pattern, not proof. Nimgaon/Baban/Bhaskar fictional.

5. Karyakarta — hazaaron log muft mein kaam kyun karte hain

Sabse bada sawaal jo koi nahi poochta

Election ke din ek MLA candidate ke liye zameen par kitne log kaam karte hain? Ek 3 lakh voter wali seat par, theek se ladne wale candidate ke paas 1,000 se 3,000 log active hote hain — booth par baithne wale, gaadi chalne wale, parchi baantne wale, bheed jutane wale, jhande lagane wale.

Ab ek bania ki tarah sawaal poocho: **1,000 logon ko 40 din kaam par rakhne ka kharcha kitna hoga?**

Agar sabko dijadi dena pade, toh yeh number itna bada ho jaata hai ki koi bhi campaign namumkin ho jaye. Aur phir bhi har seat par, har party ke paas, yeh log hote hain.

Toh sach kya hai? Sach yeh hai:

Kuch log paise par hote hain (election ke aakhri dino mein mostly, ya specific kaam ke liye — reported rates aksar Rs 300-2,000/din ki range mein bataye jaate hain, jagah aur kaam ke hisaab se, plus khaana-chai-petrol)

Lekin machine ka DHAANCHHA un logon par khada hai jo paise ke liye nahi aate — karyakarta.

Yeh chapter us aadmi ke baare mein hai. Aur maano ya na maano — **poore Indian political system ka sabse zaroori aur sabse kam samjha gaya hissa yehi hai.** Agar tumhe karyakarta samajh aa gaya, toh tumhe samajh aa jayega ki yeh poori machine chalti kaise hai, kyunki uska poora physical kaam yehi aadmi karta hai.

Toh woh aata kyun hai?

Chapter 1 ka sabak yaad karo: har player apna rational sauda kar raha hai. Toh karyakarta ka sauda kya hai? Woh apna time, apni gaadi, apni jawani, kabhi-kabhi apna paisa lagata hai. Badle mein kya paata hai?

Char cheezein. Aur inko ratna nahi, samajhna:

1. UMEED (hope) — sabse bada khichne wala

Karyakarta ke saamne ek seedhi hai jo usse dikhti hai:

karyakarta → booth pramukh → mandal/ward ka pad
→ panchayat/nagar ka ticket → zila ka pad
→ MLA ka ticket → ...

Yeh seedhi asli hai — log sach mein chadhte hain. Lekin ganit dekho: hazaaron karyakarta, aur ticket ek. Yeh lottery jaisa hai — **jeetne ka chance kam hai, lekin sirf khelne walon ko milta hai.** Aur khelne ki fees "5 saal wafadaari" hai.

Isliye karyakarta ka sabse bada dushman doosri party nahi hoti. **Uska sabse bada dushman apni hi party ka woh aadmi hota hai jo usse aage nikal raha hai.** Yaad rakhna — chapter 12 (factions) ka poora beej yahan hai.

2. SURAKSHA (protection) — sabse turant fayda

Yeh sabse practical hai, aur isko bahar wale sabse kam samajhte hain.

Ek aam aadmi ki zindagi mein sarkar ek deewar hai — police, tehsil, bijli office, hospital, school admission. Har jagah line hai, aur line mein uska number aakhri hai.

Karyakarta ke paas ek cheez hoti hai jo aam aadmi ke paas nahi: **ek phone number jo uthaya jaata hai.** Uska thaana mein kaam ho jaata hai. Uske bhatije ka admission ho jaata hai. Uske chacha ka bijli connection aa jaata hai.

Aur yeh sirf uske liye nahi hai — **yahi uski gaon/mohalle mein keemat hai.** Log uske paas aate hain kyunki uska number lagta hai. Woh khud ek chhota mukhiya ban jaata hai. Chapter 2 wala block? Karyakarta ke haath mein ek chhota block aa jaata hai.

Toh dekho kya hua: usne party ko time diya, party ne usko access diya, access se usko apna block mila, aur block se usko party mein aur keemat mili. **Yeh loop hai — aur loop khud ko majboot karta jaata hai.**

3. PEHCHAAN (identity) — sabse gehri, sabse kam dikhne wali

Ek aam aadmi 30 saal ka hai, naukri sadharan hai, gaon mein koi khaas naam nahi. Party ka jhanda uthate hi kuch badal jaata hai. Ab woh "party ka aadmi" hai. Shaadi mein usko aage bithate hain. Uske mobile mein MLA ka number hai. Rally mein woh stage ke paas khada hota hai.

Yeh cheez paise mein nahi milti, aur isko chhodna bahut mushkil hota hai — kyunki chhodne ka matlab hai wapas "koi nahi" ban jaana.

Isliye jab tum kisi 45 saal ke karyakarta ko dekho jisko 20 saal mein kuch nahi mila, aur phir bhi woh subah 7 baje jhanda lagane pahunch jaata hai — usko bewakoof mat samajhna. Woh apni pehchaan bacha raha hai. **Uske paas jo hai, woh usne 20 saal mein banaya hai, aur woh party ke andar hi exist karta hai.**

4. DHANDHA (business) — sabse honest wajah

Kuch log seedha isliye aate hain kyunki party ka aadmi hona kaam aata hai:

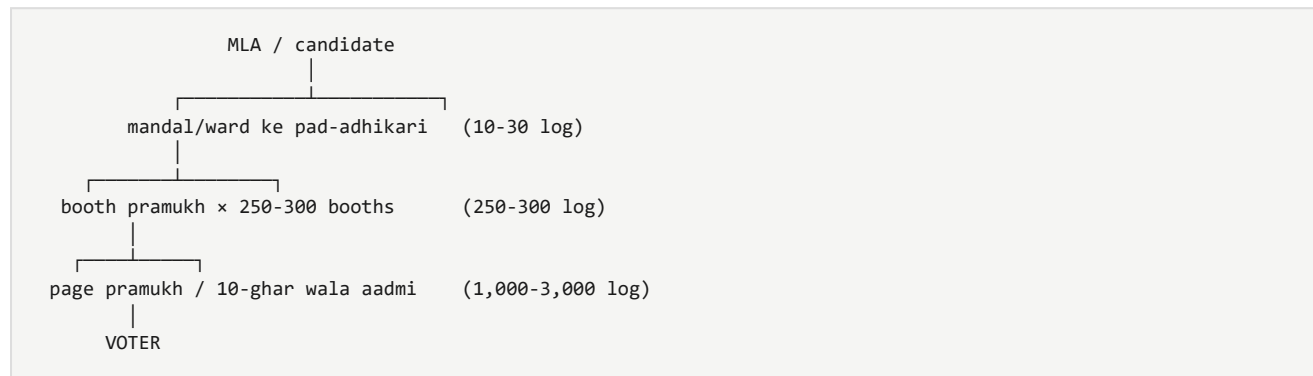

- Thekedar ko theka chahiye — sarkari kaam party ke aadmi ko milna aasan hai
- Transporter ko permit chahiye

- Chhote dukandaar ko licence/atikraman se bachav chahiye
- Zameen ke dhandhe wale ko information chahiye — kahan road aayegi, kahan zone badlega

Yeh log "karyakarta" hain kaagaz par, lekin unka sauda seedha business hai. **Aur system ko inki sabse zyada zaroorat hoti hai, kyunki paisa aur gaadi yahi log dete hain.**

Ab machine ki asli shakal

In char logon ko milakar dekho toh party ka dhaancha samajh aata hai — jo actually ek **pyramid** hai:

Neeche wala aadmi 20-50 ghar sambhaltta hai. Woh un gharon ko naam se jaanta hai. Election ke din uska ek hi kaam hai: **un 20-50 gharon ko booth tak le aana.**

Aur ab poori kitab ka ek bada connection banao:

- Chapter 2 mein humne kaha: neta ka customer voter nahi, **mukhiya** hai.
- Yeh pyramid us baat ka **physical dhaancha** hai. Party ka kaam yeh hai ki har block ke mukhiya ko pyramid mein ek pad de do. Mukhiya ko izzat mil gayi, party ko block mil gaya.

Party ek machine nahi hai jo bahar se blocks ko kharidti hai. Party ek dhaancha hai jisme blocks ke mukhiyaon ko pad dekar andar rakh liya jaata hai. Yeh ek line 20 chapters mein kaam aayegi.

Karyakarta ki keemat kab pata chalti hai

Saal bhar yeh log invisible hote hain. Unki keemat teen mauko par khulti hai:

- 1. Ticket ke waqt (chapter 7).** Party survey karti hai — kis aspirant ke peeche kitne log hain. Jiske peeche machine nahi, uska ticket kat sakta hai chahe woh kitna bhi popular ho.
- 2. Election ke din (chapter 9).** Booth par baithne ke liye har booth par 2-4 log chahiye. 300 booth = 600-1,200 log, ek hi din, ek hi waqt. Yeh log paise se nahi aate — yeh 5 saal ke rishte se aate hain. **Jis candidate ke paas booth par baithne wale nahi hain, woh election se pehle hi haar chuka hai.**

3. Dal-badal ke waqt (chapter 13). Jab neta party badalta hai, asli sawaal yeh hota hai: uske saath uske log aayenge ya nahi? Neta ke bina machine chal jaati hai. Machine ke bina neta kuch nahi hai.

Contested corner

Karyakarta ka system majboot ho raha hai ya kamzor?

- **Camp A:** Kamzor. Ab paisa aur WhatsApp zyada important hain; log wafadaari se nahi, dihani se aate hain; naya ladka 5 saal free kaam karne ko tayyar nahi jab uske paas Instagram aur naukri dono hain.
- **Camp B:** Aur majboot. Jo party sabse ache se karyakarta ka dhaancha banati hai (booth-level tak), wahi jeetti hai — aur yeh 2014 ke baad aur zyada sach hua hai, kam nahi.

Dono ke paas evidence hai. Shayad sach yeh hai ki **dhaancha ab bhi decisive hai, lekin usko chalne ka tarika badal gaya hai** — pehle sirf rishta tha, ab rishta + WhatsApp group + data. Chapter 19 mein isko poora kholenge.

Incentive equation

KARYAKARTA:

Deta hai: time, gaadi, jawani, kabhi paisa, aur
sabse keemti — apna chhota block
Paata hai: umeed (ticket ki lottery) + suraksha (phone
uthta hai) + pehchaan (main kuch hoon) +
dhandha (kuch logon ke liye)
Darr: party mein uska number peeche chala jaye;
ya usse bada koi aur uske ilaake mein aa jaye
Isliye: uska asli dushman apni party ka pratidwandi hai

NETA:

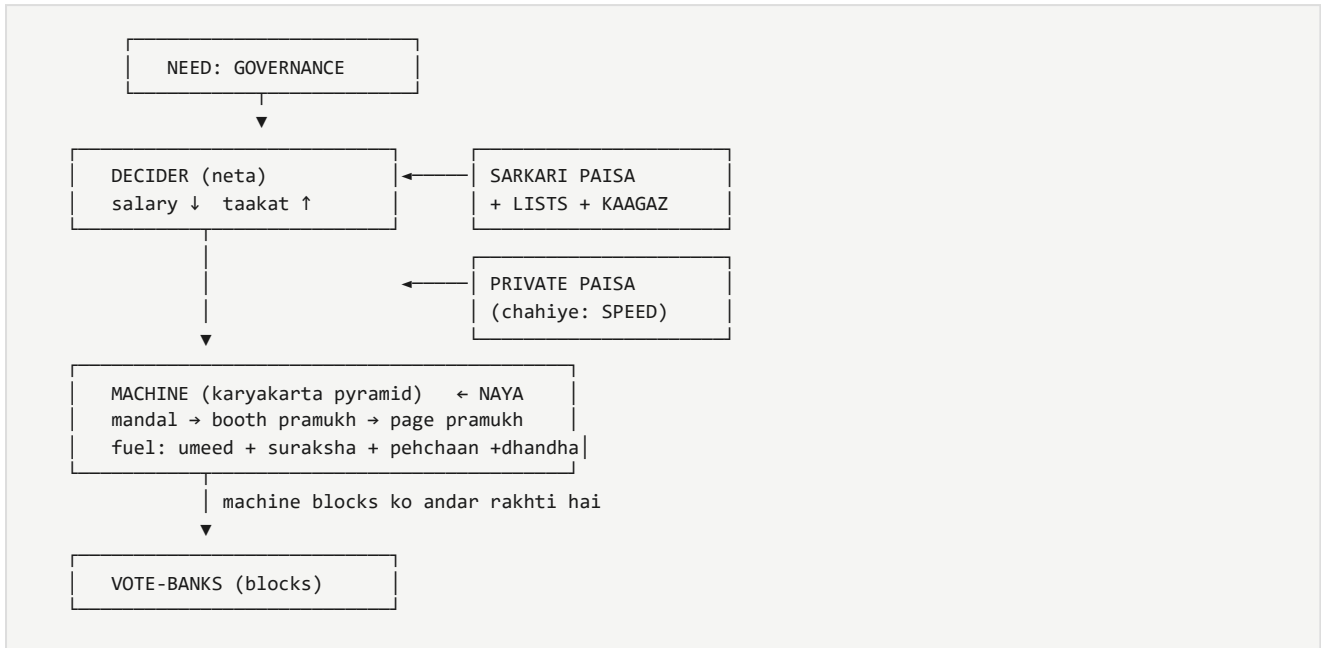

Deta hai: access, pad, chhote kaam, izzat
Paata hai: 1,000-3,000 logon ki free labour + unke blocks
Darr: machine doosre ke paas chali jaye
Isliye: neta ka aadha waqt VOTER ke liye nahi, apne
karyakartaon ko sambhalne mein jaata hai
(shaadi, mayyat, aspataal — sabse pehle
apne logon ke)

PARTY:

Deta hai: dhaancha (pad, naam, jhanda)
Paata hai: hazaaron blocks, ek chhat ke neeche
Isliye: party ka asli product IZZAT hai — woh cheez
jo woh unlimited chhaap sakti hai aur jiski
cost zero hai

Woh aakhri line dobara padho. **Party ke paas paisa limited hai, ticket limited hain, lekin PAD aur IZZAT unlimited hain.** "Yuva morcha ka mandal upadhyaksh" — is naam ki cost zero hai, aur yeh ek aadmi ko 5 saal kaam par laga deta hai. Yeh system ka sabse chalak hissa hai.

Master map — paanchwa box

Ab machine ka bicholiya (middle layer) juda. Dekho neta seedha blocks se nahi juda — **beech mein machine hai**. Yeh insight aage bahut kaam aayega: jo aadmi machine control karta hai, woh neta ko bhi control karta hai.

Baban ki kahani — part 5

Baban 24 ka hai. Corporator ke office mein do saal ho gaye. Tankha ab 6,000.

Ek shaam corporator ne usse kaha: "Tu register likhta rehta hai. Ab ek kaam kar — Shivaji Nagar ka booth number 114, 118, 121 — teen booth tera. Voter list le, ghar-ghar ja, aur mujhe batana kaun kiske saath hai."

Baban ne poocha: "Iske kitne paise?"

Corporator hansa nahi. Bola: "Paise nahi. **Tere naam ki parchi lagegi**. Us ilaake mein log kahenge 'Baban saheb ka aadmi hai.' Baaki tu khud dekh lena."

Baban ko us waqt yeh dhokha laga.

Teen mahine baad usko samajh aaya. Booth 118 ki ek aurat ka bijli connection do saal se atka tha. Baban ne ek phone karwa diya — corporator ke office se. Connection 8 din mein aa gaya.

Us hafte, us basti mein, Baban ka naam badal gaya. Ab woh "office ka ladka" nahi tha. Ab woh **"woh ladka jiska kaam ho jaata hai"** tha.

Agle do mahine mein 14 log usko dhoondhte hue aaye. Usne 9 ke kaam karwa diye, 5 ke nahi hue. Jo 9 the, unhone apne ghar ke, apne rishtedaaron ke naam batane shuru kar diye.

Ek saal baad Baban ke paas teen booth the aur usko pata tha ki us ilaake mein lagbhag 400 vote uske kehne par hil sakte hain.

Us saal ki Diwali par corporator ne usko bulaya aur kaha: "Ab samajh aaya tankha kya thi?"

Baban ne kaha: "Haan. Aap paise nahi de rahe the. Aap **rasta** de rahe the."

Corporator ne sar hilaya: "Aur ek baat samajh le. Main tujhe kabhi itna paisa nahi de sakta tha ki tu 5 saal ruk jaata. Lekin 400 vote — woh tere hain, mere nahi. **Isliye tu ab mujhse nahi jaayega, kyunki jaayega toh 400 vote yahin chhod ke jaana padega.**"

Us raat Baban ne copy nikali. Bahut dino baad. Aur usne ek line likhi jo aage uski poori zindagi ka formula ban gayi:

Party paisa nahi deti. Party rasta deti hai. Aur jo aadmi rasta le leta hai, woh phir apne rastey se bandha jaata hai.

Neeche usne ek aur line likhi, chhoti si, jo us purane aadmi ki baat ka jawab thi jo usne 19 saal ki umar mein suni thi — *"jiska bhaav abhi laga nahi, uska bhaav sabse zyada hota hai"*:

Ab mera bhaav lag gaya hai. Aur bhaav lagne ka matlab hai — ab main bik sakta hoon. Yehi taakat hai, yehi phansna hai.

Self-test (pehle dimaag, phir check)

1. Karyakarta muft mein kaam kyun karta hai — chaaron wajah batao.

Jawab: (1) Umeed — pad se ticket tak ki seedhi, lottery jaisi lekin sirf khelne walon ke liye. (2) Suraksha — uska phone uthaya jaata hai, uske kaam hote hain, aur isse uski apni keemat banti hai. (3) Pehchaan — "party ka aadmi" hona, jo paise se nahi milta. (4) Dhandha — thekedar/transporter/dukandaar ke liye seedha business fayda.

2. Party ka "unlimited product" kya hai aur woh itna powerful kyun hai?

Jawab: Pad aur izzat. Ticket limited hai, paisa limited hai, lekin "mandal upadhyaksh" jaise pad ki cost zero hai aur woh unlimited banaye ja sakte hain. Zero-cost cheez se 5 saal ki labour milti hai — system ka sabse chalak hissa.

3. Karyakarta ka sabse bada dushman kaun, aur kyun?

Jawab: Apni hi party ka pratidwandi. Kyunki competition ticket/pad ke liye hai, aur ticket apni party se milta hai — doosri party se nahi. Yehi factions (chapter 12) ka beej hai.

4. Neta seedha blocks se kyun nahi judta — beech mein kya hai?

Jawab: Machine (karyakarta pyramid). Party har block ke mukhiya ko ek pad dekar andar rakh leti hai. Isliye jo machine control karta hai woh neta ko bhi control karta hai — aur isliye dal-badal mein asli sawaal "log saath aayenge ya nahi" hota hai.

5. Corporator ne Baban ko paise ki jagah "rasta" kyun diya — aur usme uska apna fayda kya tha?

Jawab: Paisa dene se Baban 5 saal nahi rukta (paisa kahin bhi mil jaata hai). Rasta dene se Baban ne apna khud ka 400-vote ka block bana liya — aur woh block usi ilaake se juda hai, corporator ke through banaa hai. Ab Baban jaayega toh apna banaya hua sab chhodkar jaana padega. Sabse sasti loyalty woh hai jo aadmi khud apne haathon se banata hai.

What this means for you

Kisi bhi neta ki asli taakat naapni ho toh uski rally ki bheed mat gino — **uske karyakarta gino**. Bheed kiraye par milti hai, karyakarta 5 saal mein banta hai. Aur agar kabhi kisi political operation ko samajhna ho ya usme kuch bechna ho, toh yaad rakhna: is system ka sabse bada dard-bhara point yehi pyramid hai — kaun kiske saath hai, kaun hil raha hai, kis booth par apna aadmi nahi hai. Jo cheez yeh pyramid saaf dikha de, woh neta ke liye software nahi, **aaina** hai.

Worker payment rates (Rs 300-2,000/day plus food/travel, for 30-45 days) are widely reported by campaign-services vendors and journalism, not officially documented — treat as reported range. Pyramid structure (mandal → booth → page/panna pramukh) is a documented feature of major Indian party organisations. Nimgaon/Baban fictional.

PART 2

The MLA

6. Seat ki anatomy — MLA asal mein hai kya

Pehle ek galatfehmi todte hain

School mein padhaya jaata hai: **"MLA vidhan sabha ka sadasya hota hai. Uska kaam kanoon banana hai."**

Yeh technically sach hai aur practically lagbhag jhoot hai.

Sochne ki cheez: ek state assembly saal mein kitne din baithti hai? Aksar 20-40 din ke aas-paas — kai states mein isse bhi kam. Matlab saal ke 365 dinon mein se lagbhag **330-345 din MLA vidhan sabha mein hai hi nahi.**

Aur jin 30 dinon mein woh hai, wahan bhi asli faisle kaun karta hai? Bill sarkar (cabinet) laati hai, party whip jaari karti hai, aur MLA ko party line ke hisaab se vote dena hota hai — nahi toh dal-badal kanoon ke tahat sadasyata ja sakti hai (chapter 13). Matlab uska **vote bhi zyadatar uska apna nahi hota.**

Toh phir — 330 din woh karta kya hai? Aur log usse chunte kyun hain?

Iska jawab is chapter ka poora kaam hai, aur yeh jawab poori kitab ka sabse zaroori correction hai.

Do job descriptions

KAAGAZ WALI JOB (jo constitution mein likhi hai)

- Vidhan sabha mein baitho
- Bill par bahas karo, vote do
- Sawaal poochho, committee mein raho
- Apne kshetra ki awaaz uthao

Time: saal ke ~30 din

ASLI JOB (jo voter expect karta hai)

- Har mayyat, har shaadi, har satyanarayan pooja mein aao
- Roz subah logon ki shikayat suno
- Police station, tehsil, hospital, school mein "phone karo" — logon ke kaam karwao
- Sadak, naali, paani, transformer — kaam dilao
- Apne 1,000-3,000 karyakarta sambhalo
- Party ke andar apni jagah bachao

Time: saal ke 365 din

Voter MLA se kanoon nahi maangta. Voter MLA se **pahunch** maangta hai — sarkar tak pahunchne ka rasta. Uske liye MLA vidhayak nahi, **sifarish ka darwaza** hai.

Aur yehi wajah hai ki ek MLA jo assembly mein 5 saal mein ek baar nahi bola, phir bhi bade margin se jeet jaata hai — jabki ek MLA jo assembly mein shandar bhashan deta hai, gaon mein mayyat par nahi pahuncha, woh haar jaata hai.

System bura nahi hai. System ne bas ek doosra kaam maang liya hai. Voter ko roz ki zindagi mein jo chahiye, MLA usko wahi de raha hai.

Seat ka size — aur usse jo sab kuch nikalta hai

Ek assembly seat (approx): 2-4 lakh voters
250-350 polling booths
50-150 gaon, ya sheher ke
kuch wards

Ab is size se teen cheezein apne aap nikalti hain, aur teenon MLA ka behavior samjha deti hain:

1. Woh sabko nahi jaan sakta. 3 lakh log. Agar woh roz 100 logon se mile toh poori seat se milne mein 8 saal lagenge — aur term 5 saal ki hai. Isliye woh **majboori se** blocks aur mukhiyaon ke through kaam karta hai. Chapter 2 ka ganit yahan physical reality ban jaata hai.

2. Woh akela kuch nahi kar sakta. 250-350 booth. Ek din mein sab par apna aadmi baithana hai. Isliye machine (chapter 5) uski life-line hai, shauk nahi.

3. Uska time hi uska sabse scarce resource hai. Paisa woh jugaad kar lega. Time nahi kar sakta. Isliye MLA ki poori zindagi ek **time-allocation problem** hai: aaj kis gaon jaunga, kiski mayyat par jaunga, kiska phone uthaunga.

Yeh teesri baat sabse zyada kaam ki hai. Agar tumhe kabhi kisi MLA ke behavior ka reason samajh na aaye, toh yeh poochho: **"iske time ke hisaab se yeh rational hai kya?"** Aksar jawab mil jayega.

MLA ke haath mein sach mein kya hai

Log samajhte hain MLA ke paas bahut taakat hai. Sach isse zyada interesting hai — uske paas **thodi si asli taakat aur bahut sara asar** hai:

JO SEEDHA USKE HAATH MEIN HAI:

- MLA fund (MLALADS): apne kshetra mein chhote kaam suggest karne ka fund. Amount state ke hisaab se alag hota hai, aur MLA ise seedha kharch nahi karta — woh kaam SUGGEST karta hai, paisa administration ke through jaata hai.
- Vidhan Sabha mein sawaal aur bahas ka adhikaar
- Kuch committees mein jagah

JO SEEDHA NAHI HAI, LEKIN ASAR HAI (yeh bada hissa hai):

- Transfer-posting: officer ko hatana/lagwana — MLA order nahi de sakta, lekin mantri/CM tak uski baat jaati hai. Ruling party ka MLA ho toh asar bahut, virodhi dal ka ho toh bahut kam.
- Police: FIR, jamanat, case ki "dekhbhal"
- Sarkari kaam ke tender aur thekedar
- Scheme ki beneficiary lists — kiska ghar, kiski pension, kiska connection pehle
- College/hospital admission ki sifarish
- Local officers ka rojmarra ka behavior

Ab dhyan do — is list ka 80% "asar" wala hissa hai, "adhikaar" wala nahi. Aur yehi baat MLA ki poori zindagi ka darr banati hai:

MLA ki taakat kanoon se nahi aati. Uski taakat is baat se aati hai ki log maante hain uski baat chal jaati hai.

Aur is tarah ki taakat bahut nazuk hoti hai. Jis din ruling party se woh bahar hua, ya jis din uska mantri se rishta bigda, us din uska phone uthna kam ho jaata hai — aur jis din phone uthna kam hua, us din uska block hilna shuru ho jaata hai.

Isliye ruling party ka MLA hona aur virodhi dal ka MLA hona do bilkul alag naukriyaan hain. Ek ke paas asar hai, doosre ke paas sirf awaaz. Yeh baat chapter 12 aur 13 mein bahut kaam aayegi — dal-badal ki aadhi wajah yehi hai.

Ek din — MLA ki zindagi

Kitaab mein numbers se zyada yeh cheez samjhati hai. Ek aam din:

06:30 Ghar par log aana shuru — 20-40 log, ghar ke bahar hi baith jaate hain
07:00 Chai, akhbaar, PA ke saath aaj ki list
08:00 Janta darbar — ek-ek karke sunna, parchi par likhna, phone karna (chapter 10 ka poora subject)
10:30 Gaadi — do gaon ka daura
11:30 Ek mayyat (mrityu par jaana sabse zaroori kaam hai — is par chapter 10 mein poora section hai)
13:00 Ek shaadi mein 10 minute, khaana nahi, sirf dikhna aur photo
14:30 Tehsil office — do kaam ke liye officer se milna
16:00 Apne karyakartaon ke saath baithak — kaun naraz hai, kiska kaam atka hai
18:00 Ek programme ka udghatan — 4 minute ka bhashan
20:00 Ghar — phir se 15-20 log
22:00 Phone: mantri ke PA ko, zila adhyaksh ko, do naraz karyakarta ko
23:30 Din khatam

Ab is din mein dhoondho: kanoon banane ka kaam kahan hai? **Kahin nahi.** Aur phir bhi yeh aadmi apni job theek kar raha hai — kyunki uski asli job yeh hi hai.

Ek cheez aur note karo: is poore din mein woh **kisi ek aadmi ke liye 3-4 minute se zyada** nahi de raha. Yeh kanjoosi nahi hai. 3 lakh voters aur 24 ghante ke beech ka ganit yehi allow karta hai.

Ruling party vs virodhi — do alag zindagi

	RULING PARTY MLA	VIRODHI DAL MLA
Phone uthta hai	haan	aksar nahi
Transfer mein baat	chalti hai	nahi chalti
Fund ka kaam	theek chalta hai	ataкта hai
Karyakarta	saath hain	dheere-dheere khiskte hain
Agli baar jeetne ka chance	achha	mushkil

Yeh table poore Indian politics ka ek chhupa hua engine hai. Kyunki iska matlab yeh hai ki **haarne ka nuksaan sirf 5 saal ka nahi hota — woh compounding hota hai**. Virodhi dal mein baithe MLA ke log dheere-dheere ruling party mein chale jaate hain, kyunki karyakarta ko suraksha aur kaam chahiye (chapter 5), aur woh virodhi dal ke paas nahi hai.

Yehi wajah hai ki dal-badal itna common hai (chapter 13), aur yehi wajah hai ki MLA ke liye "sarkar mein hona" bhashan ka mudda nahi, **survival** ka mudda hai.

Contested corner

Kya MLA ka kaam badal raha hai?

- **Camp A:** Haan. Ab log direct portal, helpline, aur online se kaam karwa lete hain; MLA ka bicholiya wala role kam ho raha hai. Naya voter sadak-naali se zyada bade mudde par vote deta hai.
- **Camp B:** Nahi. Portal ne form badla, kaam nahi. Aaj bhi log portal par form bharkar MLA ke office aate hain ki "iska follow-up karwa do." Bicholiya ki zaroorat khatam nahi hui, bas ab woh digital form ke saath aata hai.

Dono mein sach hai. Sabse imaandaar version shayad yeh hai: **bade sheher mein Camp A zyada sach hai, gaon aur chhote sheher mein Camp B.**

Incentive equation

MLA:

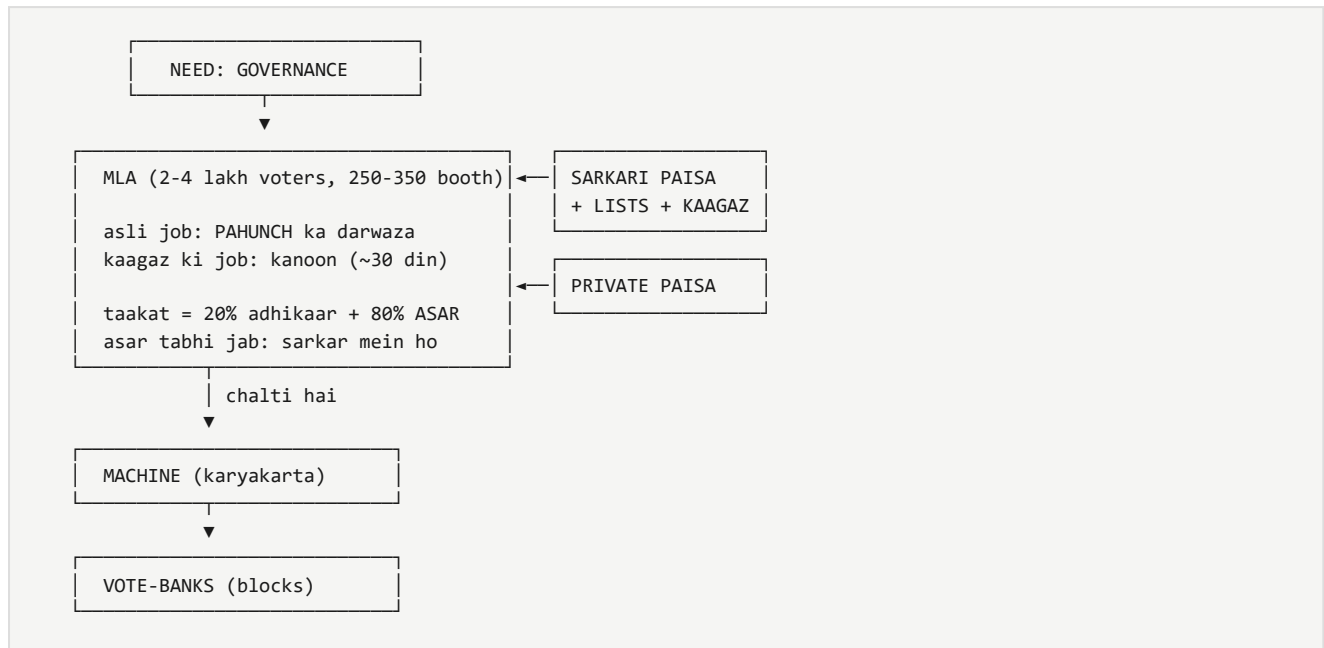

Deta hai: pahunch (sifarish), maujoodgi (har sukh-dukh mein dikhna), kaam
Paata hai: kursi + uska poora conversion (chapter 1), machine, aur agli baar ticket ka dawa
Darr: TEEN darr, is order mein:
1. ticket kat jaye (party se) – chapter 7
2. seat haar jaye (voter se)
3. sarkar chali jaye (asar khatam) – upar wali table
Isliye: uska sabse zyada time party ke andar aur apne karyakartaon par jaata hai, aam voter par nahi

VOTER:

Deta hai: block ka vote
Paata hai: sarkar tak pahunchne ka ek rasta
Darr: kaam ke liye koi phone karne wala na ho
Isliye: woh us MLA ko chunta hai jo "milta hai", us MLA ko nahi jo "sahi bolta hai"

Woh "TEEN darr" wali line dobara padho, aur unka **order** dekho. MLA ka pehla darr voter nahi hai — party hai. Kyunki agar ticket hi kat gaya, toh voter ke paas usko chunne ka option hi nahi bachega. Yeh order poori kitab ka sabse counter-intuitive sach hai, aur chapter 7 poora isi par hai.

Master map — MLA ka box khulta hai

Naya insight map mein: **asar sirf tab kaam karta hai jab sarkar apni ho.** Yeh ek line se dal-badal, faction, aur "sarkar banane" ki पूरी bhagam-bhaag samajh aa jaati hai.

Baban ki kahani — part 6

Baban 29 ka hai. Corporator ke paas 7 saal ho gaye. Uske paas ab 3 nahi, 11 booth hain — lagbhag 1,800 vote uske naam par hilte hain. Log usse "Baban bhau" bulate hain.

Us saal MLA ka election aaya. Corporator ne Baban ko MLA candidate ke campaign office mein bhej diya — "seekh ke aa."

Pehle hafte Baban ka bharam toota.

Woh sochta tha MLA ban-na corporator ban-ne ka bada version hai. Andar jaake dekha: **ganit alag hai.**

Corporator ke ward mein 22,000 vote the. Baban un 22,000 mein se lagbhag har mohalle ka naam jaanta tha. MLA ki seat mein **2 lakh 90 hazaar** vote the aur **312 booth.**

Pehle din campaign office mein ek badi deewar par booth ka naksha laga tha. 312 khaane. Har khaane mein teen number: pichhli baar kitne vote pade, hamein kitne mile, aur ek column jo khali tha — **"aaj kaun sambhal raha hai".**

Baban ne gina. **97 khaane khali the.** Matlab 312 mein se 97 booth par candidate ka koi aadmi nahi tha.

Usne candidate ke bhai se poocha: "Yeh 97 kaise bharenge?"

Bhai ne kandha uchkaya: "Paisa dedenge, log mil jayenge."

Baban ne kuch nahi kaha. Lekin us raat usne apni copy — ab woh purani copy nahi, ek register tha — mein likha:

Paise se aadmi milta hai. Aadmi se BOOTH nahi milta. Booth par baithne wale ko us gaon ke logon ka naam pata hona chahiye. Woh 40 din mein nahi banta.

Election hua. Candidate 4,000 vote se haara.

Baban ne baad mein hisaab lagaya — jin 97 booths par unka koi nahi tha, wahan unka average vote baaki booths se kaafi kam tha. Poora antar nikala toh woh 4,000 se zyada tha.

Usne register mein woh line likhi jo aage 20 saal uske kaam aayi:

Election ke din koi election nahi jeeta jaata. Us din sirf ginti hoti hai us kaam ki jo 5 saal mein hua ya nahi hua.

Aur ek chhoti si baat aur — jo usne kisi ko batayi nahi. Jab candidate haara, toh haarne ke teen mahine ke andar us candidate ke paas aane wale logon ki bheed lagbhag khatam ho gayi. Baban ne dekha ki jo aadmi 40 din pehle "saheb saheb" karta tha, woh ab phone nahi uthata.

Usne register mein likha:

Log neta se nahi judte. Log us RASTE se judte hain jo neta ke paas hota hai. Rasta gaya, log gaye.

Self-test (pehle dimaag, phir check)

1. MLA saal ke ~30 din assembly mein hota hai. Baaki 330 din woh kya karta hai, aur uski "asli job description" kya hai?

Jawab: Asli job = **pahunch ka darwaza** banana. Janta darbar, mayyat/shaadi mein maujoodgi, police-tehsil-hospital mein phone karwana, kaam dilana, aur apni machine (karyakarta) sambhalna. Voter usse kanoon nahi maangta, sarkar tak rasta maangta hai.

2. "MLA ki taakat 20% adhikaar aur 80% asar hai" — iska practical matlab kya hai?

Jawab: Uske paas seedha adhikaar bahut kam hai (MLALADS suggest karna, assembly mein bolna). Baaki sab — transfer, police, tender, lists — asar se hota hai, matlab tabhi jab log maanein ki uski baat chalti hai. Aur asar nazuk hai: sarkar badli ya mantri se rishta bigda toh asar khatam.

3. Ruling party MLA aur virodhi dal MLA — asli farak kya, aur uska compounding effect kya?

Jawab: Ruling party mein phone uthta hai, kaam hota hai, karyakarta saath rehte hain. Virodhi dal mein kaam atakta hai, aur isliye karyakarta dheere-dheere doosri taraf khiskte hain. Matlab haar sirf 5 saal ka nuksaan nahi — machine bhi kamzor hoti jaati hai, jisse agli baar aur mushkil ho jaati hai. Yehi dal-badal ka bada karan hai.

4. MLA ke teen darr kaunse, aur unka order kya hai — aur order counter-intuitive kyun hai?

Jawab: (1) Ticket katna, (2) seat haarna, (3) sarkar jaana. Pehla darr party ka hai, voter ka nahi — kyunki ticket hi nahi mila toh voter ke paas usse chunne ka option hi nahi. Bahar se lagta hai neta voter se darta hai; asal mein woh pehle party se darta hai.

5. Baban ne kyun kaha ki "paise se booth nahi milta"?

Jawab: Booth par baithne wale ko us ilaake ke logon ke naam, rishte aur history pata honi chahiye — taaki woh pehchaan sake kaun apna hai, kaun nahi, aur kise ghar se nikalwana hai. Yeh rishta 5 saal mein banta hai; 40 din ka kiraye ka aadmi sirf kursi bhar sakta hai, kaam nahi kar sakta.

What this means for you

Kisi bhi MLA se milne se pehle do cheezein pata karo: **(1) woh ruling party mein hai ya nahi**, aur **(2) uski seat kitne booth ki hai aur pichhli baar margin kitna tha**. Pehli baat batayegi ki uske paas asar hai ya nahi — matlab woh kuch karwa sakta hai ya sirf sun sakta hai. Doosri batayegi ki woh kitna surakshit hai — aur jo MLA jitna kam surakshit hai, woh utna hi zyada khula hai us cheez ke liye jo usko agli baar jeetne mein madad kare. Aur yaad rakhna: uska sabse scarce resource paisa nahi, **time** hai. Jo cheez uska time bachaye, uski keemat uske liye khud-ba-khud badi hai.

Structure verified: state assemblies typically sit for a few dozen days a year (varies widely by state and year); MLALADS exists in most states with state-specific amounts and is administered through the district administration on MLA recommendation, not spent directly by the MLA; anti-defection provisions bind MLAs to party whips. Assembly seat size (~2-4 lakh voters, ~250-350 booths) is approximate and varies by state and delimitation. The daily schedule is illustrative, not a documented case. Baban fictional.

7. Ticket — asli election, jo public kabhi nahi dekhti

Do elections, aur pehla wala mushkil hai

Public ko ek election dikhta hai: candidate vs candidate, do mahine ka shor, phir result.

Us se pehle ek aur election hota hai. Usme koi voting nahi hoti, koi date nahi hoti, koi result declare nahi hota. Usme kaun jeeta yeh sirf ek line se pata chalta hai — party ki list mein tumhara naam hai ya nahi.

Yeh hai **ticket** ka election. Aur yeh pehle wale se **kahin zyada mushkil** hai.

Ganit dekho:

```
Ek state, maano 288 seats.  
Har seat par har badi party mein serious aspirants: 5-15  
  
Matlab ek party ke andar: ~1,500-4,000 log  
Ticket: 288  
  
Aur us 288 mein se aadhi se zyada seats par pehle se  
maujooda MLA ya pakka daavedar baitha hai.
```

Toh naye aadmi ke liye asli competition "**main vs saamne wali party**" nahi hai. Asli competition "**main vs apni hi party ke 8 log**" hai.

Yeh baat chapter 6 ke "teen darr" wale order ko explain karti hai. MLA ka pehla darr party hai, voter nahi — kyunki party ka darwaza pehle aata hai. Voter ka number baad mein aata hai.

Ticket kis cheez par milta hai

Log samajhte hain ticket "wafadaari" par milta hai, ya "kaam" par. Sach zyada thanda hai. Party ek hi cheez maximize karti hai:

JEETNE KA CHANCE.

Party ko tumse pyaar nahi hai. Party ko seat chahiye. Har baaki cheez — wafadaari, kaam, jaati, paisa — sirf isliye matter karti hai kyunki woh jeetne ke chance ko badhati ya ghatati hai.

Ab wo saari cheezein dekho jo us "chance" ko banati hain:

1. WINNABILITY KA SABOOT (sabse bada)

Party ke paas survey hote hain — apne bhi, kiraye ke bhi. Woh dekhte hain: is seat par kaun sa naam sabse zyada vote khinch sakta hai. Yeh number aksar aakhri faisla karta hai.

Aur is wajah se ek cheez hoti hai jo bahar se bahut ajeeb lagti hai: **party apne 20 saal purane wafadaar ka ticket kaat kar doosri party se aaye hue aadmi ko de deti hai.** Wafadaar ko lagta

hai dhoka hua. Party ke hisaab se yeh simple ganit hai — naya aadmi 30,000 vote laata hai, purana 12,000.

Yaad rakhna: **party ke liye ticket inaam nahi hai, investment hai.**

2. JAATI/SAMUDAY KA FIT

Har seat ka apna ganit hota hai (chapter 18 poora ispe hai). Agar seat mein ek samuday 60,000 vote ka hai, toh party us samuday ka candidate dhoondhegi — chahe woh kam kabil ho.

Yeh "bura" nahi hai party ke hisaab se — yeh chapter 2 ka block-ganit hai. Ek candidate jo apne saath ek 60,000 ka block leke aata hai, woh us candidate se behtar investment hai jo akela aata hai.

3. MACHINE (chapter 5 ka connection)

Party poochti hai: "iske peeche kitne log hain?" Jiske paas 300 booth par apne aadmi hain, uska daawa mazboot hai. Jiske paas sirf naam hai, uska nahi.

Isliye ticket ke aspirants saal bhar bheed dikhate rehte hain — janm-din par hoarding, rally mein gaadiyaan, "samarthak" ka pradarshan. Woh voter ko impress nahi kar rahe. **Woh party ko apni machine ka size dikha rahe hain.**

4. PAISA

Do tarah se:

- *Campaign ka kharcha khud utha sakta hai kya?* Party ke paas har seat ka poora paisa nahi hota. Jo candidate apna kharcha khud utha le, woh party ke liye sasta hai.
- *Aur — reported, aur khulke maana nahi jaata — kuch jagah ticket ke liye party fund mein bada "yogdaan" expected hota hai.* Iske ilzaam har party par lage hain, sabne inkaar kiya hai. Isko is kitab mein pattern ki tarah rakho, proof ki tarah nahi.

5. WAFADAARI AUR SANGATHAN

Yeh sabse kam weight wali cheez hai — lekin zero nahi. Party ko dikhana hota hai ki wafadaari ka bhi mol hai, warna machine ka fuel (chapter 5 ka "umeed") khatam ho jayega.

Isliye har party har baar kuch tickets purane wafadaaron ko deti hai — bhale seat kamzor ho. **Yeh signal hai, poore system ko: "line mein lage raho, number aata hai."**

6. HIGH COMMAND KA RISHTA

Faisla aakhir mein kuch logon ke kamre mein hota hai. Jiska us kamre mein koi bolne wala hai, uska chance badh jaata hai. Chapter 12 poora is kamre ke baare mein hai.

Aspirant ki zindagi — 5 saal ka interview

Ab is sabko jodo, aur samjho ki ek ticket-aspirant ki zindagi kaisi hoti hai.

Woh 5 saal tak ek **interview** de raha hai, jiska result ek baar aata hai. Uska har kaam do audiences ke liye hota hai:

KAAM	VOTER KE LIYE	PARTY KE LIYE
mayyat mein jaana	"hamara aadmi"	"iska sampark hai"
rally mein bheed lana	"iske peeche log"	"iski machine hai"
apne kharche se ambulance	"yeh madad karta"	"iske paas paisa hai"
apni jaati ka sammelan	"yeh hamara"	"iske paas block hai"
neta ke saath photo	"iski pahunch"	"yeh line mein hai"

Har cheez do baar count hoti hai. Aur aspirant jaanta hai ki **party wali column zyada important hai** — kyunki party ka darwaza pehle aata hai.

Ticket kat-ne ka din

Yeh Indian politics ka sabse kroor din hota hai, aur sabse zyada revealing bhi.

List aati hai. Aksar aakhri waqt par — nomination ki aakhri tareekh se ek-do din pehle. Yeh timing accident nahi hai: **jitna kam waqt bachega, naraz aadmi ke paas utne kam options bachenge.**

Ab jiska ticket kat gaya, uske paas kya raaste hain?

1. CHUP RAHO
"Party ka faisla sar-aankhon par." Umeed: agli baar ya koi pad/corporation ka chairman-ship.
2. BAGAWAT — khud khade ho jao
Nirdaleeya (independent) lado. Aksar haarte hain, lekin apni party ke official candidate ko HARA dete hain.
Yeh badla bhi hai aur bargaining bhi: "dekh lo, mere bina yeh seat nahi jeetti."
3. DOOSRI PARTY MEIN JAO
Agar tumhare paas block hai, toh doosri party ka darwaza usi raat khulta hai. Isliye ticket katne ke 24-48 ghante mein sabse zyada dal-badal hota hai.
4. SABOTAGE
Rehna party mein, lekin andar se apne hi candidate ko harana. Sabse aam, sabse mushkil pakadna, aur andar walon ko hamesha pata hota hai.

Aur ab poore system ki ek chalak baat samjho. Party jaanti hai ki 4-5 log naraz honge. Toh party unko sambhalne ke liye kya deti hai? Aksar **pad** — corporation ka chairman, board ka member, morcha ka adhyaksh.

Yaad hai chapter 5 ka insight? **Party ka unlimited product izzat hai.** Ticket 288 hain, lekin pad hazaaron banaye ja sakte hain. Isliye har ticket ke saath 4-5 pad bant-te hain — naraz logon ko line mein rokne ke liye.

Ek chalak detail: "survey"

Har party kehti hai "hum survey ke aadhar par ticket dete hain." Yeh aadha sach hai, aur uska doosra aadha zyada dilchasp hai.

Survey do kaam karta hai:

1. **Sach mein winnability naapna** — yeh asli use hai.
2. **Faisle ko bahar ka roop dena** — "maine nahi kaata, survey ne kaata." Yeh leadership ko naraz aadmi ke gusse se bachata hai.

Isliye survey ka number kabhi public nahi hota. Jo cheez public nahi hoti, uspe bahas nahi ho sakti — aur yeh bilkul bhi accident nahi hai.

Contested corner

Ticket ke liye paisa kitna chalta hai?

- **Camp A:** Bahut. Kuch seats par ticket ki ek "rate" hoti hai, aur bina us paise ke naam list mein nahi aata.
- **Camp B:** Zyada bada factor winnability hai. Paisa isliye maayne rakhta hai kyunki paisewala candidate campaign khud chala leta hai — na ki isliye ki usne ticket "khareeda".

Sach: har party mein, har state mein alag. Aur is cheez ka koi audited data nahi hai, sirf ilzaam aur inkaar hain. **Is kitab ka rule: jahan sirf ilzaam hain, wahan hum pattern likhenge, faisla nahi.**

Incentive equation

PARTY (high command):

Chahiye: seat, aur poore state mein zyada se zyada seats
Deti hai: ticket (288) + pad (unlimited)
Darr: galat candidate = seat gayi; aur naraz aadmi
= bagawat = seat gayi
Isliye: party har ticket ke saath naraz logon ka
"management plan" bhi banati hai

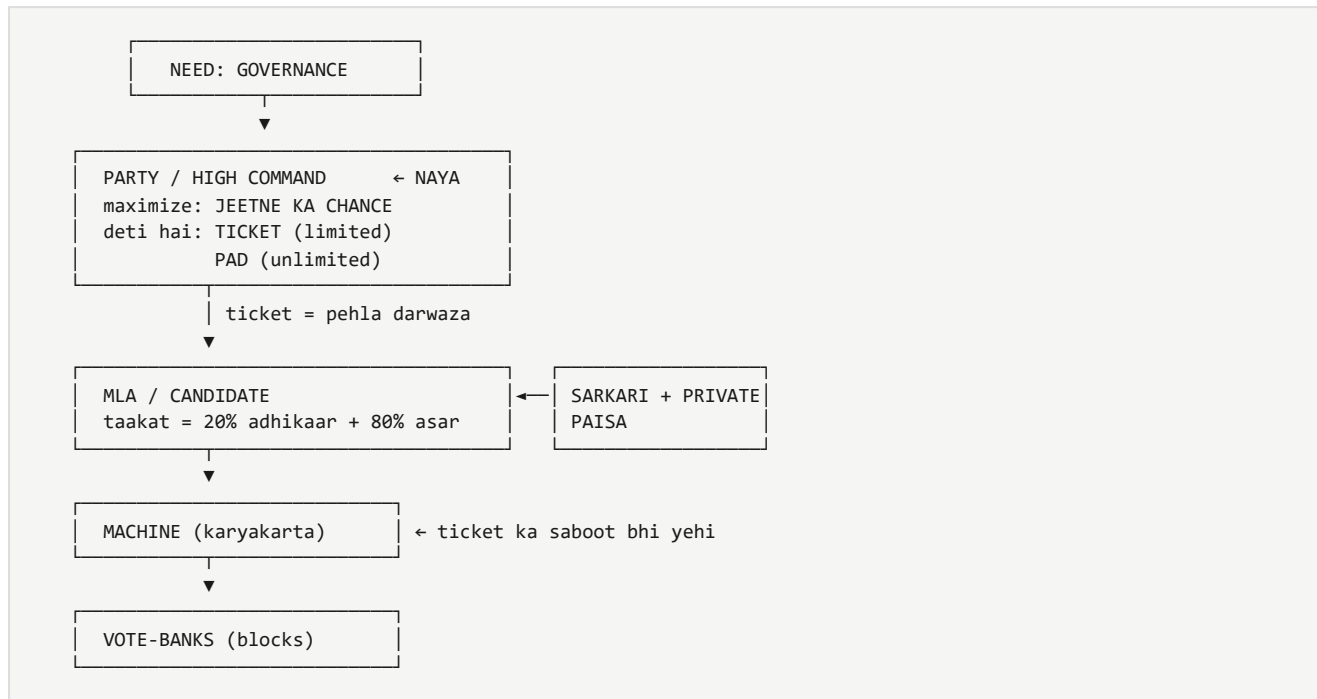

ASPIRANT:

Deta hai: 5 saal, apna paisa, apni machine banana
Chahta hai: ek naam ek list mein
Darr: 5 saal ki mehnat ek line se khatam ho jaye
Isliye: woh sirf kaam nahi karta — woh apna kaam
DIKHATA hai, kyunki dikhna hi uska
application form hai

MAUJOODA MLA (sitting):

Uska darr sabse alag hai: usko naye aspirants se
khatra hai jo uske hi ilaake mein bheed dikha rahe hain.
Isliye sitting MLA aksar apne hi party ke uparte hue
ladke ko rokne mein utni hi energy lagata hai jitni
virodhi dal par.

Master map — ticket ka darwaza juda

Ab machine dikhne lagi: **voter se pehle party aati hai**. Public ko lagta hai chain neech se upar chalti hai (voter → MLA). Asal mein ek darwaza upar se pehle khulta hai.

Baban ki kahani — part 7

Baban 34 ka hai. Ab woh "office ka ladka" nahi — corporator ke poore ward ka manager hai, aur do aur wardon mein uska naam chalta hai.

Us saal party ne nagar palika ke chunav se pehle naye chehre dhoondhne shuru kiye. Baban ka naam chala. Zila adhyaksh ne khud bulaya. Baban ne raat bhar neend nahi li.

List aayi. Uska naam nahi tha.

Ticket us aadmi ko mila jo 8 mahine pehle doosri party se aaya tha — ek thekedar, jiske paas do trucks, ek marriage hall, aur us ward mein 900 vote ka apna samuday tha.

Baban seedha zila adhyaksh ke paas gaya. Gussa nahi — sawaal.

"Mere paas 11 booth hain. Mere naam par 1,800 vote hilt hain. Usne toh 8 mahine pehle party join ki hai. Kyun?"

Adhyaksh ne panne palte aur bola: "Tere 1,800 vote **hamare hi** vote hain. Tu hamara aadmi hai, teri machine hamari machine hai — tu ticket na bhi le toh woh 1,800 hamein hi milenge. Uske 900 vote hamare nahi hain. Ticket dekar hum 900 KHARIDTE hain. Tere ko dekar hum 1,800 dobara nahi kharid sakte — woh already hamare hain."

Baban stunned reh gaya. Yeh sabse kroor, sabse saaf ganit tha jo usne kabhi suna tha.

Adhyaksh ne aage kaha: "Aur ek baat. Tu naraz hoke bagawat karega toh mujhe pata hai tu 1,800 le jayega aur hamara candidate haar jayega. Isliye main tujhe abhi ek pad de raha hoon — yuva morcha, nagar adhyaksh. Kaam kam, naam bada."

Baban ghar aaya. Register khola. Do line likhi:

Party wafadaari ka inaaam nahi deti. Party wafadaari ko GINTI mein hi nahi leti — kyunki wafadaar aadmi ka vote already uska hai. Party woh cheez khareedti hai jo abhi uski nahi hai.

Aur naraz aadmi ko party ticket se nahi, PAD se sambhalti hai. Ticket 288 hain. Pad hazaar. Isliye har ticket ke saath 4 pad bant-te hain.

Phir usne teesri line likhi, jo sabse zaroori thi:

Iska matlab yeh nahi ki wafadaari bekaar hai. Iska matlab yeh hai ki wafadaari KAAFI nahi hai. Jab tak main sirf "hamara aadmi" rahunga, mera ticket kabhi nahi aayega. Ticket us din aayega jis din mere paas kuch aisa hoga jo party ka NAHI hai — apna block, jo mere jaane se mere saath jaayega.

Us raat Baban ne yuva morcha ka pad le liya.

Aur usi raat se usne ek naya kaam shuru kiya, jo usne kisi ko nahi bataya: apne 11 booth ke logon se woh ab **party ke naam par** nahi, **apne naam par** milna shuru ho gaya. Chhoti si baat hai. Poori zindagi ka farak hai.

Self-test (pehle dimaag, phir check)

1. "Asli election ticket ka hota hai" — iska ganit kya hai?

Jawab: Ek party mein hazaaron serious aspirants, tickets sirf seats ke barabar (jaise 288), aur unme se aadhe se zyada pehle se bhare hue. Matlab candidate ka pehla aur sabse mushkil muqabla apni hi party ke logon se hota hai, virodhi party se nahi.

2. Party ticket dete waqt kya maximize karti hai, aur isse kaun sa "ajeeb" behavior explain hota hai?

Jawab: Sirf **jeetne ka chance**. Isliye party 20 saal ke wafadaar ka ticket kaat kar naye aaye hue aadmi ko de sakti hai — kyunki naya aadmi apne saath naya block laata hai. Ticket inaaam nahi, investment hai.

3. Aspirant saal bhar bheed aur hoarding kyun dikhata hai — kiske liye?

Jawab: Voter ke liye kam, **party ke liye zyada**. Woh apni machine ka size dikha raha hai, kyunki machine ticket ke faisle ka ek bada factor hai. Uska har kaam do audiences ke liye counted hota hai.

4. Ticket katne par 4 raaste kaunse, aur party naraz aadmi ko kaise sambhalti hai?

Jawab: Chup rehna, bagawat (independent lad kar apni hi party ko harana), doosri party mein jaana, ya andar se sabotage. Party sambhalti hai **pad** dekar — kyunki ticket limited hai lekin pad unlimited aur zero-cost hain.

5. Adhyaksh ne Baban ko ticket kyun nahi diya, uske 1,800 vote hone ke bawajood?

Jawab: Kyunki woh 1,800 already party ke the — Baban party ka aadmi tha, uska block party ke saath hi rehta. Ticket dekar party woh vote khareedti hai jo abhi uske paas NAHI hain (thekedaar ke 900). Wafadaar ka vote party ke liye "already booked" hota hai, isliye uski ginti nahi hoti.

What this means for you

Kisi bhi neta ko samajhna ho toh yeh mat poochho "yeh kitna popular hai." Yeh poochho: **"iska ticket kitna surakshit hai?"** Jo MLA ticket ko lekar nishchint hai, woh alag aadmi hai. Jo har saal apni hi party ke teen ladkon ko apne ilaake mein bheed jutate dekhta hai, woh dooba hua aadmi hai — aur woh us cheez ke liye sabse zyada khula hai jo usko party ke saamne mazboot dikhaye. Aur agar tum kabhi kisi aspirant se milo (jo abhi MLA nahi hai), toh yaad rakhna: uska asli customer voter nahi hai, **party ka woh kamra hai** — aur woh us kamre mein apna number badhane ke liye kuch bhi karega.

Structure verified: state assembly sizes vary (e.g. Maharashtra 288, UP 403); parties use internal and commissioned surveys in candidate selection; candidate lists are commonly released close to nomination deadlines; ticket-denial is a documented trigger for rebellion and defection. The "ticket rate"/money-for-ticket claim is alleged across parties and denied by them — treated here as reported pattern, not established fact. Baban fictional.

8. Campaign ka paisa aur machine — sabse bada loop

Woh sawaal jo poori kitab ka darwaza hai

Chapter 1 mein humne poocha tha, ab poora jawab denge:

MLA candidate ka LEGAL kharcha limit: Rs 28-40 lakh
(bade states mein 40)
MLA ki 5 saal ki total salary: roughly Rs 60 lakh
se 1.5 crore (state ke hisaab se)

Aur zameen par jo kharcha hota hai, uske baare mein har journalist, har consultant, har candidate ek hi baat kehta hai: woh limit se kai guna hota hai.
(Reported — is cheez ka koi audited number nahi ho sakta, kyunki jo limit se upar hai woh kaagaz par aata hi nahi.)

Toh sawaal: **agar koi aadmi apni 5 saal ki salary se zyada paisa ek election par laga raha hai, toh woh paisa wapas kahan se aata hai?**

Is chapter mein hum woh poora loop kholenge. Aur main ise seedha likhunga, kyunki jhaadu se dhakne se architecture samajh nahi aata.

Pehle: paisa jaata kahan hai

Campaign ka kharcha 4 buckets mein jaata hai. Public sirf pehla bucket dekhti hai.

Bucket 1 — DIKHNE WALA (~10-20%) Poster, banner, hoarding, jhande, gaadi par speaker, office ka tent, pamphlet, social media. Yeh sab bill wala kharcha hai, aur yehi mostly official return mein dikhaya jaata hai.

Bucket 2 — MACHINE KA KHARCHA (sabse bada, ~40-50%) Yeh chapter 5 ki pyramid ko 40 din chalane ka kharcha hai:

250-350 booth × 2-4 log per booth = 600-1,200 log
+ gaadi wale, khaana banane wale,
parchi baantne wale, bheed jutane wale = aur sekdon

Har aadmi ka roz ka: dihani + khaana + chai + petrol
(reported rates: Rs 300-2,000/din, kaam aur jagah ke hisaab se)

Chalo mota hisaab lagao: 800 log × Rs 700/din × 30 din = **Rs 1.68 crore**. Sirf logon ka. Sirf ek MLA seat ka. Aur limit Rs 40 lakh hai.

Ab tumhe apne aap samajh aa gaya hoga ki limit ka number aur zameen ka number kyun match nahi karte.

Bucket 3 — GAADI AUR LOGISTICS (~15-25%) Election ke dinon mein 50-200 gaadiyaan. Petrol, driver, rent. Election ke din voter ko ghar se booth tak laane ka poora operation.

Bucket 4 — SEEDHA VOTER TAK (contested, aur sabse chhupa) Yahan cash, sharaab, saree, bartan, "gaon ke mandir ko chanda", "bhandara" — sab aata hai. Yeh 100% undeclared hota hai. Iska size seat-to-seat itna alag hai ki koi average likhna imaandaari nahi hoga.

Ab asli sawaal: paisa aata kahan se hai

Char raaste. Pehle do legal, teesra grey, chautha kaala.

Rasta 1 — KHUD KA PAISA (legal)

Isliye candidates aksar businessmen hote hain — thekedar, builder, shikshan sanstha wale, sugar/cooperative wale, transport wale, doctor. Politics mein aane se pehle paisa banana normal hai, kyunki entry fee hai.

Yeh baat bahut important hai: **India mein garib aadmi ke liye MLA banna ka darwaza lagbhag band hai — chunav ke kharche ki wajah se.** Isliye assembly mein karodpati MLAs ka anupaat itna zyada hota hai (ADR jaisi sansthaayein har election ke baad yeh numbers publish karti hain).

Rasta 2 — PARTY KA PAISA (legal)

Party fund se seat ko paisa milta hai. Lekin har seat ko poora nahi milta — party apne "A-grade" seats par zyada lagati hai. Isliye chapter 7 wali baat: jo candidate apna kharcha khud utha sakta hai, woh party ke liye sasta hai.

Rasta 3 — SUPPORTERS AUR VYAPARI (grey)

Yahan chapter 4 ka builder wapas aa gaya, bas bade size mein.

KAUN DETA HAI	USKO KYA CHAHIYE
builder / developer	zameen, permission, zoning, file ka na rukna
thekedar	sarkari theke
sharab/mining/transport	licence, permit, route (yeh sab sarkari permission wale dhandhe hain)
shikshan sanstha / hospital	affiliation, land, approval
local vyapari	rojmarra ki suraksha – inspector, tax, licence

Dekho in sabme ek cheez common hai: **yeh sab woh dhandhe hain jinke andar sarkar ka haath hai.** Jis dhandhe ko sarkari permission chahiye, wahi dhandha politics ko funding karta hai. Yeh accident nahi hai — yeh system ka sabse seedha incentive hai.

Yeh paisa "chanda" ke roop mein bhi aata hai aur cash ke roop mein bhi. Legal route ke liye electoral bonds jaisi cheezein bani thi (Supreme Court ne 2024 mein unhe rad kar diya) — lekin bade paise ka ek hissa hamesha bina naam ke chalta raha hai.

Rasta 4 — KAALA PAISA (illegal, aur openly discussed)

Cash jo kisi kaagaz par nahi aata. Kahan se: upar wale rasta-3 walon se, ya candidate ke apne cash dhandhe se.

Main yahan kaise-karo nahi likh raha — sirf structure bata raha hoon, kyunki structure samjhe bina system samajh nahi aata:

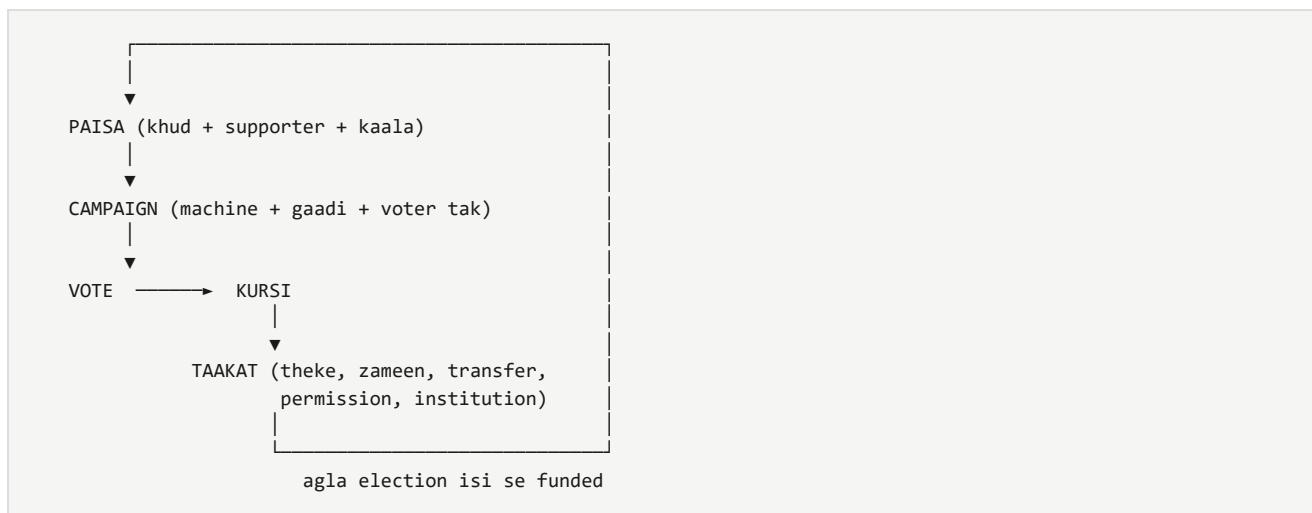

- Election ke waqt cash ki movement badh jaati hai, aur election commission ki flying squads har election mein karodon rupay pakadti hain. Jo pakda jaata hai woh chal rahe paise ka ek chhota hissa hai.
- Kharcha aksar "third party" ke through hota hai — samarthak ka mandal, koi trust, koi mitra — taaki candidate ke official return mein na aaye.

Ab loop band karo — return kahan se aata hai

Yeh chapter ka dil hai. Ek candidate Rs 2-5 crore lagata hai (reported range, seat ke hisaab se bahut alag). Woh wapas kaise nikalta hai?

INVESTMENT	RETURN (5 saal mein)
election ka kharcha →	1. THEKE sarkari kaam — sadak, building, supply. Apne aadmi ko dilao, ya khud partner raho. 2. ZAMEEN Sabse bada. MLA ko pehle pata hota hai: road kahan aayegi, zone kab badlega, project kahan lagega. Us information ka asli mol yeh hai ki tum us zameen ko pehle le sakte ho. 3. TRANSFER-POSTING KA ASAR Jahan officer ki posting par asar ho, wahan us department ka rojmarra ka lena-dena asar mein aa jaata hai. (Reported — poora chapter 16.) 4. PERMISSION KA DHANDHA Licence, NOC, permit — jinko chahiye woh rasta dhoondhte hain. 5. INSTITUTION College, hospital, cooperative, sugar mill. Yeh sabse safed aur sabse takatwar return hai — poora chapter 11 ispe hai.

Ab poora loop ek nazar mein:

Yeh loop poore Indian politics ka engine hai. Aur ab woh baat samjho jo is kitab ka sabse bada point hai:

Is loop mein koi villain nahi hai. Har player rational hai. Builder ko permission chahiye. Karyakarta ko dihani chahiye. Voter ko kaam chahiye. Candidate ko kursi chahiye. **Har aadmi apna sahi kaam kar raha hai, aur inka jod ek aisa system banata hai jo kisi ne design nahi kiya.**

Jab tak yeh loop chal raha hai, "imaandaar aadmi aage aaye" wali baat sirf ek ichha hai — kyunki imaandaar aadmi ke paas entry fee nahi hoti.

Booth machine — 40 din ka operation

Paisha ek taraf. Ab machine ka actual kaam dekho, kyunki paisha isi par sabse zyada jaata hai.

CAMPAIGN KA CALENDAR (mota-mota)

2 saal pehle se	aspirant apni machine banata hai, mayyat-shaadi ka attendance, chhote kaam
6 mahine pehle	survey, ticket ki lobbying (chapter 7), apni bheed dikhana
45 din pehle	ticket announce. Poora dhaancha activate: booth in-charge niyukt, voter list ka kaam, panna/page pramukh banana
30 din	daura shuru – gaon-gaon, mohalla-mohalla. Roz 8-15 gaon. Har jagah 15-20 minute. Kaam bolne ka nahi, DIKHNE ka.
15 din	bade neta ki sabha, bheed jutana (bheed ka apna kharcha hota hai – gaadi, khaana. Bheed vote nahi hai, bheed SIGNAL hai – "yeh jeet raha hai")
7 din	booth-wise micro-management. Kaunse ghar abhi tay nahi, kis mohalle mein jaana baaki
48 ghante	sabse important. Sab kuch band ho jaata hai officially. Zameen par sab kuch chalta hai.
Voting day	ek hi kaam: APNA VOTER GHAR SE NIKALO (chapter 9 poora ispe hai)

Dekho is calendar mein sabse lambi cheez kya hai — **2 saal pehle wali line**. Yeh chapter 6 ke Baban wala sabak hai: election ke din sirf ginti hoti hai us kaam ki jo pehle ho chuka hai.

EC ke rules aur unke gaps

Election Commission ke paas asli taakat hai — woh candidate ko nakaam kar sakta hai, chunav rad kar sakta hai. Aur woh sach mein kaam karta hai: aachaar sanhita lagti hai, gaadi rukti hai, cash pakda jaata hai.

Lekin do structural gaps hain, aur inko samajhna zaroori hai:

Gap 1 — Limit candidate par hai, PARTY par nahi. Candidate Rs 40 lakh se zyada nahi kharch kar sakta. Lekin **party apne prachar par jitna chahe kharch kar sakti hai** — bade neta ki rally, poore state ka vigation, helicopter. Woh candidate ke khaate mein nahi jaata.

Isliye ek badi party ka candidate aur ek chhoti party ka candidate — dono ki limit same hai, lekin unke peeche khada paisa bilkul alag hai.

Gap 2 — Jo kaagaz par nahi aaya, woh naapa nahi ja sakta. Har candidate kharche ka hisaab jama karta hai, aur woh hisaab lagbhag hamesha limit ke andar hota hai. Kyunki jo cash mein hua, woh hisaab mein aaya hi nahi.

Yeh EC ki nakami nahi hai — yeh ek structural cheez hai. **Koi bhi limit us paise ko nahi rok sakti jo kaagaz par exist hi nahi karta.**

Contested corner

Paisa jeet dilata hai ya jeetne wala paisa khinchta hai?

- **Camp A:** Paisa jeet dilata hai. Zyada paisa = zyada machine = zyada vote.
- **Camp B:** Ulta hai. Jo candidate jeetta hua dikhta hai, uske paas paisa apne aap aa jaata hai (supporter jeetne wale par lagate hain). Matlab paisa jeet ka **result** hai, kaaran nahi.

Sach mein dono chalte hain — ek doosre ko badhate hue. Lekin agar tumhe ek line chahiye: **paisa zaroori hai, kaafi nahi**. Bina paise ke ladna lagbhag namumkin hai; sirf paise se jeetna bhi lagbhag namumkin hai. Bahut saare bahut ameer candidate har election mein haarte hain.

Incentive equation

CANDIDATE:

Lagata hai: crores (reported), apne + doosron ke

Paata hai: kursi → theke, zameen, permission, institution

Darr: haar = poora paisa doob gaya AND agli baar funder nahi milega

Isliye: haarne ka darr sirf political nahi, FINANCIAL hai — aur isliye aakhri dino mein kuch bhi karne ki taiyari hoti hai

FUNDER (builder/thekedar/vyapari):

Lagata hai: paisa, aksar dono taraf thoda-thoda

Paata hai: 5 saal ki suraksha aur speed

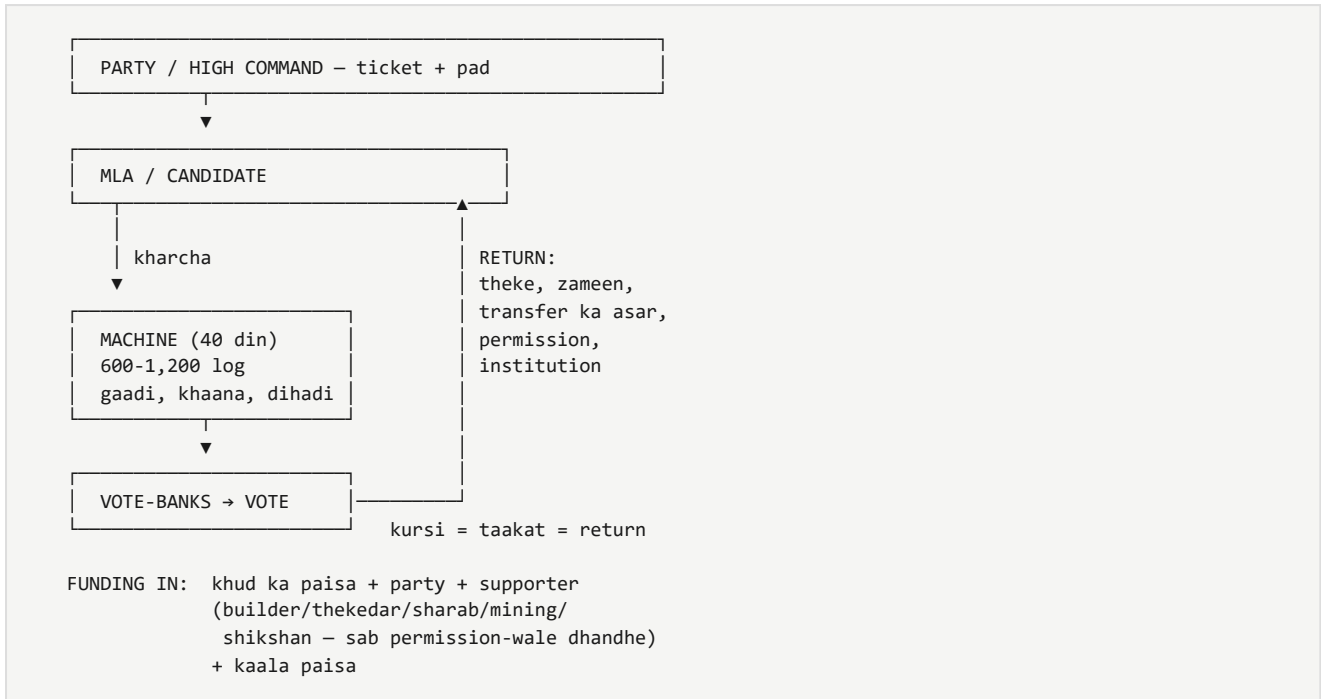

Darr: galat ghode par paisa laga diya

Isliye: bade funder aksar DONO taraf lagate hain — yeh political nahi, risk-management hai

KARYAKARTA (chapter 5 wala):

Election uska harvest season hai — 40 din mein kuch kamai bhi, aur poore 5 saal ka apna position bhi isi 40 din ke performance se tay hota hai

Master map — paisa ka loop juda

Ab poora circuit ban gaya. **Paisa andar aata hai, machine ban-ti hai, vote milta hai, kursi milti hai, taakat milti hai, aur taakat se phir paisa banta hai.** Baaki 13 chapters is circuit ke alag-alag hisse hain.

Baban ki kahani — part 8

Baban 37 ka. Yuva morcha ke pad ne usko zile bhar mein ghumaya. Ab teen vidhan sabha seats mein log usko naam se jaante hain.

Us saal party ne usko ek seat ka "chunav prabhari" banaya — matlab candidate nahi, lekin us seat ka poora operation uske haath mein.

Pehli baithak mein candidate ne (ek shikshan sanstha wala aadmi, paise wala) poocha: "Kitna lagega?"

Baban ne register khola aur poora hisaab rakh diya: itne booth, itne log, itne din, gaadi, khaana. Number bada tha.

Candidate ne kaha: "Kam karo."

Baban ne kaha: "Theek hai. Toh batao kaun se 60 booth chhod dein."

Candidate chup ho gaya. Phir bola: "Poora chahiye."

Us raat Baban ne register mein likha:

Har candidate pehle kharcha kam karna chahta hai. Phir usko dikhta hai ki kharcha kam karne ka matlab booth chhodna hai. Aur booth chhodne ka matlab haarna hai. Isliye har candidate aakhir mein poora paisa lagata hai — chahe woh kahin se bhi aaye.

Do hafte baad usne woh cheez dekhi jiska usne sirf naam suna tha.

Ek raat 11 baje candidate ke ghar ek gaadi aayi. Ek aadmi utra, andar gaya, 20 minute baad chala gaya. Candidate bahar aaya aur bola: "Ab paise ki chinta mat karo."

Baban ne poocha nahi ki kaun tha. Usko zaroorat nahi thi — us aadmi ki gaadi par ek construction company ka naam tha, aur us seat mein ek nayi ring road proposed thi.

Election hua. Unka candidate 11,000 vote se jeeta.

Teen mahine baad Baban gaya candidate se milne — ab MLA sahab. Baithak mein woh hi construction wala aadmi baitha tha, chai pee raha tha, bilkul aaram se.

Baban ne us raat register mein woh line likhi jisko woh apni poori zindagi ka sabse imaandaar vaakya maanta raha:

Election chunav ke din khatam nahi hota. Us din to sirf hisaab shuru hota hai. Jo paisa aaya tha, uska bill 5 saal mein chukta hai — theke se, zameen se, file se. Isliye MLA banne wala aadmi azaad nahi hota. Woh us din se ek KARZDAAR hota hai.

Aur uske neeche, chhota sa:

Aur karzdaar aadmi imaandaar nahi reh sakta. Yeh uski niyat ka sawaal nahi hai. Yeh uske khaate ka sawaal hai.

Self-test (pehle dimaag, phir check)

1. Legal limit Rs 40 lakh, machine ka hisaab crores mein. Yeh gap structurally kaise chalta hai?

Jawab: (a) Limit **candidate** par hai, **party** ke prachar par nahi — party unlimited kharch kar sakti hai. (b) Jo paisa cash mein chala, woh official return mein aata hi nahi, aur jo kaagaz par nahi hai use naapa nahi ja sakta. Isliye har return limit ke andar hota hai.

2. Campaign ka sabse bada kharcha kaunsa bucket hai, aur kyun?

Jawab: Machine — 600-1,200 logon ko 30-45 din chalana (dihadi + khaana + gaadi). Kyunki 250-350 booth par ek hi din, ek hi waqt logon ki zaroorat hai, aur booth chhodne ka matlab seedha vote chhodna hai.

3. Loop poora bolo: paisa kahan se aata hai aur wapas kaise nikalta hai?

Jawab: Aata hai: khud ka paisa + party + permission-wale dhandhon se (builder, thekedar, sharab/mining/transport, shikshan) + kaala paisa. Nikalta hai: theke, zameen ki advance information, transfer-posting ka asar, permission ka dhandha, aur institution. Kursi se taakat, taakat se paisa, paise se agla chunav.

4. Wahi dhandhe politics ko funding kyun karte hain — builder, mining, sharab, shikshan?

Jawab: Kyunki in sabme sarkar ka haath hai — inhe permission, licence, zameen, approval chahiye. Jis dhandhe ko sarkari permission chahiye, usko politics se rishta chahiye. Yeh system ka sabse seedha incentive hai, koi sazish nahi.

5. "Paisa jeet dilata hai" — dono camps aur imaandaar nateeja?

Jawab: Camp A: paisa → machine → vote. Camp B: jo jeetta dikhta hai uske paas paisa khud aa jaata hai, matlab paisa jeet ka result hai. Imaandaar nateeja: **paisa zaroori hai, kaafi nahi** — bina paise ladna namumkin, sirf paise se jeetna bhi namumkin (bahut ameer candidates har baar haarte hain).

What this means for you

Jab bhi kisi MLA se milo, ek sawaal apne dimaag mein rakhna (poochhna nahi): **"iska chunav kisne funded kiya?"** Uska jawab uske 5 saal ke behavior ka 50% explain kar dega — kis department mein woh dilchaspi leta hai, kis file ke peeche padta hai, kaun uske ghar bina register ke andar jaata hai. Aur doosri baat: MLA ka sabse bada dabav "public ki seva" nahi hai — woh apna **khaata** hai. Jo cheez uske khaate ko halka kare (kharcha bachaye, machine sasti chalaye, agli baar ka risk kam kare), woh uske liye seedha keemti hai.

Verified: MLA candidate expenditure ceilings are Rs 40 lakh (larger states) / Rs 28 lakh (smaller states) — drishtias.com; Lok Sabha ceilings Rs 95/75 lakh (2024) — outlookindia.com; the ECI itemises permitted campaign expenses in granular detail (Delhi 2025 example) — deccanherald.com; worker daily rates Rs 300-2,000 plus food/travel over 30-45 days, and ground ops taking ~40% of campaign budgets vs ~25% digital, are vendor-reported figures — campaignmitra.com. Party expenditure is not subject to the candidate ceiling. Electoral bonds were struck down by the Supreme Court in 2024. All "kai guna zyada kharcha", cash-flow and return-mechanism descriptions are reported patterns from journalism and practitioner accounts, not audited data. Baban fictional.

9. Election day — jab machine discharge hoti hai

Ek din, jisme 5 saal ki ginti hoti hai

Ab tak humne banaya: blocks (ch.2), machine (ch.5), ticket (ch.7), paisa (ch.8). Aaj woh din hai jab yeh sab ek saath, ek hi din, 12 ghante mein kaam mein aata hai.

Aur pehle ek galatfehmi todo. Election ke din **koi mind nahi badalta**.

Election ke din ka kaam:

- ✗ logon ko convince karna
- ✓ jo pehle se apna hai, usko GHAR SE NIKALNA

Yeh farak samajh lo toh poora din samajh aa jayega. Voting day persuasion ka din nahi, **logistics** ka din hai. Chapter 2 mein turnout ko hathiyar kaha tha — aaj woh hathiyar chalega.

Kyun? Simple ganit:

Maano tumhare pakke samarthak 80,000 hain.

Agar unme se 60% nikle → 48,000 vote

Agar unme se 75% nikle → 60,000 vote

Antar: 12,000 vote. Bina ek bhi aadmi ka mann badle.

Bahut saari seats 12,000 se kam ke antar par tay hoti hain. **Isliye election ka din turnout ka operation hai, opinion ka nahi.**

Din se pehle: 48 ghante ka silence

Voting se 48 ghante pehle prachar band ho jaata hai — officially. Sabha nahi, jaloos nahi, TV/radio par prachar nahi.

Aur zameen par ulta hota hai: **yeh 48 ghante sabse zyada kaam ke hote hain.**

Kya hota hai (reported):

- Ghar-ghar chupchaap sampark — bade jamawade nahi, chhoti tolis
- Parchi banti hai (voter slip) aur ghar-ghar pahunchti hai
- Mukhiyaon ke saath aakhri baithak — "kitne pakke?"
- Jahan cash/sharaab chalti hai, woh isi window mein chalti hai
- Baahar se aaye karyakarta seat chhodte hain (rule hai ki jo voter nahi hai woh seat mein nahi ruk sakta) — lekin sab nahi jaate
- Doosri taraf ke naraz logon se aakhri baat

Yeh prachar-band ka rule bekaar nahi hai — usne shor rok diya. Lekin usne **rishta** nahi roka, aur asli kaam rishte se hi hota hai.

Parchi — sabse chhoti, sabse taakatwar cheez

Voter slip. Ek kaagaz ka tukda jisme voter ka naam, booth number, aur serial number hota hai.

Yeh cheez do kaam karti hai, aur doosra wala non-obvious hai:

1. Practical: Voter ko pata chal jaata hai kis booth par jaana hai, uska number kya hai. Line mein waqt bachta hai.

2. Asli kaam — TRACKING: Parchi baantne wala aadmi janta hai kis ghar mein parchi gayi. Aur voting ke din woh check kar sakta hai ki us ghar se log nikle ya nahi.

Sarkar (EC) bhi apni official slip deti hai. Lekin party ki apni parchi alag hoti hai — party ke rang aur nishaan ke saath (rules ke andar rehkar). Aur uska asli maqsad voter ki madad nahi, **apne voter ki pehchaan** hai.

Voting ka din — ghante ke hisaab se

05:30	Booth par party ka table lagta hai (booth se nirdharit doori par, rule ke hisaab se). Har booth par 2-4 log: ek parchi ke liye, ek list ke liye, ek ghar bhejne ke liye.
06:00	Polling agent booth ke ANDAR baithta hai. Yeh alag aadmi hai aur yeh sabse zaroori aadmi hai (neeche poora section).
07:00	Voting shuru. Pehle do ghante mein aksar bujurg aur pakke samarthak aate hain.
09:00	Pehla hisaab. Har booth se number aata hai: "abhi tak kitne percent."
11:00	DOOSRA hisaab, aur yahan asli kaam shuru hota hai. Har booth ka aadmi apni list dekhta hai: kaunse PAKKE ghar se abhi tak koi nahi aaya. → gaadi bhejo, aadmi bhejo, phone karwao
13:00	Sabse dheema time. Dopahar mein log nahi nikalte. Machine ka poora zor isi waqt lagta hai.
15:00	Aakhri push. Jo ghar bache hain, unpar personally koi jaata hai — aksar wahi aadmi jiska us ghar se rishta hai.
17:00	Voting band. Booth ke bahar ka hisaab: "hamare kitne gaye."
18:00	Poore seat ka number jodna. Yahan se andaaza lagta hai — kaunse booth par turnout kam raha, kaunse mein zyada, aur kiska matlab kya hai.
Raat	Karyakartaon ka khaana. Ginti abhi baaki hai, lekin kaam khatam.

Dekho is poore din mein kya nahi hai: **koi bhashan nahi, koi convincing nahi, koi rally nahi**. Sirf list, gaadi, phone, aur ghar.

Polling agent — sabse underrated aadmi

Har booth ke andar har candidate ka ek agent baith sakta hai. Woh vote nahi daal sakta, prachar nahi kar sakta. Toh woh karta kya hai?

1. PEHCHAAN
Woh dekhta hai ki jo aadmi vote dene aaya hai, woh sach mein wahi hai. Farzi vote (kisi aur ke naam par vote dena) ko rokne ka pehla pehra yehi aadmi hai.
2. HISAAB
Woh andar baithkar note karta hai kaun-kaun aaya. Bahar wale ko live number milta rehta hai — is se pata chalta hai kaunse ghar bache hain.
3. GAWAAH
Agar kuch galat hota hai (machine, process, dhamki), woh likhit shikayat kar sakta hai. Uske bina koi record nahi banta.
4. MAUJOODGI KA DABAAB
Sabse bada kaam yehi hai. Jis booth par saamne wale ka koi aadmi nahi hai, wahan galat kaam ka darwaza khulta hai. Aur jis booth par dono taraf ke log baithe hain, wahan sab theek chalta hai.

Ab Baban ka chapter 6 wala sabak wapas dekho — 312 mein se 97 booth khali the. Iska matlab sirf itna nahi tha ki "vote kam padenge." Iska matlab yeh bhi tha ki **97 booth par unka koi aankh nahi thi.**

Aur ab ek line jo poori kitab mein sabse practical hai:

Booth ke andar ek aadmi baithane ke liye tumhe ek aisa aadmi chahiye jo (a) us gaon ka voter ho, (b) poora din free ho, (c) padha-likha ho ki likh sake, aur (d) tumhara itna apna ho ki bik na jaye. Aise 300 aadmi 40 din mein nahi milte. Woh 5 saal mein bante hain.

Yeh ek line hai jo poori machine ki zaroorat ko justify karti hai.

Counting day — alag jaanwar

Ginti alag din hoti hai, aur uska apna operation hota hai.

- Counting centre par har candidate ke counting agent baithte hain, har table par.
- Ginti ROUND mein hoti hai — har round mein kuch booths ki EVM. Isliye result dheere-dheere banta hai, aur har round ke baad pata chalta hai kaunse ilaake se kya mila.
- Yahan hi candidate ko booth-wise sach dikhta hai: kis mukhiya ne kaam kiya, kisne dhoka diya.

Aur yeh aakhri baat bahut important hai. **Counting sirf result nahi deti — woh 5 saal ke rishton ka report card deti hai.**

Jis mukhiya ne kaha tha "mere 400 vote pakke hain," uske booth ka number aa jaata hai. Agar wahan se sirf 150 mile, toh us aadmi ka bhaav agli baar gir jaata hai. Chapter 2 mein Tatya ke saath yehi hua tha, bas gaon ke level par.

Isliye counting ke baad jeet ya haar se pehle, har candidate ke office mein ek aur kaam hota hai: **booth-wise list nikal kar dekhna kaun sach bol raha tha.**

EVM aur VVPAT — sirf itna

Yeh sawaal har baar aata hai, toh chhota aur imaandaar jawab:

- Machine se voting hoti hai, aur VVPAT ek parchi dikhata hai jise voter dekh sakta hai; woh parchi ek box mein girti hai.
- Ilzaam lage hain, aur adaalat aur EC dono ne bar-bar review kiya hai; kuch VVPAT parchiyon ki ginti ka milaan bhi hota hai.
- **Is kitab ka position:** yeh ek contested public bahas hai, aur is kitab ka kaam machine samjhana hai, is bahas ko settle karna nahi.

Lekin ek architectural baat zaroor samjho, jo bahas se alag hai: **jo party booth par apne log nahi baitha sakti, woh kisi bhi system mein — kaagaz ya machine — kamzor rahegi.** Technology gawaah ki zaroorat khatam nahi karti.

Contested corner

48 ghante ka cash/sharaab kitna asar karta hai?

- **Camp A:** Decisive hai close seats mein. Aakhri raat mein jo baant deta hai, woh 2-5% ghuma leta hai.
- **Camp B:** Bahut kam. Log sabse le lete hain (dono taraf se), aur vote apne block ke hisaab se hi dete hain. Baantne wale ko lagta hai usne khareeda, asal mein usne sirf apna signal diya.

Chapter 2 mein bhi yeh aaya tha, aur jawab abhi bhi settle nahi hai. Practitioner log aksar beech ka kehte hain: **paisa apne pakke logon ko nikalne mein madad karta hai, doosre ke logon ko todne mein nahi.** Matlab woh turnout ka tool hai, persuasion ka nahi — jo is poore chapter ki theory se match karta hai.

Incentive equation

CANDIDATE:

Aaj woh kuch nahi kar sakta. Uska poora control khatam ho chuka hai. Isliye yeh uske liye sabse ghabrahat wala din hota hai – 2 saal ka kaam, crores ka paisa, aur aaj sirf DEKH sakta hai.

BOOTH PRAMUKH:

Aaj uska exam hai. Uska number counting ke din khulega. Agar uske booth se kam nikla, uski keemat gir gayi – chahe wajah kuch bhi ho.
Isliye: woh sach mein zor lagata hai, kisi ke kehne se nahi, apni izzat ke liye.

VOTER:

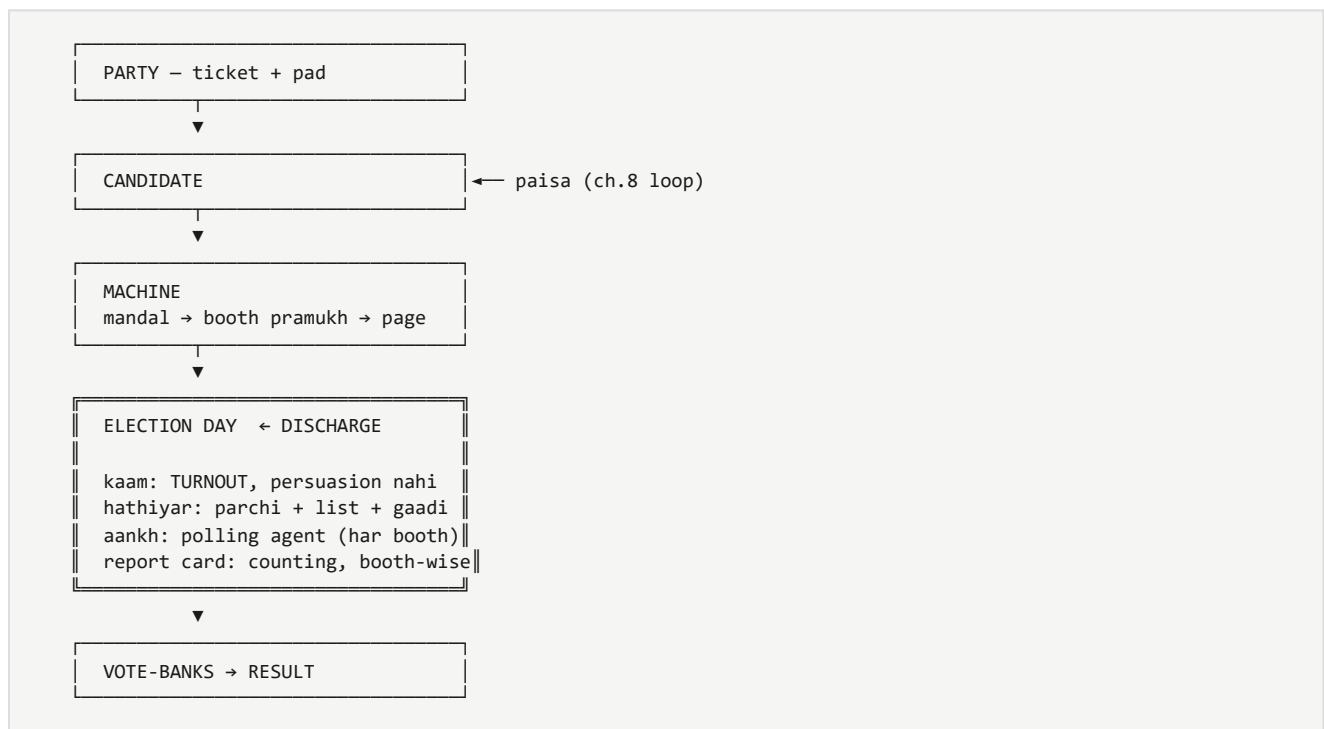

Aaj uski keemat sabse zyada hai – 5 saal mein ek din.
Isliye aaj uske ghar sab aayenge.
Kal se koi nahi aayega.

MUKHIYA:

Aaj uska daawa test ho raha hai. Usne jitne vote ka waada kiya, utne nikalne chahiye – warna uska bhaav gir jayega.

Woh aakhri box sabse zyada revealing hai. **Election ke din machine isliye nahi chalti ki candidate ne paisa diya. Woh isliye chalti hai ki har aadmi ka apna number us din publicly test ho raha hai.**

Master map — discharge point

Baban ki kahani — part 9

Baban 40 ka. Ab woh do zile mein "chunav ka aadmi" hai — jise party mushkil seat par bhejti hai.

Us saal usko ek seat mili jo party 3 baar se haar rahi thi. Candidate naya tha, paisa theek tha, machine kamzor.

Baban ne 45 din pehle poori seat ka naksha banaya: 289 booth. Har booth ke aage teen column — pichhli baar hamara vote, is baar ka andaaza, aur wahi purana column: **"aaj kaun sambhal raha hai."**

68 khaane khali the.

Candidate ne kaha: "Paise se bhar denge."

Baban ne is baar woh nahi kiya jo usne 29 ki umar mein kiya tha — chup nahi raha. Usne kaha: "Nahi. In 68 mein se 40 hum chhod denge. Baaki 28 par main apne purane log doosri seat se laoonga — woh un gaon ke rishtedaar hain."

Candidate bhadka: "40 booth chhod doge? Woh 20,000 vote hain!"

Baban ne kaha: "Woh 20,000 vote nahi hain. Wahan hamare pichhli baar ke vote 3,000 the. Agar main wahan kiraye ke log baithaunga toh woh log paisa lekar din bhar chai peeyenge aur shaam ko doosri taraf ko batayenge ki hamari haalat kya hai. **Khali booth se bura ek beimaan booth hai.** Woh 40 chhodo. Us paisa se main baaki 249 booth par gaadi badha dunga."

Candidate ne maan liya — mann se nahi, par maan liya.

Voting ke din 11 baje wala hisaab aaya. Baban ne apne 249 booth ki list dekhi aur 61 aise ghar-group nikale jahan se ek bhi vote nahi pada tha. Har ek par aadmi bheja. Do gaon mein gaadi kam padi toh usne apni khud ki gaadi bhej di aur khud 4 ghante ek chai ki tapri par baitha raha.

Result: unka candidate 2,300 vote se jeeta. Teen haar ke baad.

Counting ke din raat ko, jab sab jashn mana rahe the, Baban ne booth-wise list nikali aur do ghante akela baitha raha.

Usne dekha: jin 40 booth ko unhone chhoda tha, wahan unko 2,900 vote mile the — matlab pichhli baar jitne hi. **Chhodne se kuch nahi gaya.**

Aur woh 28 booth jahan usne doosri seat se apne purane log laaye the — wahan turnout aur unka vote dono baaki seat se zyada tha.

Register mein us raat ki line:

Chunav ke din tum vote nahi banate. Tum sirf apne bane hue vote ko GHAR SE BAHAR NIKALTE ho. Jo aadmi yeh samajh gaya, woh aadhe paise mein jeetta hai. Jo nahi samjha, woh dugna paisa lagakar bhi haarta hai — kyunki woh un logon par kharch karta hai jo kabhi uske the hi nahi.

Aur neeche, chhoti si:

Khali booth se bura ek beimaan booth hai. Yeh baat maine 20 saal mein seekhi, aur ab main isse kabhi nahi bhoolunga.

Self-test (pehle dimaag, phir check)

1. Election ke din ka asli kaam kya hai, aur uska ganit kya hai?

Jawab: Turnout — apne pakke voter ko ghar se nikalna, kisi ka mind badalna nahi. Ganit: 80,000 pakke samarthak par 60% vs 75% turnout ka antar 12,000 vote hai, bina ek bhi aadmi ka mann badle. Bahut si seats isse kam antar par tay hoti hain.

2. Parchi ka asli (non-obvious) kaam kya hai?

Jawab: Tracking. Jo aadmi parchi baantta hai woh jaanta hai kis ghar mein gayi, aur voting ke din check kar sakta hai ki us ghar se log nikle ya nahi. Voter ki suvidha upar ka kaam hai; **apne voter ki pehchaan aur ginti** asli kaam hai.

3. Polling agent ke 4 kaam, aur sabse bada kaunsa?

Jawab: Pehchaan (farzi vote rokna), hisaab (live turnout), gawaah (likhit shikayat), aur maujoodgi ka dabaav. Sabse bada chautha — jis booth par saamne wale ka koi nahi baitha, wahan galat kaam ka darwaza khulta hai.

4. Counting sirf result kyun nahi deti?

Jawab: Woh booth-wise report card deti hai. Jis mukhiya ne 400 vote ka daawa kiya tha, uske booth ka number khul jaata hai. Isse har rishte ka sach saamne aata hai aur agli baar ke liye har aadmi ka bhaav tay hota hai.

5. "Khali booth se bura ek beimaan booth hai" — kyun?

Jawab: Khali booth par tumhara vote utna hi aayega jitna waise bhi aata. Kiraye ka beimaan aadmi paisa bhi khata hai, kaam bhi nahi karta, aur upar se tumhari asli haalat (kitne pakke, kahan kamzor) doosri taraf pahuncha deta hai. Matlab nuksaan double — paisa gaya aur information bhi gayi.

What this means for you

Kisi bhi candidate ki asli taakat naapni ho toh ek hi sawaal poocho: **"tumhare kitne booth par apna aadmi hai?"** Yeh sawaal uski poori 5 saal ki mehnat ko ek number mein compress kar deta hai — aur is sawaal ka jawab dete hi uske chehre se pata chal jayega ki woh kis haalat mein hai. Aur yaad rakhna,

election ke aakhri hafte mein har candidate ki sabse badi tension ek hi hoti hai: **usko pata nahi hota ki uske apne log sach bol rahe hain ya nahi.** Woh andhera hi is machine ka sabse purana, sabse mehnga dard hai.

Structure verified: campaigning ends 48 hours before polling ("silence period"); polling agents may be appointed by candidates to sit inside booths; counting proceeds in rounds, giving booth-level breakdowns; EVMs are used with VVPAT, and VVPAT-slip verification of a sample of booths is part of the process. The 48-hour cash/liquor distribution, "beimaan booth" dynamics, and worker payments are reported practitioner patterns, not documented data. EVM integrity is a contested public debate; this book does not adjudicate it. Baban fictional.

10. Paanch saal — jab koi nahi dekh raha hota

Sabse lambi cheez, sabse kam padhi gayi

Chunav 40 din ka hota hai. Kitaabein, news, bahas — sab usi 40 din par hoti hain.

Lekin MLA ki zindagi ka **97% hissa** woh 5 saal hai jab koi chunav nahi hai. Aur agle chunav ka result usi 97% mein decide ho jaata hai.

Yeh chapter us 97% ke baare mein hai — machine ki **steady state**.

Subah — janta darbar

Har MLA ke ghar ke bahar subah ek queue hoti hai. Kahin usko "janta darbar" kehte hain, kahin bas "log aate hain."

KAUN AATA HAI (ek aam subah):

- 8-10 log sarkari kaagaz ke liye
(ration card, pension, ghar ki scheme,
certificate, naam list mein nahi aaya)
- 5-8 log police ka mamla
(FIR likhwana, ya FIR rukwana, ya
jamanat, ya jhagde ka settlement)
- 4-6 log transfer/posting
(master ka transfer, clerk ka transfer,
ya kisi ko rukwana)
- 3-5 log aspataal / admission
(bed, operation ka paisa, college ki seat)
- 2-4 log apne karyakarta
(unka apna kaam, ya kisi aur ke liye
sifarish)
- 1-2 log thekedaar / vyapari
(yeh queue mein nahi baithte — andar
jaate hain, ch.4 wali baat)

Ab dekho MLA in sab ka kya karta hai:

Kaam ka type	MLA kya karta hai
Chhota, aur uske department mein hai	ek phone. Ho jaata hai.
Chhota, lekin doosre ke ilaake mein	"dekhta hoon" — parchi par likhkar de dega, aur us parchi ka bhagya alag hai
Bada (transfer, tender, bada kaam)	yeh sirf tab hota hai jab MLA ruling party mein hai (chapter 6 wali table)
Namumkin	phir bhi SUNTA hai, poora sunta hai, aur "koshish karunga" bolta hai

Aur yahan is chapter ka pehla bada sach:

MLA sabka kaam nahi kar sakta. Woh 10 mein se shayad 3 ka kar paata hai. Lekin woh 10 ko SUNTA hai. Aur sunn-na hi asli product hai.

Chapter 4 mein corporator ne Baban ko yehi bola tha. Ab uska ganit dekho:

- Kaam karna **mehnga** hai — usme uska asar kharch hota hai (har phone ka ek "credit" lagta hai officer ke saath).
- Sunn-na **free** hai — sirf 3 minute lagte hain.
- Aur jo aadmi suna gaya, woh apne mohalle mein jaakar kehta hai "saheb ne poora suna, mere haath pakde." Chahe kaam na hua ho.

Isliye janta darbar ek **manufacturing plant** hai — jahan roz 40-50 units "sune jaane ka ehssaas" banti hain, aur uski cost lagbhag zero hai.

Parchi — MLA ka sabse chhota, sabse bada hathihaar

Woh chhoti si parchi jisme MLA likh deta hai "kripya uchit karyavahi karein" (please do the needful) aur dastakhat kar deta hai.

Yeh parchi ek order nahi hai. Officer ise phenk bhi sakta hai. Toh iska matlab kya?

Parchi teen cheezein karti hai:

1. AADMI KE LIYE

Usko lagta hai kaam shuru ho gaya. Uske haath mein ab kuch hai. Woh khush ghar jaata hai.
(Yeh parchi ka 70% kaam hai.)

2. OFFICER KE LIYE

Ek signal: "is aadmi ka MLA se sampark hai."
Officer ko ab tay karna hai ki is MLA ki kitni chalti hai. Agar ruling party ka hai → kaam ho jayega. Agar nahi → file dheere chalegi.

3. MLA KE LIYE

Record. Uske office mein parchi ki copy rehti hai.
Chunav ke waqt woh nikal sakta hai: "maine tumhare gaon ke 60 logon ke kaam kiye."

Ek chhote kaagaz se teen alag log teen alag cheez samajh rahe hain. **Yeh system ki sabse elegant cheez hai.**

Din bhar — maujoodgi ka kaam

Ab MLA ka din nikalta hai. Aur usme sabse zaroori kaam woh hai jo bahar se sabse bekaar lagta hai: **shaadi aur mayyat mein jaana.**

Ek baar main isko seedha likh doon:

Indian politics mein maujoodgi (attendance) ek kaam hai, sabse bada kaam. Aur mrityu par jaana sabse zaroori hai.

Kyun? Sochke dekho:

- Shaadi mein 500 log hote hain. MLA aaya, 10 minute ruka, sabne dekha. Cost: 10 minute. Reach: 500 log.
- Mayyat mein 100 log hote hain. Lekin us parivaar ke liye **woh din zindagi bhar yaad rehta hai.** Jo us din aaya, woh bhoola nahi jaata.

Aur sabse bada point: **dukh mein aaya hua aadmi, sukh mein aaye hue aadmi se 10 guna zyada yaad rehta hai.** Isliye purane neta kehte hain: "shaadi chhoot sakti hai, mayyat nahi."

Ganit banao:

Ek seat: 2-4 lakh log, maano 60,000 parivaar
Har saal, har 100 parivaar mein kuch mrityu aur kuch shaadi hoti hai — matlab saal bhar mein sekdon aise mauke.

MLA sab par nahi ja sakta. Toh woh kis par jaata hai?

- apne karyakartaon ke ghar (sabse pehle)
- mukhiyaon ke ghar (block ka rishta)
- bade blocks ke ghar
- aur jahan uska aadmi keh de "yeh zaroori hai"

Dekho — woh apne **machine ke logon** ko sabse pehle rakhta hai, aam voter ko nahi. Kyunki machine 300 booth chalati hai, aur ek naraz booth pramukh 500 vote hila deta hai. Chapter 5 wapas aa gaya.

Office aur PA — chhupa hua power centre

MLA ke office mein ek ya do log hote hain jo poora system chalate hain — PA (personal assistant), ya "saheb ka aadmi."

Yeh log kaagaz par kuch nahi hain. Practically woh **gate** hain:

PA decide karta hai (ya bahut asar daalta hai):

- kaun andar jayega, kaun 3 ghante baithega
- kaun sa phone MLA tak pahunchega
- kaun si parchi par sach mein follow-up hoga
- kaun sa aadmi "saheb ka aadmi" hai

Aur isliye politics mein ek purani baat hai: **MLA se milna aasan hai, uske PA se rishta banana mushkil hai — aur zyada zaroori.**

Yeh chhota sa gate poori kitab ka ek pattern hai: **jahan bhi demand supply se zyada hai, wahan ek gatekeeper paida ho jaata hai, aur us gatekeeper ki apni taakat ban jaati hai.**

Favor economy — asli currency

Ab is chapter ka sabse zaroori section. MLA ki duniya mein roz jo cheez chalti hai woh paisa nahi hai. Woh **ehsaan** hai.

FAVOR KA CHAKKAR:

MLA → officer : "yeh kaam kar do"
officer → MLA : "meri posting dekh lena"

MLA → aadmi : kaam kar diya
aadmi → MLA : uska block, uska vote, uski zubaan mein MLA ka naam

MLA → karyakarta: uske bhai ki naukri ki sifarish
karyakarta → MLA: 5 saal ki wafadaari, 300 vote

vyapari → MLA : chunav mein paisa
MLA → vyapari : file ka na rukna

In sab mein koi "transaction" nahi dikhti — koi receipt nahi, koi rate nahi. Lekin **har aadmi apna khaata mann mein rakhta hai**. Kisne kiske liye kya kiya, aur kiska udhaar baaki hai.

Aur yeh system paise se zyada takatwar hai, kyunki:

1. **Ehsaan par tax nahi lagta** aur koi record nahi banta.
2. **Ehsaan ka koi fix rate nahi** — isliye woh badta rehta hai. Ek chhota kaam bhi 10 saal ka rishta bana deta hai.

3. **Ehsaan lautaya nahi ja sakta poori tarah** — aur yehi uski taakat hai. Jo aadmi tumhara ehshaanmand hai, woh hamesha thoda sa tumhara rehta hai.

Isliye purana neta paisa lene se pehle **kaam karwata** hai. Paisa ek baar ka rishta hai. Ehsaan zindagi bhar ka.

MLALADS — chhota fund, bada signal

Har MLA ko apne kshetra ke chhote kaamon ke liye ek fund milta hai (MLALADS / MLA local area development). Amount har state mein alag hai.

Iske teen kaam hain:

1. **Chhote kaam ka rasta.** Ek gaon mein community hall, ek school mein computer, ek mandir ke paas paving — yeh cheezein iss fund se hoti hain.

2. **Signal.** Jis gaon mein yeh kaam hua, wahan patthar lagta hai MLA ke naam ka. Woh patthar 5 saal bolega.

3. **Distribution ka hathiyaar.** Aur yeh sabse important hai. MLA ko decide karna hota hai — kis gaon mein, kis mohalle mein, kiski sifarish par. Matlab yeh fund uske **blocks ko reward karne ka** tareeka hai.

Ab dhyan do: paisa MLA ke haath mein nahi aata — kaam administration ke through hota hai, MLA sirf suggest karta hai. Lekin **suggest karna hi taakat hai**, kyunki suggest karne wala decide karta hai kiske gaon mein kaam jayega.

Contested corner

Kya "kaam" se vote milta hai?

- **Camp A (performance):** Haan. Jo MLA sach mein sadak, paani, bijli laata hai, woh dobara jeetta hai. Voter ab performance dekhta hai.
- **Camp B (identity/machine):** Nahi. Bahut se kaam karne wale MLA haar jaate hain aur bahut se nikamme jeet jaate hain — kyunki asli cheez block, jaati, aur lehar hai.

Data dono taraf mila-jula hai (incumbents jeette bhi hain, harte bhi — states aur saalon ke hisaab se bahut variation hai). Sabse imaandaar version: **kaam ek zaroori base hai, lekin akela kaafi nahi. Kaam bina machine ke bekaar hai, aur machine bina kaam ke mehngi ho jaati hai.**

Incentive equation

MLA (5 saal ka):

Roz kharch karta hai: time (sabse scarce), asar
(har phone ka credit), aur
thoda paisa

Roz banata hai: ehsaan ka khaata

Darr: (1) ticket, (2) seat,
(3) sarkar – aur teenon ka
ilaaj ek hai: apna khaata
bhara rakho

Isliye: woh roz 40 log SUNTA hai
chahe 30 ka kaam na ho

OFFICER:

Deta hai: kaam (ya delay)

Chahta hai: achhi posting, aur MLA ka jhagda nahi

Darr: galat MLA se panga = transfer

Isliye: woh MLA ki "chalti kitni hai" naapta
rehta hai – ruling party ka hai ya nahi

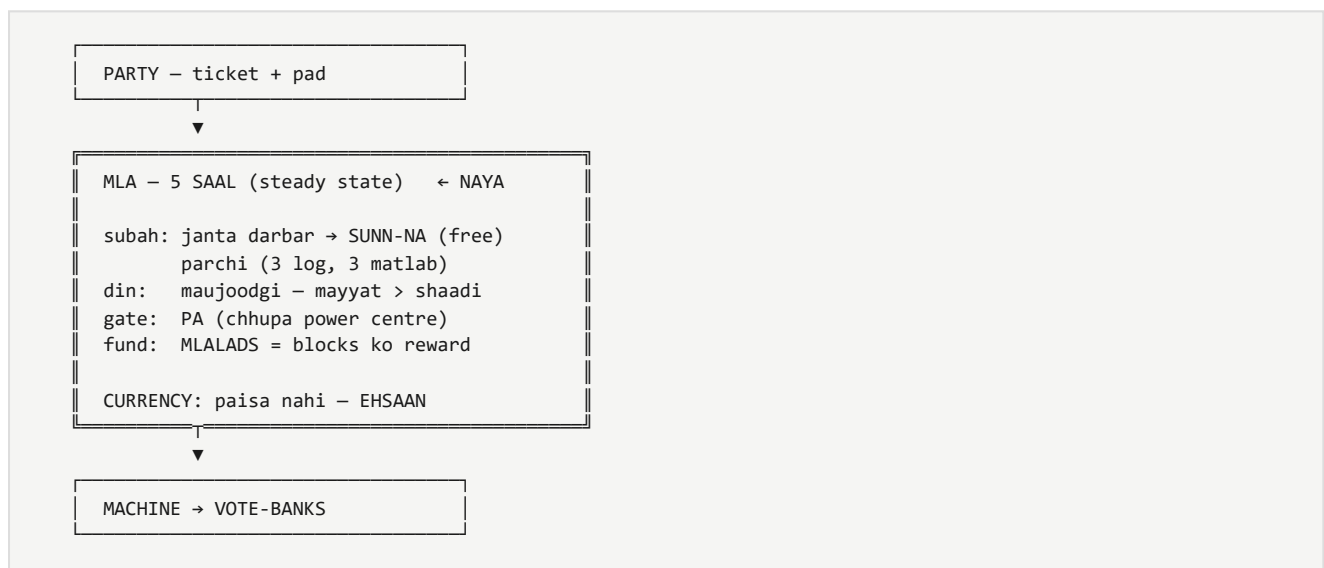

AAM AADMI:

Deta hai: vote, aur apna naam MLA ke khaate mein

Chahta hai: ek aadmi jiska phone uthta ho

Isliye: woh imaandaar-be-imaan nahi, PAHUNCH
dekhta hai

Master map — steady state juda

Baban ki kahani — part 10

Baban 43 ka. Ab woh ek MLA ka "sab kuch" hai — official title nahi, lekin poora office usi ke through chalta hai.

Ek subah janta darbar mein ek budhi aurat aayi. Uski pension do saal se nahi aa rahi thi. Kaagaz sab theek the. Baban ne dekha aur samajh gaya — yeh mamla tehsil mein ek clerk ke paas atka hai, aur woh clerk aise 200 mamle roke baitha hai.

Usne MLA se kaha: "Sahab, ek phone karo."

MLA ne kaha: "Kar dunga. Lekin us tehsil mein mera aadmi nahi hai. Woh phone ka koi mol nahi."

Baban ne kuch aur socha. Usne kaha: "Phir yeh karo — aap ek phone mat karo. Aap **teen** phone karo. Ek clerk ko, ek tehsildar ko, aur ek us clerk ke gaon ke sarpanch ko."

MLA hansa: "Sarpanch ko kyun?"

"Kyunki clerk us gaon ka hai. Tehsildar ka phone usko dara nahi payega — woh jaanta hai tehsildar 2 saal mein chala jayega. Lekin uske gaon ka sarpanch usko zindagi bhar milega."

Pension 11 din mein aa gayi.

Us shaam Baban register mein likhta hai:

Taakat sirf upar se neeche nahi chalti. Har aadmi ke upar koi na koi hota hai — aur woh aksar uska boss nahi hota. Officer ka boss usse transfer kar sakta hai. Uska gaon usko sharminda kar sakta hai. Doosri cheez zyada asar karti hai.

Do saal baad ek aur baat hui, jo usne kabhi nahi bhulai.

MLA ka sabse purana karyakarta — 22 saal se saath — uske bete ki mrityu ho gayi. MLA us din Mumbai mein tha, ek zaroori baithak mein, jahan uske constituency ke liye ek bada project pass hona tha.

MLA ne baithak chhod di aur 4 ghante gaadi chalakar mayyat mein pahuncha.

Baad mein Baban ne poocha: "Sahab, project ka kya?"

MLA ne kaha: "Project agli baithak mein bhi ho sakta hai. Aur agar nahi bhi hua, toh do saal baad ho jayega. **Lekin us aadmi ke bete ki mayyat dhabara nahi hogi. Aur woh aadmi mere 40 booth chalata hai. Main us din nahi gaya hota, toh woh 22 saal ek din mein khatam ho jaate.**"

Baban ne us raat register mein likha, aur yeh line usne baad mein doosron ko sikhayi bhi:

Politics mein sabse mehngi cheez woh nahi hai jo tum kharch karte ho. Sabse mehngi cheez woh hai jahan tum MAUJOOD nahi the. Paisa wapas aa jaata hai. Project wapas aa jaata hai. Woh din wapas nahi aata.

Aur uske neeche:

5 saal mein MLA jo kuch banata hai, woh sadak nahi hai. Woh EHSAAN KA KHAATA hai. Chunarv ke din woh khaata bhunaya jaata hai. Jiska khaata khali hai, uske paas kitna bhi paisa ho, woh haar jaata hai.

Self-test (pehle dimaag, phir check)

1. MLA 10 mein se 3 ka hi kaam kar paata hai. Phir bhi 10 ko sunta kyun hai?

Jawab: Kaam karna mehnga hai (uska asar/credit kharch hota hai), sunn-na free hai (3 minute). Aur suna gaya aadmi apne mohalle mein jaakar uska naam leta hai chahe kaam na ho. Janta darbar "sune jaane ka ehssaas" banane ka zero-cost plant hai.

2. Ek parchi ke teen alag matlab kya hain?

Jawab: Aadmi ke liye — "kaam shuru ho gaya" (uska 70% kaam yehi hai). Officer ke liye — signal ki is aadmi ka MLA se rishta hai, aur ab officer naapega ki us MLA ki chalti kitni hai. MLA ke liye — record, jo chunav mein dikhaya ja sakta hai.

3. Mayyat shaadi se zyada zaroori kyun hai?

Jawab: Shaadi mein reach zyada hai (500 log dekhte hain) lekin yaad kam rehti hai. Mayyat mein reach kam hai lekin us parivaar ke liye woh din zindagi bhar ka hai. Dukh mein aaya aadmi sukh mein aaye se kai guna zyada yaad rehta hai — aur MLA sabse pehle apni machine ke logon ki mayyat par jaata hai, aam voter ki nahi.

4. Ehsaan paise se zyada takatwar kyun hai?

Jawab: (a) Uspar tax nahi, record nahi. (b) Uska rate fix nahi, toh woh badhta rehta hai. (c) Woh poori tarah lautaya nahi ja sakta — isliye ehssaanmand aadmi hamesha thoda tumhara rehta hai. Paisa ek baar ka rishta hai, ehssaan zindagi bhar ka.

5. MLALADS ka teesra (asli) kaam kya hai?

Jawab: Blocks ko reward karna. Paisa MLA ke haath mein aata hi nahi (administration kaam karti hai), lekin **suggest karne ka adhikaar** hi taakat hai — kyunki woh decide karta hai kis gaon, kis mohalle mein kaam jayega. Fund chhota hai, distribution ka signal bada hai.

What this means for you

Kisi bhi MLA ke office mein jao toh do cheezein dekhna: **subah ki queue kitni lambi hai** (uski pahunch ka thermometer — lambi queue matlab log maante hain uski chalti hai), aur **PA kaun hai** (asli darwaza wahi hai). Aur agar tum us MLA ko kuch dena chahte ho jo uske liye sach mein keemti ho, toh yaad rakhna: uske paas paisa aa jaata hai, time nahi aata. Uska sabse bada roz ka dard yeh hai ki **usko yaad nahi rehta kisne kya maanga tha, kiska kaam hua, kiska nahi** — aur woh bhoolna hi uska khaata leak karta hai.

Structure verified: MLALADS exists in most states with state-specific annual amounts, is executed through district administration on MLA recommendation, and is not disbursed to the MLA directly. "Janta darbar"/public grievance mornings, MLA recommendation notes to officials, and PA gatekeeping are widely documented features of Indian constituency politics. The daily queue composition and all incentive descriptions here are illustrative patterns, not survey data. Incumbency-vs-performance evidence is genuinely mixed across states and years. Baban fictional.

11. MLA ka business model — college kyun kholte hain

Chapter 1 ka sawaal, ab poora jawab

Sabse pehle sawaal yaad karo: chhoti salary, badi taakat, crores ka kharcha. Chapter 8 mein humne loop dekha — kursi se theke, zameen, permission. Lekin woh sab **ek-baar-ka** paisa hai.

Ab asli sawaal: **ek neta APNI TAAKAT ko sthayi (permanent) kaise banata hai?**

Kyunki taakat nazuk hai. Chapter 6 yaad karo — 80% asar hai, adhikaar nahi. Aur asar us din khatam ho jaata hai jis din: - sarkar chali gayi, ya - ticket kat gaya, ya - seat haar gaye

Toh ek samajhdar neta kya karega? Woh apni taakat ko kisi aisi cheez mein **convert** karega jo kursi ke jaane par bhi na jaye.

Us cheez ka naam hai **institution** — sanstha.

Aur yehi wajah hai ki tumhare MLA ke paas ek college hai.

Sabse pehle: institution kaam kaise karta hai

Ek shikshan sanstha (education trust) lo. Bahar se: seva. Andar se, **political engine** ki tarah dekho:

EK COLLEGE / SANSTHA MLA KO KYA DETA HAI:

1. NAUKRI (sabse bada – machine ka fuel)
Ek college mein: professors, clerk, peon, driver, security, safai, canteen, hostel warden.
Ek achhe size ki sanstha mein 100-500 naukriyaan.

Ab chapter 5 wapas dekho. Karyakarta ko chahiye tha umeed, suraksha, pehchaan. Naukri teenon ek saath deti hai – permanent, uske BETE ke liye.

Aur ek naukri ek parivaar ko 20 saal ke liye bandh deti hai. Yeh sabse sasti aur sabse pakki loyalty hai jo paisa khareed sakta hai.
2. ADMISSION (ehsaan ka kaarkhana)
Har saal seats. Har seat ek parivaar ka ehsaan.
Aur admission ka season chunav se pehle bhi aata hai.
Chapter 10 wala ehsaan ka khaata – yeh uski factory hai.
3. BHEED (machine ka raw material)
Students, staff, unke parivaar. Rally mein bheed chahiye? Bus bhej do. Yeh bheed kiraye ki nahi hai – yeh "apni" hai, aur sasti hai.
4. IZZAT (sabse safed hissa)
"Sanstha ke adhyaksh" hona MLA hone se zyada respectable hai. Woh shiksha ka seva-bhaavi aadmi ban jaata hai, neta nahi.
5. PAISA (legal aur grey, dono)
Fees, grant, aur – yeh reported hai aur bar-bar ilzaam laga hai, khaas kar professional colleges mein – donation/capitation. Iske alawa building ke theke, supply, transport – sab apne logon ko.
6. ZAMEEN (sabse chhupa hua, sabse bada)
Shikshan sansthaon ko aksar sasti/riyayati sarkari zameen milti hai, ya kheti ki zameen ko sanstha ke naam par convert karwana aasan ho jaata hai.
Aur zameen – chapter 8 yaad hai – sabse bada long-term return hai.

Ab in 6 ko ek saath dekho. **Ek college ek machine hai jo naukri, ehsaan, bheed, izzat, paisa aur zameen — ek saath banati hai. Aur woh chunav haarne par band nahi hoti.**

Yeh sirf paisa kamane ka zariya nahi hai. **Yeh taakat ka permanent version hai.**

Isliye teen dhandhe baar-baar milte hain

Neta log har dhandhe mein nahi jaate. Woh un teen-chaar mein jaate hain jinme yeh property hoti hai:

DHANDHA	KYUN NETA LOG ISME HOTE HAIN
Shikshan sanstha (school/college)	naukri + admission + bheed + izzat + sasti zameen
Cooperative bank / credit society	gaon ke har kisaan ka isse kaam padta hai. Loan kisko mile, kiska maaf ho – yeh taakat rozana chalti hai. Aur iske chunav hote hain – matlab ek aur election jeetne ka mauka, chhota lekin pakka.
Sugar mill / cooperative	(Maharashtra, UP, Karnataka jaise ilaakon mein) Hazaaron kisaan supplier hain. Kab bhugtan hoga, kiska pehle – yeh taakat hai. Aur mill ke chunav se poora political base ban jaata hai.
Aspataal / trust	ilaaj, bed, ambulance – ehsaan ka sabse emotional roop
Dairy / mandi / transport union	roz ka lena-dena, roz ka rishta

In sabme ek common cheez dhoondho. Sab mein **bahut saare aam logon ka rozmarra ka lena-dena** hai. Yeh IT company ya factory nahi hai jahan 50 log kaam karte hain aur baaki duniya ko farak nahi padta.

Neta ka business woh hota hai jahan zyada se zyada logon ka roz ka kaam usse hokar guzre. Kyunki uska product paisa nahi hai — uska product rishta hai.

Cooperative — India ka sabse chhupa hua political school

Ek section iske liye alag se, kyunki bahar wale isko sabse kam samajhte hain.

Cooperative society (sahakari sanstha) — bank, sugar mill, dairy, credit society — ek aisi sanstha hai jiske **apne chunav hote hain**, jiske apne members hote hain, aur jiske paas asli paisa hota hai.

Ab dekho ek naujawan neta ke liye yeh kya hai:

1. Yeh ek CHHOTI VIDHAN SABHA hai
Yahan woh chunav ladna seekhta hai – blocks banana,
vote ginna, panel banana – lekin risk kam hai
aur paisa kam lagta hai.
2. Yeh ek READY-MADE BLOCK hai
Society ke 5,000 members = 5,000 parivaar jinka
isse kaam padta hai. Jo society chalata hai, uske
paas woh 5,000 pehle se hain.
3. Yeh PAISE ka rasta hai
Loan, khareed, bhugtan, theke – sab andar.
4. Yeh SEEDHI ka danda hai
Society ka chairman → zila bank ka director →
MLA ka ticket. Yeh raasta itna common hai ki
kuch ilaakon mein isko "normal career path"
samjha jaata hai.

Isliye jab tum kisi MLA ki biography padho aur usme likha ho "sahakari sanstha ke adhyaksh rahe" — woh ek chhoti line nahi hai. **Woh uski poori taakat ki jad hai.**

Zameen — sabse bada, sabse chhupa

Ab sabse honest section. Politics ka sabse bada wealth-creator theke nahi hain. **Zameen hai.**

Wajah simple hai — MLA ke paas ek cheez hoti hai jo market mein sabse mehngi hai: **pehle se pata hona.**

JO USKO PEHLE PATA HOTA HAI:

- road/highway kahan se nikalegi
- naya industrial area kahan aayega
- zone kab badlega (kheti → residential/commercial)
- koi bada project kahan lagega
- reservation/acquisition kis zameen par aayega

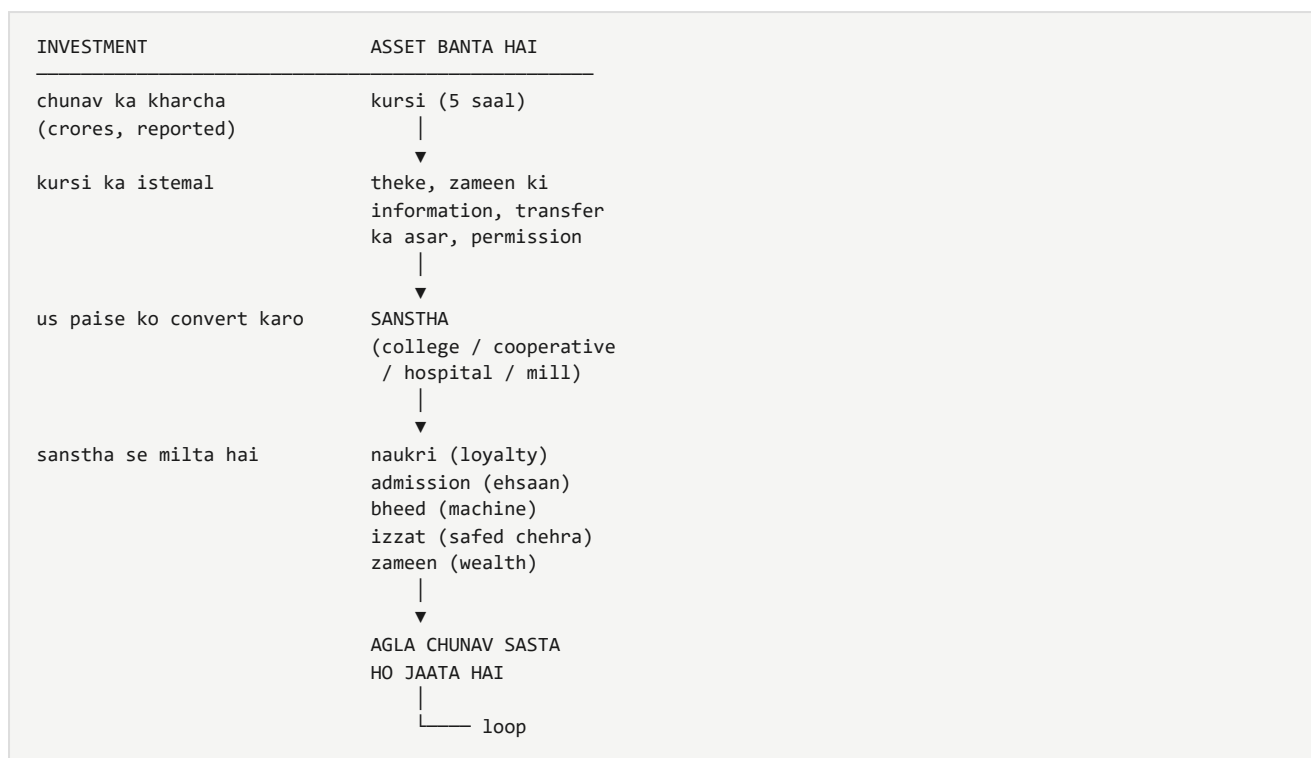

Aur zameen ka bhaav is ek information par 5x-50x tak badal sakta hai.

Yeh khareed apne naam par ho zaroori nahi — rishtedaar, trust, sanstha, ya kisi partner ke naam par ho sakti hai. Iske ilzaam har party ke netaon par lage hain, jaanch bhi hui hain, aur bahut mamle adaalat mein hain. *(Yeh reported pattern hai. Main kisi specific aadmi par ilzaam nahi laga raha — main mechanism bata raha hoon, kyunki mechanism samjhe bina system samajh nahi aata.)*

Aur ek structural baat samjho: **isko rokna bahut mushkil hai**, kyunki information leak hone ka koi sabooti nishaan nahi hota. Zameen legally khareedi gayi, paisa cheque se gaya, kaagaz saaf hai. Bas timing "achhi" thi.

Poora career P&L

Ab sab jodo. Ek successful MLA ka 15-20 saal ka hisaab:

Aur yahan poori kitab ka ek bada insight hai:

Pehla chunav sabse mehnga hota hai. Har agla chunav sasta hota jaata hai — kyunki tumhari machine ab tumhare institutions se apne aap chalti hai.

Isliye 3-4 baar ka MLA hataana itna mushkil hota hai. Woh sirf ek MLA nahi hai — woh ek **poora local economy** hai jisme sekdon parivaar ka rozgaar aur hazaaron ka lena-dena juda hua hai.

Aur yehi baat chapter 14 ka darwaza hai: **jab yeh sab ek parivaar ke naam par ho jaata hai, use dynasty kehte hain.**

Ab tumhare MLA ki taraf

Tumhare MLA ke paas ek college hai. Ab tumhe dikhna chahiye ki woh college kya hai:

Woh uska "side business" nahi hai.
Woh uska ASLI business hai, aur MLA-giri usko
chalane ka tareeka hai.

College se usko milta hai:

- staff aur unke parivaar ka pakka vote
- har saal admission ka ehsaan
- rally ki bheed
- "shiksha samrat" wali izzat
- aur ek base jo chunav haarne par bhi rehta hai

Aur ab ek aur cheez samjho, jo tumhare liye seedha kaam ki hai: **usne apne college mein tumhare career-app ka pilot kyun offer kiya?**

Uske hisaab se woh 3 cheezein khareed raha hai: 1. **Ehsaan ka naya source** — "hamare college ke bachchon ko naukri lagwai." 2. **Izzat/PR** — "modern, AI, placement" wali baat uske sanstha ki brand value badhati hai. 3. **Aur sabse bada** — agar sach mein 50 bachchon ki naukri lagi, toh woh 50 parivaar hain jo uska naam lenge. **Naukri lagwana Indian politics ka sabse taakatwar ehshan hai.**

Aur usne paisa kyun nahi offer kiya? Kyunki uske model mein **paisa dena zaroori hi nahi hai** — usne tumhe wahi diya jo woh sabko deta hai: mauka aur pahunch. Chapter 5 wapas dekho, jahan corporator ne Baban se kaha tha "paise nahi, **rasta** dunga."

Tumhare saath bilkul wahi hua jo Baban ke saath hua tha. Aur ab tumhe pata hai ki uske baad kya hota hai: woh rasta asli hota hai, lekin uski keemat tab hoti hai jab tum uspe apna kuch banao — kisi aur ka nahi.

Contested corner

Kya institution rakhna corruption hai?

- **Camp A:** Haan. Sarkari zameen sasti lena, apne logon ko naukri dena, admission bechna — yeh public resource ka private istemal hai.
- **Camp B:** Nahi. Bahut si sansthaayein sach mein achhi shiksha/ilaaj deti hain, aur un ilaakon mein kuch nahi tha jab tak in netaon ne nahi banaya. Sarkar wahan school nahi khol rahi thi.

Dono mein sach hai, aur yeh alag-alag sanstha par depend karta hai. **Is kitab ka position:** mechanism dono cases mein SAME hai — chahe niyat achhi ho ya buri, ek sanstha politically wahi kaam karti hai (naukri, ehshan, bheed, izzat). Isliye humein sanstha ko "achhi ya buri" se nahi, **function** se padhna chahiye.

Incentive equation

NETA:

Lagata hai: kursi ki taakat + chunav ka paisa
Banata hai: sanstha
Paata hai: permanent machine + wealth + izzat
Darr: kursi nazuk hai (ch.6) – isliye woh
taakat ko kisi aisi cheez mein badalna
chahta hai jo kursi ke bina bhi chale
Isliye: har purana neta institution banata hai –
yeh shauk nahi, INSURANCE hai

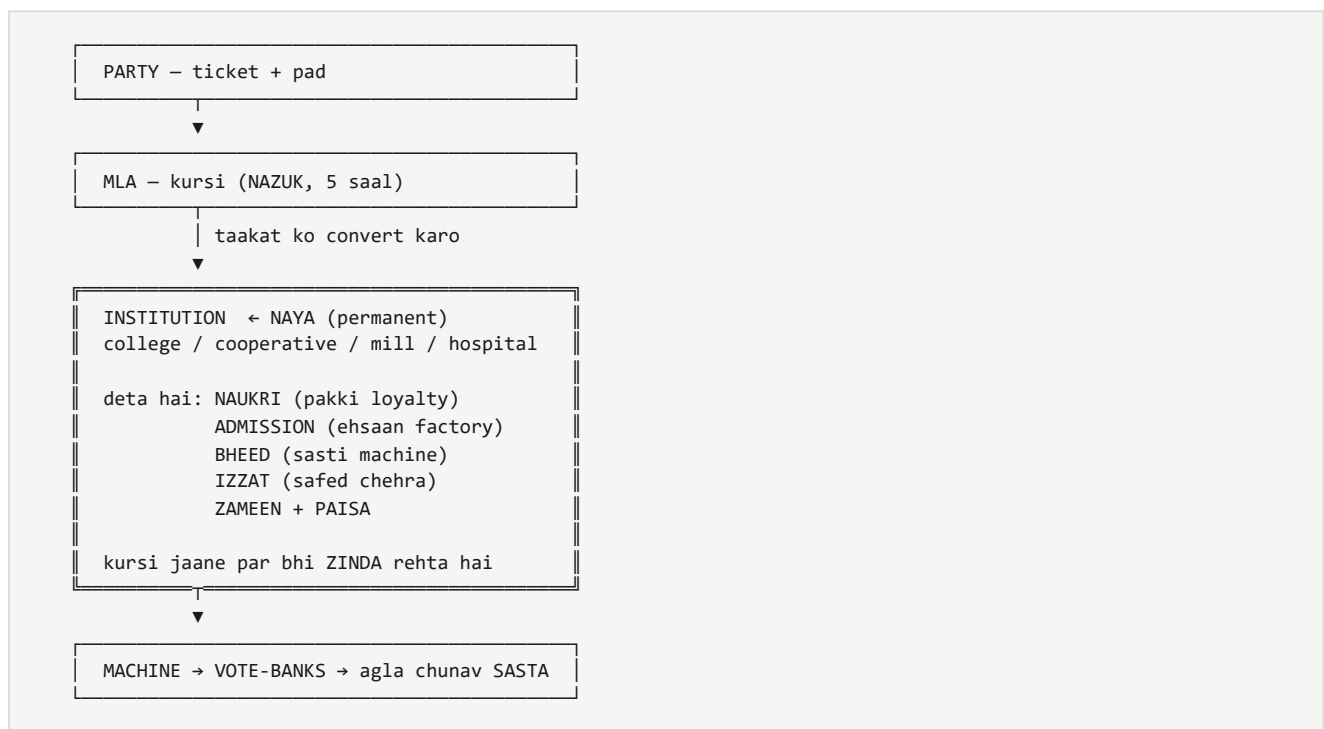

KARYAKARTA:

Chahta hai: naukri (apne ya bete ke liye)
Deta hai: 20 saal ki wafadaari
Isliye: ek permanent naukri politics mein sabse
mehngi cheez hai jo koi neta de sakta hai

AAM PARIVAAR:

Chahta hai: admission, ilaaj, loan
Deta hai: vote + ehshaan ka rishta
Isliye: unke liye MLA "neta" nahi hai – woh
unke bachche ke college ka maalik hai
(aur yeh rishta vote se gehra hai)

Master map — institution box

Yeh box poori kitab ka sabse zaroori structural addition hai. **Yahan tak system har 5 saal mein reset hota tha. Ab woh reset hona band ho gaya.**

Baban ki kahani — part 11

Baban 46 ka. Woh ab bhi kisi aur ka aadmi hai.

Us saal uske MLA ne ek engineering college shuru kiya. Trust bana, zameen mili — sarkari, riyayati rate par, "shiksha ke prayojan" ke liye. Building ka theka MLA ke saale ki company ko gaya.

Udghatan ke din 4,000 log the. Do mantri aaye. Akhbaar mein poore page ka photo.

Us raat MLA ne Baban ko bulaya aur kaha: "Ab bata, tujhe kya chahiye?"

Baban ne kaha: "Naukri chahiye. Mere ladke ke liye nahi — mere 40 karyakartaon ke ladkon ke liye. College mein clerk, driver, security, lab assistant. 40 naukri."

MLA hansa: "40 nahi, 22 de sakta hoon."

"22 chalega."

Ghar aakar Baban ne register mein woh line likhi jo uski poori zindagi ki sabse thandi calculation thi:

Maine aaj 22 naukri li. Iska matlab 22 parivaar 20 saal ke liye bandh gaye. Aur woh parivaar mere naam se bandhe hain, MLA ke naam se nahi — kyunki naukri MLA ne di, lekin SIFARISH maine ki. Log hamesha usko yaad rakhte hain jisne unka naam liya, usko nahi jisne dastakhat kiya.

Do saal baad Baban ne apna pehla kaam khud shuru kiya — ek chhota sa credit society, apne mohalle mein. Members: 600. Paisa kam, taakat kam.

MLA ne poocha: "Yeh chhoti si cheez kyun kar raha hai?"

Baban ne kaha: "Sahab, aapka college hai. Meri koi cheez nahi hai. Main 20 saal se aapki machine chala raha hoon. Machine achhi hai — lekin woh aapki hai."

MLA kuch der chup raha. Phir bola: "Samajhdar aadmi hai tu. Isiliye khatarnak bhi hai."

Us raat ki register entry — teen line, aur teeno is chapter ka nichod:

- 1. Har neta ka asli sawaal yeh nahi hai ki "main kitna kama raha hoon." Asli sawaal yeh hai: "kursi chali gayi toh mere paas kya bachega?"**
- 2. Jiske paas sanstha hai, uske paas kursi ke baad bhi machine hai. Jiske paas nahi hai, woh haarte hi khatam ho jaata hai — 6 mahine mein log uska phone uthana band kar dete hain.**
- 3. Aur isliye main aaj 46 saal ki umar mein ek chhoti si society se shuru kar raha hoon. Der ho gayi. Lekin na karne se der behtar hai.**

Self-test (pehle dimaag, phir check)

- 1. Neta institution kyun banata hai — ek line mein asli wajah?**

Jawab: Kursi nazuk hai (5 saal, aur taakat ka 80% sirf "asar" hai jo sarkar badalte hi khatam ho jaata hai). Institution taakat ka **permanent version** hai — woh chunav haarne par bhi naukri, ehstaan, bheed aur izzat deta rehta hai. Yeh shauk nahi, insurance hai.

2. College se neta ko 6 cheezein kya milti hain?

Jawab: Naukri (staff = pakki 20-saal loyalty), admission (har saal ehstaan ki factory), bheed (students/staff/parivaar = sasti rally), izzat (shiksha ka seva-bhaavi chehra), paisa (fees/grant/theke, aur reported donation), aur zameen (riyayati sarkari zameen + conversion).

3. Neta log sirf kuch hi dhandhon mein kyun jaate hain (college, cooperative, mill, hospital)?

Jawab: Kyunki in sabme **bahut saare aam logon ka rozmarra ka lena-dena** hai. Neta ka product paisa nahi, rishta hai — isliye woh dhandha chahiye jisse zyada se zyada parivaar roz guzarte hon. Ek factory jisme 50 log kaam karte hain, politically bekaar hai.

4. Zameen sabse bada return kyun hai, aur usko rokna mushkil kyun hai?

Jawab: Kyunki MLA ke paas **pehle se pata hona** hota hai — road, zone change, project, acquisition. Us information par bhaav 5x-50x badal sakta hai. Rokna mushkil hai kyunki khareed legal hoti hai, paisa cheque se, kaagaz saaf — sirf timing "achhi" hoti hai, aur information leak ka koi nishaan nahi banta.

5. "Pehla chunav sabse mehnga hota hai" — kyun, aur isse kya explain hota hai?

Jawab: Kyunki pehli baar machine kharidni padti hai. Baad mein institution woh machine apne aap chalata hai (naukri, ehstaan, bheed free mein aate hain). Isse explain hota hai ki 3-4 baar ka MLA hataana itna mushkil kyun hai — woh sirf neta nahi, ek local economy hai jisse sekdon parivaar ka rozgaar juda hai.

What this means for you

Kisi bhi neta ko 10 minute mein padhna ho toh yeh mat poochho ki uski party kya hai. Yeh poochho: **"iske paas kaun si sanstha hai?"** Uska jawab batayega uska base kahan hai, uska paisa kahan se aata hai, aur haar jaane par woh khatam hoga ya nahi.

Aur tumhare apne MLA ke liye, seedha: uska college uska business model hai, aur uska pilot offer usi model ka hissa tha — usne tumhe paisa nahi, **rasta** diya, kyunki uske system mein wahi currency hai. Woh galat nahi tha. Bas yaad rakhna ki us raste par tumhe apna kuch banana hoga, warna tum 20 saal baad Baban ki tarah 46 ki umar mein shuru karoge.

Structure verified: education trusts, cooperative banks, sugar cooperatives, dairies and hospital trusts are widely documented as political power bases in India, particularly in Maharashtra, UP, Karnataka and Gujarat; cooperative societies hold their own internal elections; educational institutions in many states receive concessional government land. Capitation/donation practice and land-information misuse are long-reported allegations, litigated in many cases, and are presented here as mechanism and pattern, not as accusation against any named individual. Baban fictional.

PART 3

The Party Game

12. High command aur gut — har MLA do zindagi jeeta hai

Ek aadmi, do chehre

Apne ilaake mein MLA raja hai. Log uske ghar ke bahar subah 7 baje se line lagate hain. Officer uska phone uthate hain. Uske aane par log khade ho jaate hain.

Wahi aadmi jab Mumbai ya Lucknow ya Delhi mein party ke daftar mein jaata hai, toh do ghante bahar baith sakta hai. Kisi PA ke phone ka intezaar kar sakta hai. Aur ek line se uska ticket kat sakta hai.

Neeche raja, upar naukhar. Yeh do zindagi ek saath jeena har MLA ki roz ki reality hai, aur uske aadhe se zyada "ajeeb" faisle isi se explain hote hain.

Chapter 7 mein humne dekha tha ki uska pehla darr party hai, voter nahi. Yeh chapter us darr ke andar jaata hai.

High command hai kya

"High command" ek shabd hai jiska matlab har party mein alag hai, lekin function ek hi hai: **woh kuch log jo ticket, pad, aur sarkar ke faisle karte hain.**

KIS TARAH KI PARTY	HIGH COMMAND ASAL MEIN KYA HAI
Rashtriya cadre-based	ek sangathan ka dhaancha — adhyaksh, sangathan mantri, sansadiya board. Vyakti se zyada DHAANCHHA faisla karta hai.
Parivaar-aadharit	ek parivaar, aur unke 3-5 bharosemand log. Faisla aksar ek kamre mein.
Kshetriya (regional)	aksar ek hi neta — jo party ka sansthapak hai. Party = woh aadmi. Uske baad kya hoga, yeh sabse bada sawaal hota hai.

Lekin har case mein ek baat same hai:

High command ke paas do cheezein hain jo MLA ke paas nahi hain: TICKET aur PAD. Aur MLA ke paas do cheezein hain jo high command ke paas nahi hain: ZAMEEN KA RISHTA aur MACHINE.

Yeh exchange hi poora rishta hai. Aur dono taraf ek doosre se darte hain — kyunki dono ek doosre ke bina adhoore hain.

Gut (faction) kyun bante hain — inevitable ganit

Ab sabse zaroori baat. Log samajhte hain factions "khaandaani dushmani" ya "ego" se bante hain. Nahi. Woh **ganit** se bante hain.

Chapter 7 ka number wapas lao:

Ek party mein serious aspirants: 1,500-4,000
Tickets: 288

Matlab: har ticket ke peeche 5-15 log line mein hain,
aur unme se sirf 1 ko milega.

Ab socho — us 5-15 logon ka asli dushman kaun hai? Doosri party ka candidate? **Nahi**. Doosri party ka aadmi unse ticket nahi cheenta. Unka ticket unki apni party ka aadmi cheenta hai.

Isliye har party ke andar competition doosri party se zyada tez hoti hai. Aur jab competition tez ho, toh log group bana lete hain — kyunki akela aadmi high command ke saamne kuch nahi hai, lekin 20 MLA ka group kuch hai.

FACTION KA BANNA:

akela MLA → ek line se ticket kat sakta hai
20 MLA ka group → high command ko sochna padega

Isliye faction banana MLA ke liye BEEMA (insurance) hai, gaddari nahi. Woh apne ticket ko safe kar raha hai.

Aur high command ko yeh pata hai. Isliye woh factions ko khatam nahi karta — **woh unhe balance karta hai**. Ek faction ko zyada taakat mili toh doosre ko thoda upar utha do. Yeh weakness nahi, technique hai:

Do kamzor gut ek majboot gut se behtar hain. Kyunki ek majboot gut kal tumhe replace kar sakta hai.

Faction bante kis cheez par hain

Alag-alag states mein alag-alag, lekin patterns yeh hain:

1. JAATI/SAMUDAY par
Ek samuday ke MLA ek saath. Sabse aam aur sabse takatwar. (Chapter 18 poora ispe hai.)
2. ILAAKA (region) par
State ke ek hisse ke log – kyunki unke mudde same hain (paani, industry, upeksha ka ehshaas).
3. KISI BADE NETA ke aas-paas
Ek senior neta jiske paas paisa/pahunch hai, uske aas-paas juniors jud jaate hain. Woh unko ticket dilwata hai, woh uska number badhate hain.
4. PEEDHI (generation) par
Purane vs naye. "Humne 30 saal diye" vs "ab naya khoon chahiye."

Faction ka rozana ka kaam

Faction sirf ticket ke waqt active nahi hota. Uska roz ka kaam hota hai:

- apne logon ke transfer/posting karwana (isliye har faction ka apna "apna" mantri chahiye)
- apne logon ko board/corporation ke pad dilana
- apne ilaake mein fund/project khinchna
- aur sabse zaroori: high command tak apni AWAAZ pahunchana – "hamare bina yeh state nahi chalega"

Aur yehi wajah hai ki **mantri pad itna keemti hai** — mantri sirf ek aadmi nahi hota, woh apne poore faction ka transfer-posting aur fund ka darwaza hota hai (chapter 16).

High command ka hathihaar

High command MLA ko control kaise karta hai? Uske paas 5 cheezein hain:

1. TICKET
Sabse bada. "Agli baar dekha jayega" – yeh ek line MLA ko 5 saal line mein rakhti hai.
2. PAD
Mantri, board chairman, corporation adhyaksh, morcha adhyaksh. Unlimited supply (ch.5, ch.7).
3. TRANSFER-POSTING KA ACCESS
MLA ka poora local asar isi par tika hai (ch.6). Agar CM ka office uska phone nahi uthata, toh uski seat mein uski keemat girne lagti hai.
4. PAISA / RESOURCE
Chunav ke waqt kis seat ko kitna milega.
5. JAANCH KA DAR
Yeh sabse kroor hathihaar hai, aur sabse contested (neeche).

Aur MLA ka hathiyaar

Doosri taraf khali nahi hai. MLA ke paas bhi hai:

1. MACHINE
High command ke paas vote nahi hain. Vote MLA ki machine mein hain (ch.5). Party badal sakti hai candidate, lekin uska block usi ke saath jaata hai – aur wahi asli sawaal hai.
2. GINTI (numbers)
Agar 20 MLA ek saath khade ho jaayein, toh sarkar hil sakti hai. Yeh chapter 13 ka poora subject hai.
3. SANSTHA
Jiske paas college/cooperative hai (ch.11), woh party ke bina bhi zinda reh sakta hai. Aur high command ko yeh pata hota hai – isliye aise aadmi se woh alag tareeke se baat karta hai.

Ab poora balance samjho:

Jitni bhaari MLA ki apni machine aur sanstha, utni kam high command ki pakad. Aur jitna zyada MLA party ke naam par jeeta hua hai, utni zyada pakad.

Isliye har MLA chupchaap ek hi kaam karta rehta hai: apne aap ko party ke naam se kam aur apne naam se zyada jeetne layak banana. Chapter 14 poora isi par hai.

Contested corner

Kya jaanch agencies political hathiyaar hain?

- **Camp A:** Haan. Aksar dekha gaya hai ki jaanch tab tez hoti hai jab koi neta virodhi dal mein hai, aur party badalne ke baad dheemi ho jaati hai. Iske aankde aur timelines par bahut likha gaya hai.
- **Camp B:** Nahi. Jaanch kanoon ke hisaab se chalti hai, aur agar bhrashtachar hua hai toh party badalne se woh mit nahi jaata. Timing ka ilzaam har vipaksh lagata hai — jab woh khud satta mein tha tab bhi wahi hota tha.

Is kitab ka position: yeh sabse garam, sabse contested bahas hai aur main ise settle nahi karunga. Lekin architecture ke liye itna zaroor samjho: **jab kisi cheez par shak hota hai ki woh hathiyaar hai, toh woh hathiyaar ki tarah KAAM karne lagti hai — kyunki log uske dar se pehle hi jhukne lagte hain.** Asli istemal ho ya na ho, dar ka asar asli hota hai.

Incentive equation

HIGH COMMAND:

Chahiye: seats, aur andar koi itna bada na ho
jaye ki khatra ban jaye
Deta hai: ticket, pad, access
Darr: bagawat, dal-badal, aur ek majboot gut
Isliye: woh factions ko todta nahi – BALANCE
karta hai. Do kamzor > ek majboot.

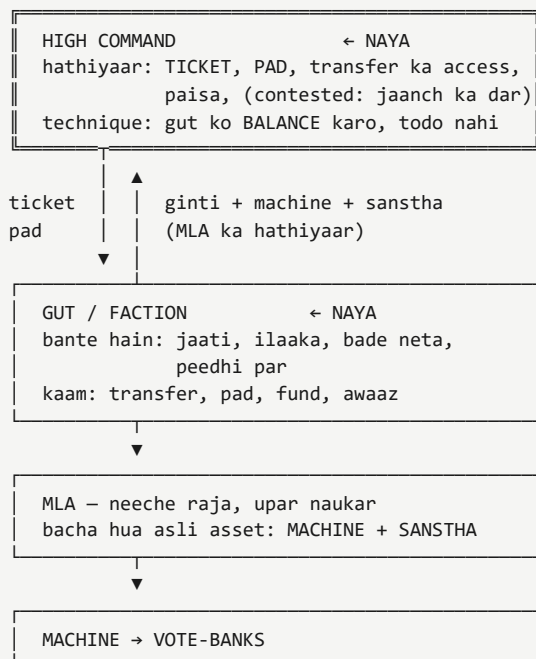

MLA:

Chahiye: ticket (survival), aur apne logon ke kaam
Deta hai: seat, aur assembly mein vote
Darr: akele pad jaana
Isliye: woh gut mein jaata hai – yeh beema hai,
gaddari nahi

GUT KA LEADER (senior neta):

Chahiye: apni ginti badhaana – ginti = bhaav
Deta hai: juniors ko ticket dilwana, unke kaam
Darr: uske log toot jayein
Isliye: woh apne logon ke liye ladta dikhta hai –
yeh uski poonji hai

Master map — upar ka floor khulta hai

Baban ki kahani — part 12

Baban 49 ka. Uski credit society ab 2,100 members ki hai. Uske 22 naukri wale parivaar ab 22 nahi, 60 hain (unke rishtedaar bhi jud gaye).

Us saal uska MLA — jiske saath woh 20 saal se tha — party ke andar ek badi ladai mein phans gaya. State mein do gut the: ek CM ke saath, ek ek senior mantri ke saath. Uske MLA senior mantri wale gut

mein the.

Faisla hua CM ke haq mein. Aur teen mahine mein Baban ne woh dekha jo usne kitaabon mein kabhi nahi padha:

- MLA ka phone mantriyon ke office mein uthna kam ho gaya
- uske ilaake ke do bade project "review" mein chale gaye
- uske ilaake ka tehsildar badal gaya – aur naya aadmi doosre gut ka tha
- uske do purane karyakarta dheere-dheere doosre gut ke ek naye ladke ke saath dikhne lage

Chhe mahine mein, bina koi announcement ke, uske MLA ki taakat aadhi ho gayi.

Baban ne ek raat MLA se poocha: "Sahab, aapko kya lagta hai, aapka ticket katega?"

MLA ne bahut thake hue kaha: "Ticket ka faisla us kamre mein hoga jahan mera koi nahi hai. Maine 20 saal seat par kaam kiya. Lekin maine 20 saal us KAMRE mein kaam nahi kiya."

Baban ne us raat register mein sabse important line likhi:

Har neta do jagah kaam karta hai — apni seat par, aur party ke kamre mein. Zyadatar log sirf pehli jagah kaam karte hain, kyunki wahan mehnat dikhti hai. Lekin ticket doosri jagah tay hota hai. Aur jo doosri jagah kaam nahi karta, uska 20 saal ka kaam ek line se mit jaata hai.

Aur neeche, ek aur baat jo usko us saal samajh aayi:

Gut ek galat cheez nahi hai. Akela MLA nanga hota hai. Lekin gut chunte waqt tum sirf aadmi nahi chunte — tum apna BHAVISHYA chunte ho. Aur agar tumhara gut haar gaya, toh tumhari seat par kiya hua kaam tumhe nahi bachayega.

Us saal ke aakhir mein Baban ne pehli baar apne dam par ek cheez ki, jo usne pehle kabhi nahi ki thi: woh khud state capital gaya, apni credit society ka ek programme lekar, aur teen naye logon se mila — dono guton se.

Register mein us raat:

Aaj se main sirf ek aadmi ka aadmi nahi rahunga. Main apni ginti alag banaunga. Kyunki jo aadmi kisi EK ke saath bandha hai, uska bhavishya usi ke bhavishya ke saath doobta hai — aur main 20 saal se doob raha tha, mujhe pata hi nahi tha.

Self-test (pehle dimaag, phir check)

1. "Neeche raja, upar naukhar" ka kya matlab, aur isse kya explain hota hai?

Jawab: Apne ilaake mein MLA ke paas asar aur izzat hai; party ke daftar mein woh line mein khada ek aadmi hai jiska ticket ek line se kat sakta hai. Isse explain hota hai ki uska pehla darr party ka hai (ch.7), aur woh apna itna time party ke andar politics mein kyun lagata hai.

2. Faction ganit se kyun bante hain, ego se nahi?

Jawab: Ek ticket ke peeche 5-15 apne hi log hain. Matlab asli competition apni party ke andar hai. Akela MLA high command ke saamne kamzor hai, 20 ka group nahi. Isliye gut banana **beema** hai — apne ticket ko safe karne ki koshish, gaddari nahi.

3. High command factions ko khatam kyun nahi karta?

Jawab: Kyunki do kamzor gut ek majboot gut se behtar hain. Ek majboot gut leadership ko replace kar sakta hai; do kamzor gut ek doosre ko rokne rehte hain aur dono ko high command ki zaroorat padti rehti hai. Balance karna technique hai, kamzori nahi.

4. High command ke 5 hathihaar aur MLA ke 3 hathihaar kya hain?

Jawab: High command: ticket, pad, transfer-posting ka access, paisa/resource, aur (contested) jaanch ka dar. MLA: apni machine (vote uske paas hain), ginti (20 MLA milkar sarkar hila sakte hain), aur sanstha (party ke bina bhi zinda rehne ka base).

5. Kaun sa MLA high command se sabse kam darta hai?

Jawab: Woh jiske paas apni machine aur apni sanstha hai, aur jo apne naam par jeetta hai — party ke naam par nahi. Uska block uske saath jaata hai, isliye party usse alag tareeke se baat karti hai. Isliye har MLA chupke se apne aap ko "party se bada" banane ki koshish karta rehta hai (ch.14).

What this means for you

Kisi MLA ke saath baat karte waqt ek baat kabhi mat bhoolna: **uske do bosses hain — uska voter aur uska high command — aur woh high command se zyada darta hai.** Isliye jo cheez usko party ke andar mazboot dikhaye (bheed, data, "mere paas yeh hai jo doosron ke paas nahi"), woh uske liye seedha keemti hai.

Aur agar tum kabhi kisi neta ko samajhna chaho ki woh abhi kis haalat mein hai, toh yeh poocho: **"woh kis gut mein hai, aur woh gut abhi upar hai ya neeche?"** Uska poora saal bhar ka behavior — kitna khula hai, kitna ghabraaya hua hai, kitna kharch karne ko tayyar hai — usi ek jawab se bandha hota hai.

Structure verified: Indian parties vary between cadre-based, family-led and regional-leader-led structures; ticket and post allocation is centralised in party leadership bodies in all major parties; factional balancing, ministerial control over transfers, and faction-based fund/posting patronage are widely documented in Indian state politics. The use of investigative agencies for political purposes is a live, contested public allegation, denied by governing parties and asserted by oppositions across eras — presented here as contested, not adjudicated. Baban fictional.

13. Dal-badal — jab system ka bhaav khulke lagta hai

Sabse imaandaar din

Politics mein sab kuch chhupa hua hota hai. Ticket ka faisla kamre mein, paisa cash mein, ehsaan bina receipt ke.

Lekin ek cheez aisi hai jahan sab kuch **khulke saamne aa jaata hai** — jab koi neta party badalta hai.

Us din pata chalta hai: - us aadmi ki asli keemat kya thi - uske saath kitne log the (aur kitne sirf naam ke the) - party ne usko kitna zaroori samjha - aur poore system mein wafadaari ka bhaav kya hai

Isliye dal-badal is kitab ka sabse important chapter hai. Yeh system ka X-ray hai.

Pehle: kanoon kya kehta hai

1985 mein anti-defection law aaya (52nd amendment, Tenth Schedule). Wajah: us waqt itna dal-badal ho raha tha ki sarkarein mahinon mein girti thi. Ek mashhoor kissa hai Haryana ke ek vidhayak ka jo ek hi din mein kai baar paala badal gaya — usi se "Aaya Ram Gaya Ram" muhavra chala.

Kanoon ne kya kiya:

AGAR EK MLA:

- apni party chhod deta hai, YA
- party ke whip ke khilaf vote deta hai

→ uski SADASYATA ja sakti hai
(faisla Speaker/Chairman karta hai)

CHHOOT (exception):

Agar party ke do-tihai (2/3) sadasya ek saath
doosri party mein MERGE ho jaayein, toh
sadasyata nahi jaati.

Ab dhyan se dekho. Kanoon ne dal-badal rok diya? **Nahi**. Kanoon ne dal-badal ka **format badal diya**.

PEHLE: ek-ek aadmi tootta tha (retail)
AB: poora group tootta hai (wholesale)

Yeh chapter 3 ka "sarpanch pati" wala sabak hai, bade level par: **rule ne behaviour ko roka nahi, usne behaviour ko ek naya raasta pakadne par majboor kar diya.**

Aur is ek baat se 2/3 wali ginti poore Indian politics ka sabse important number ban gayi. Har toot-phoot ki khabar mein tum yeh ginti dekhoge — "itne MLA saath hain, do-tihai poore hue ya nahi."

Doosra raasta: istifa aur dobara chunav

Ek aur tareeka hai jo kanoon ke andar hai: **MLA istifa de de**.

Sadasyata khud chhod di, toh ayogya (disqualify) hone ka sawaal hi nahi. Phir woh doosri party se **upchunav (by-election)** lad leta hai.

Iska matlab kya hai: - Woh apni seat par apna daawa test kar raha hai - Naya party usko ticket deti hai (yehi deal ka hissa hai) - Aur aksar mantri pad bhi

Karnataka 2019 mein aisa hi hua tha — kai MLAs ne istifa diya, sarkar gir gayi, phir upchunav hue. Yeh raasta mehnga hai (dobara chunav ladna padta hai) lekin legally saaf hai.

Ab asli sawaal: neta party badalta kyun hai

Log samajhte hain "lalach". Yeh aadha sach hai aur poora bekaar explanation hai. Asli wajah **chapter 6 ki table** hai. Wapas dekho:

	RULING PARTY MLA	VIRODHI DAL MLA
Phone uthta hai	haan	aksar nahi
Transfer mein baat	chalti hai	nahi chalti
Fund ka kaam	theek chalta hai	atakta hai
Karyakarta	saath hain	khiskte hain
Agli baar jeetne	achha	mushkil

Ab is table ko 5 saal chalao. Virodhi dal ke MLA ke saath kya hota hai:

Saal 1:	"koi baat nahi, 5 saal baad wapas aayenge"
Saal 2:	uske do kaam atak gaye. Log kehne lage "in se kaam nahi hota"
Saal 3:	uska ek booth pramukh ruling party ke ladke ke saath dikha. Kyun? Kyunki us ladke se uska kaam ho gaya (ch.5 – karyakarta ko suraksha chahiye)
Saal 4:	uski sanstha (agar hai) par jaanch/audit ka dabav. Uske thekedaar doosri taraf.
Saal 5:	ticket toh mil jayega, lekin machine aadhi reh gayi hai

Matlab virodhi dal mein rehna sirf 5 saal ka nuksaan nahi hai — woh compounding decay hai. Har saal uski machine thodi aur ghisti hai.

Toh ab dal-badal ko dobara dekho:

Neta party isliye nahi badalta ki usko paisa mil gaya. Woh isliye badalta hai ki usko dikh raha hai ki agar woh nahi badla, toh 5 saal mein uske paas machine hi nahi bachegi — aur machine ke bina woh phir kabhi wapas nahi aa payega.

Yeh **survival** ka faisla hai, lalach ka nahi. (Lalach bhi hota hai. Lekin lalach akela itne logon ko ek saath nahi hilata.)

Dal-badal ke 5 trigger

Zameen par yeh cheezein toot ka switch dabati hain:

1. TICKET KATNA (sabse bada)
Chapter 7 yaad hai – list aane ke 24-48 ghante mein sabse zyada toot hoti hai. Aadmi ke paas time nahi hota, aur uski poori machine bekar ho jayegi agar woh nahi lada.
2. SARKAR BANNEN KA GANIT
Jab result hung ho – kisi ko poori bahumat na mile – tab har MLA ki keemat achanak 10x ho jaati hai. Kyunki 5-10 log sarkar bana ya gira sakte hain.
3. GUT KA HAARNA (ch.12)
Uska senior neta party ke andar haar gaya. Ab uska koi bolne wala nahi. Woh phansa hua hai.
4. LAMBI VIRODH KI HAALAT
Upar wali decay. Do-teen term virodhi dal mein nikal gaye, ab machine bachani hai.
5. JAANCH KA DABAV (contested – ch.12)
Ilzaam yeh hai ki jaanch ka dar aadmi ko todta hai. Yeh sabse contested wajah hai aur ise proof ki tarah mat lo.

Resort politics – ek ajeeb, aur bilkul logical cheez

Jab sarkar hung ho ya toot ka khatra ho, toh MLAs ko bus mein bithakar kisi resort ya hotel mein le jaaya jaata hai – dusre state mein, phone band, media door.

Bahar se yeh comedy lagti hai. Andar se yeh **bilkul rational** hai:

KYUN LE JAATE HAIN:

1. Doosri taraf ka offer MLA tak pahunch na paye
2. MLA apne hi logon (aur parivaar) ke dabav se door rahe – kyunki uske ilaake ke thekedaar aur karyakarta bhi usse kehte hain "udhar chalo, kaam hoga"
3. Ginti pakki rahe – roz subah ginti hoti hai
4. Aur sabse zaroori: DIKHANA ki hamare paas ginti hai. Media ko photo chahiye – 45 MLA ek saath. Woh photo hi bargaining power hai

Yeh chapter 2 ka block-ganit hai, sabse upar ke level par. **MLA khud ab ek "vote" ban gaya hai, aur unhe ek block ki tarah sambhala ja raha hai.** Wahi mukhiya-wali baat, bas ab mukhiya ek senior neta hai aur block MLAs ka hai.

Deal mein kya milta hai

Jab koi group tootna hai, toh negotiation mein yeh cheezein hoti hain (yeh khulke bhi hoti hain aur chhupke bhi):

KHULA (announce hota hai):

- mantri pad
- board/corporation ka chairman-ship
- agle chunav ka ticket (likhit nahi, lekin yeh sabse zaroori shart hai)
- unke gut ke logon ke liye bhi tickets

CHHUPA (reported, aur aksar ilzaam):

- paisa
- jaanch ka "settle" hona
- unke ilaake ke theke aur transfer par control

Aur ek cheez jo sabse kam samjhi jaati hai lekin sabse zaroori hai: **naye aane wale ko woh cheez chahiye jo uski machine ko zinda rakhe.** Matlab uske apne logon ke kaam. Agar uske 300 karyakartaon ke kaam nahi hue, toh 6 mahine mein uske log usse chhod denge — aur phir woh nayi party ke liye bhi bekaar hai.

Purani party ka nuksaan — do tarah ka

Jab koi bada neta tootta hai:

1. TURANT: ginti kam ho gayi. Sarkar ka khatra.

2. DHEERE (zyada bada): uske saath uski MACHINE jaati hai. 300 booth ke log, 40 mukhiya, uski sanstha ka poora network.

Party ke paas us seat par ab kuch nahi bacha — sirf jhanda bacha. Aur jhanda vote nahi deta.

Isliye party ka pehla kaam toot ke baad yeh hota hai: **uske gut ke doosre-teesre level ke logon ko rok lo.** Unko pad do, ticket ka waada do. Kyunki agar machine ruk gayi, toh neta akela chala gaya — aur akela neta doosri party mein utna keemti nahi hai.

Yahan poori kitab ka ek important sach hai:

Neta ki keemat uske naam mein nahi, uske SAATH AANE WALON mein hoti hai. Jo neta akela tootta hai, uska bhaav aadha ho jaata hai — aur nayi party usko do saal mein bhool jaati hai.

Contested corner

Kya anti-defection law kaam kar raha hai?

- **Camp A (kaam kar raha hai):** Roz-roz ki toot band ho gayi. Ab ek aadmi apni marzi se nahi tod sakta — usko 2/3 chahiye, ya istifa dena padega. Sarkarein pehle se zyada sthir hain.
- **Camp B (fail ho gaya):** Isne dal-badal ko roka nahi, sirf mehnga aur bada kar diya — ab poora group tootta hai. Aur upar se isne MLA ko party ka gulaam bana diya: ab woh apne kshetra ke hisaab

se vote nahi kar sakta, whip ke hisaab se karna padta hai. Matlab isne loktantra ko party ke andar khatam kar diya.

Ek aur contested cheez: Speaker ka role. Ayogya ghoshit karne ka faisla Speaker karta hai — jo khud ek party ka aadmi hota hai. Ilzaam lagta hai ki Speaker faisla mahinon-saalon tak latka dete hain, jab tak sarkar ka ganit set na ho jaye. Adalaton ne bhi kai baar is der par tippani ki hai. Iska koi saaf structural samadhan abhi tak nahi nikla.

Incentive equation

TOOTNE WALA MLA:

Deta hai: apni party, apni "wafadaar" wali image
Paata hai: mantri pad / ticket / apne logon ke kaam
/ machine ka bachav
Darr: (a) machine ka dheere-dheere marna
(b) toota lekin akela — toh bhaav aadha
Isliye: woh AKELA nahi todta. Woh pehle apne
logon ko ginta hai. Ginti hi uska bhaav hai.

LENE WALI PARTY:

Deti hai: pad, ticket, kaam
Paati hai: ginti (sarkar), aur ek ready-made machine
Darr: aane wala 6 mahine mein bekar ho jaye
(agar uske log saath nahi aaye)
Isliye: woh sirf aadmi nahi kharidti — woh uske
SAATH AANE WALON ko ginti hai

CHHODI GAYI PARTY:

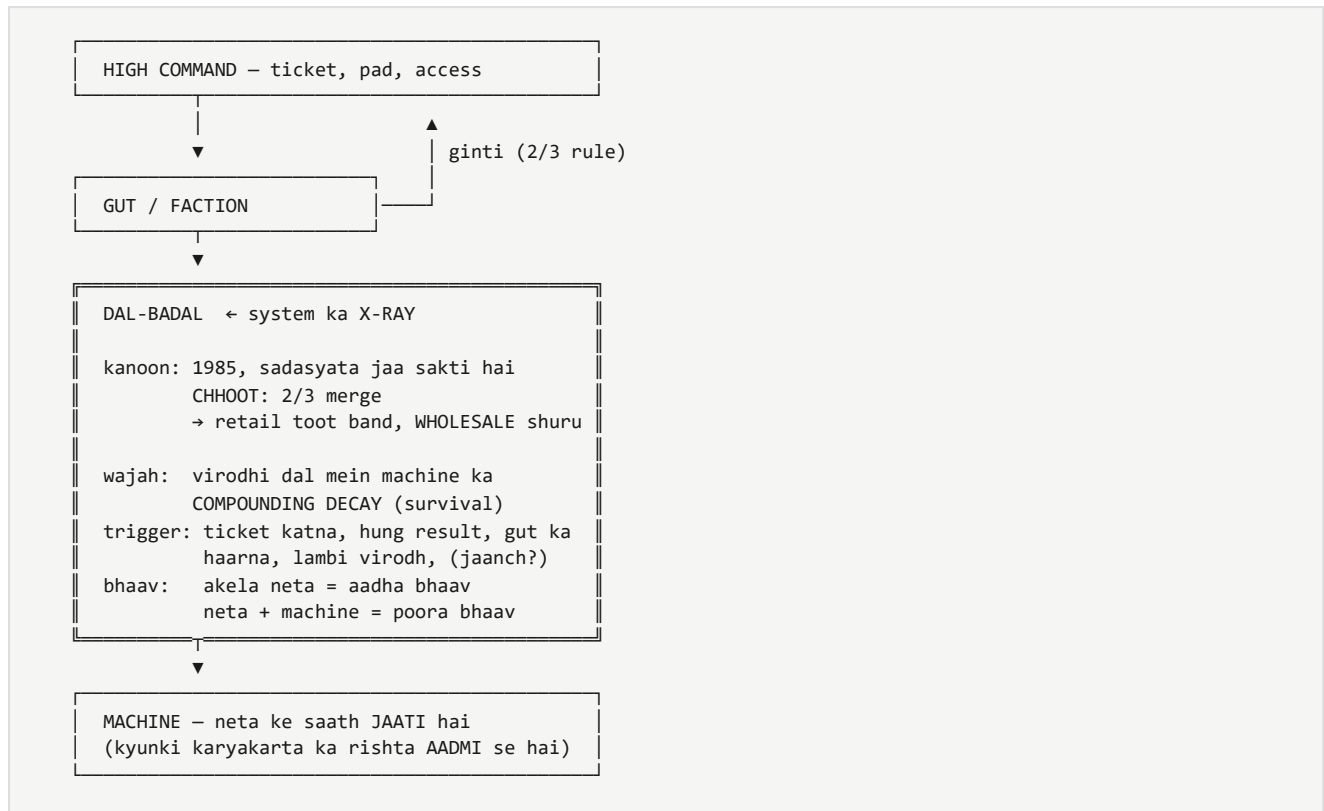

Turant nuksaan: ginti
Asli nuksaan: machine
Isliye: woh turant uske gut ke junior logon ko
pad baantna shuru kar deti hai

KARYAKARTA (ch.5):

Uske liye yeh sabse mushkil din hai. Usko chunna
hai: 20 saal ka aadmi, ya woh party jisme uske
kaam honge?
Aur aksar woh AADMI ko chunta hai — kyunki uska
rishta party se nahi, us aadmi se tha

Woh aakhri box sabse zaroori hai. **Yehi wajah hai ki machine neta ke saath jaati hai, party ke paas nahi rehti.**

Master map — toot ka mechanism

Baban ki kahani — part 13

Baban 51 ka. Uske MLA ka gut do saal se haara hua tha (ch.12).

Us saal state mein chunav hua aur result hung aaya. Kisi ko poora bahumat nahi. Aur do din mein poora state ek ginti ka khel ban gaya.

Teesre din raat 1 baje Baban ke ghar ek gaadi rukhi. Doosre gut ka ek aadmi — jise Baban 15 saal se jaanta tha — andar aaya, chai bhi nahi pi, aur seedha bola:

"Tumhare saheb ke saath kitne hain?"

Baban ne kaha: "Woh saheb se poocho."

Aadmi hansa: "Saheb se poocha toh woh 14 bolenge. Isliye main tumse pooch raha hoon. **Tumhe pata hai asli ginti kya hai.**"

Baban chup raha. Kyunki aadmi sahi tha — usko pata tha ki 14 mein se 6 pakke the, 4 hilne wale the, aur 4 sirf naam ke the.

Agle 4 din Baban ne apni zindagi ka sabse ajeeb kaam kiya: woh un 14 MLAs ke **karyakartaon** se phone par baat karta raha. MLA se nahi — unke neeche wale logon se.

Aur usne jo dekha, usne uski poori samajh badal di.

6 MLA ke log bole:	"saheb jahan jaayein, hum wahan"
4 MLA ke log bole:	"hum saheb ke saath hain, lekin agar udhar gaye toh hamara kaam hoga na? do saal se kuch nahi hua"
4 MLA ke log bole:	"hum toh party ke saath hain, saheb ka pata nahi"

Baban ne register mein us raat likha:

MLA ki ginti do baar hoti hai. Ek baar uske apne muh se, jo hamesha bade number bolta hai. Aur ek baar uske logon ke muh se, jo asli hoti hai. Jo aadmi doosri ginti kar leta hai, woh pehli ginti wale se hamesha aage rehta hai.

Aakhir mein unka gut nahi toota — sarkar doosre tareeke se ban gayi. Lekin us hafte mein Baban ne teen cheezein seekhin jo usne likh kar rakhi:

- 1. Jab ginti ka khel shuru hota hai, tab har aadmi ka asli bhaav 48 ghante mein khul jaata hai. Saal bhar jo chhupa rehta hai, woh us raat pata chal jaata hai.**
- 2. Koi neta akela nahi tootta. Woh todne se pehle apne logon se poochta hai — aur agar log mana kar dein, toh woh ruk jaata hai. Matlab asli faisla neta nahi, uske log karte hain. Bas yeh baat kabhi likhi nahi jaati.**
- 3. Aur sabse badi baat: wafadaari kabhi party se nahi hoti. Wafadaari hamesha AADMI se hoti hai — aur aadmi se bhi tab tak jab tak uske through kaam hote hain. Jis din kaam rukte hain, wafadaari ki ginti ulti chalne lagti hai.**

Aur us hafte ke aakhir mein, ek chhoti si line — jo uski apni zindagi ke baare mein thi:

Aaj mujhe pehli baar dikha ki poore state mein sirf 5-6 log the jo asli ginti jaante the. Aur main unme se ek tha. Maine 25 saal kisi aur ke liye ginti ki hai. Ab bhi mera naam kisi list mein nahi hai.

Self-test (pehle dimaag, phir check)

1. Anti-defection law ne dal-badal ko roka ya badla — kaise?

Jawab: Badla. Pehle ek-ek aadmi tootta tha (retail), ab 2/3 wali chhoot ki wajah se **poora group** tootta hai (wholesale). Rule ne behaviour band nahi kiya, usse naya raasta pakadne par majboor kiya — wahi "sarpanch pati" wala pattern (ch.3), bade level par.

2. Neta party kyun badalta hai — lalach se aage wala asli jawab?

Jawab: Survival. Virodhi dal mein rehna compounding decay hai — kaam atakte hain, karyakarta khiskte hain, thekedar door jaate hain, aur 5 saal mein machine hi nahi bachti. Machine ke bina woh phir kabhi wapas nahi aa sakta. Isliye woh machine bachane ke liye todta hai, paise ke liye nahi (paisa bonus hai).

3. Resort politics logical kyun hai — 4 wajah?

Jawab: (1) Doosri taraf ka offer MLA tak na pahunche, (2) uske apne log/parivaar ka dabav door rahe, (3) roz ginti pakki rahe, (4) media ko photo mile — "45 MLA ek saath" wali photo hi bargaining power hai.

4. "Akela tootne wale ka bhaav aadha" kyun?

Jawab: Kyunki neta ki keemat uske naam mein nahi, uske saath aane walon (machine) mein hai. Nayi party usko ginti aur ready-made machine ke liye leti hai. Agar uske 300 karyakarta saath nahi aaye, toh 6 mahine mein woh nayi party ke liye bhi bekaar hai.

5. Karyakarta toot ke waqt kise chunta hai, aur kyun?

Jawab: Aksar **aadmi** ko, party ko nahi — kyunki uska rishta party ke jhande se nahi, us aadmi se tha jisne uske kaam karwaye (ch.5). Aur isliye machine neta ke saath jaati hai, purani party ke paas sirf jhanda bachta hai.

What this means for you

Jab bhi khabar aaye ki koi neta party badal raha hai, us khabar ko is tarah mat padho ki "isne dhoka diya." Yeh do sawaal poocho: **"iski machine ka kya haal tha?"** aur **"iske saath kitne log ja rahe hain?"** Pehla batayega usne kyun toda, doosra batayega uska asli bhaav kya hai.

Aur agar kabhi kisi neta se milo jab uski party virodh mein hai — yaad rakhna ki woh sabse zyada dabav mein hai aur sabse zyada khula bhi. Uske paas paisa kam hoga, lekin uski zaroorat sabse tez hogi: **usko woh cheez chahiye jo uski machine ko zinda rakh sake jab tak uske paas taakat nahi hai.**

Verified structure: the Tenth Schedule (52nd Amendment, 1985) provides for disqualification on voluntarily giving up party membership or defying a whip, with an exemption for a merger backed by two-thirds of a legislature party; the phrase "Aaya Ram Gaya Ram" originates from 1960s Haryana defections; Karnataka 2019 saw a wave of MLA resignations followed by by-elections. Speaker delays in deciding disqualification petitions have been repeatedly criticised, including by courts. Money and agency-pressure elements of defection deals are reported allegations, not documented fact, and are presented as pattern. Baban fictional.

14. Ticket se bada banna — aur dynasty kyun banti hai

Har neta ka chhupa hua lakshya

Ab tak humne dekha ki MLA phansa hua aadmi hai:

- Uska ticket party ke haath mein hai (ch.7)
- Uski taakat sarkar mein hone par tiki hai (ch.6)
- Uske gut ka bhavishya uske haath mein nahi (ch.12)
- Aur agar sab bigad jaye toh todna padta hai (ch.13)

Toh har samajhdar neta ek hi cheez ki taraf bhaagta hai, chahe woh kabhi khulke na bole:

"Main aisa ban jaun ki party mujhe zaroorat samjhe — main party ko zaroorat na samjhun."

Iska matlab hai: **apne naam par jeetna, party ke naam par nahi.**

Yeh chapter us safar ke baare mein hai. Aur uske aakhir mein jo cheez banti hai, use log "dynasty" kehte hain — aur samajhte hain ki woh ek bimari hai. **Yeh chapter dikhayega ki woh bimari nahi, is machine ka natural nateeja hai.**

Do tarah ke MLA

Sabse pehle yeh farak samjho, kyunki poori kitab mein yeh sabse kaam ka classification hai:

PARTY KE NAAM PAR JEETNE WALA

- lehar aayi toh jeeta
- party ka nishaan hi uski taakat hai
- ticket kata toh khatam
- doosri party mein jaake haar jaata hai
- party usse "replaceable" maanti hai

APNE NAAM PAR JEETNE WALA

- uska apna vote hai, party se alag
- ticket kata toh nirdaleeya jeet sakta hai
- doosri party mein jaake bhi jeetta hai
- party usse DARTI hai

Ab poori kitab ka sabse practical test:

Ek neta ki asli taakat naapni ho? Yeh poocho: "agar iska ticket kat jaye aur yeh nirdaleeya lad le, toh kitne vote layega?"

Agar jawab "10,000" hai — woh party ka aadmi hai. Agar jawab "60,000" hai — party uska aadmi hai.

Apna vote kaise banta hai

Party ke nishaan se alag, apna khud ka vote — yeh 4 cheezon se banta hai. Aur teeno hum pehle dekh chuke hain, ab jodenge:

1. EHSAAN KA KHAATA (ch.10)

Woh log jinke kaam usne khud karwaye. Yeh vote party ka nahi hai — yeh **uska** hai, kyunki us aadmi ne kaam hote hue dekha aur usne uska naam liya.

20 saal mein agar kisi ne 20,000 parivaaron ke chhote-mote kaam karwaye, toh uske paas ek aisa vote-bank hai jo kisi jhande se nahi bandha.

2. SANSTHA (ch.11)

College ke staff, cooperative ke members, mill ke supplier. Yeh log party dekhkar vote nahi karte — **woh apni rozi dekhkar karte hain.**

Yeh sabse pakka apna vote hai. Isliye ch.11 mein humne kaha tha ki sanstha "insurance" hai.

3. JAATI/SAMUDAY KA NETRITVA (ch.18)

Agar woh apne samuday ka sabse bada neta ban gaya, toh us samuday ka vote uska hai — chahe woh kisi bhi party mein ho. Party badalne par bhi block saath jaata hai.

4. MACHINE JO USKE NAAM SE JUDI HO (ch.5)

Aur yeh sabse nazuk cheez hai. Karyakarta ka rishta party se hai ya aadmi se? Chapter 13 mein humne dekha — **aadmi se.** Lekin yeh apne aap nahi hota. Yeh tab hota hai jab neta apne logon ke kaam **apne naam par** karwata hai.

Baban ne ch.11 mein yehi likha tha: *"naukri MLA ne di, lekin sifarish maine ki. Log usko yaad rakhte hain jisne unka naam liya."*

Ab dynasty — aur kyun woh natural hai

Ab sabse important part. Ek neta ne 20-25 saal mein yeh sab bana liya:

- 20,000 parivaaron ka ehshan ka khaata
- ek college / cooperative (500 naukri, har saal admission)
- apne samuday mein sabse bada naam
- 300 booth par apne log
- thekedaron aur vyapariyon ka network
- officers ke saath 20 saal ke rishte

Ab woh 65 saal ka hai. Ek sawaal uske saamne khada hai:

"Yeh sab kiske paas jayega?"

Aur ab har raaste ko soch kar dekho:

- RASTA 1: Party ko de do
 → party kisi aur ko ticket degi. Uska poora network us naye aadmi ka ho jayega. Uska parivaar 2 saal mein bhool diya jayega. Aur uska college? Naya MLA usko tang karega.
- RASTA 2: Apne sabse achhe karyakarta ko de do
 → woh aadmi 5 saal mein khud bada ho jayega aur uske parivaar ko nahi poochega. (Yeh hazaar baar hua hai.)
- RASTA 3: Apne bete/beti ko de do
 → network bhi bacha, sanstha bhi bachi, parivaar bhi bacha

Rasta 3 hi bachta hai. Aur woh isliye bachta hai kyunki system mein koi aur mechanism hai hi nahi jo uski 25 saal ki poonji ko transfer kar sake.

Ab yeh line dhyan se padho, kyunki yeh is chapter ka dil hai:

Dynasty isliye nahi banti ki neta apne bachche se pyaar karta hai. Dynasty isliye banti hai ki Indian politics mein RETIREMENT ka koi rasta nahi hai. Jo aadmi kursi chhodta hai, uska sab kuch chala jaata hai — sanstha, network, suraksha, sab. Isliye woh kursi chhodta nahi, TRANSFER karta hai. Aur transfer sirf khoon ke rishte mein bharosemand hota hai.

Aur party ko iss se dikhat kyun nahi hoti? Kyunki **party ke liye bhi yeh sabse aasan sauda hai:**

- Party ka hisaab:
- | | |
|------------------------|--|
| Purana MLA hataao | → naya banane mein 10 saal aur seat ka risk |
| Uske bete ko ticket do | → machine ready, sanstha ready, vote ready, aur woh bhi ehshanmand |

Dono taraf ka ganit dynasty ki taraf le jaata hai. Isliye har party mein — har ek mein, exception nahi — dynasty milti hai.

Dynasty ke 3 roop

1. SEEDHI (beta/beti)
Sabse aam. Aksar pehle koi chhoti kursi
(zila parishad, yuva morcha), phir ticket.
2. GHUMAKAR (patni/bhai/bahu)
Jab beta chhota hai ya seat reserve ho gayi
(ch.3 wala "sarpanch pati" ka bada version).
3. SANSTHA KE RASTE
Beta pehle college/cooperative ka chairman
banta hai. Wahan se apna base banata hai,
phir ticket maangta hai. Yeh sabse "safed"
raasta hai — woh neta ka beta nahi, "shiksha
ka kaam karne wala" dikhta hai.

Teesra raasta sabse chalak hai, aur isliye sabse common ho raha hai.

Contested corner

Kya dynasty buri hai?

- **Camp A:** Haan. Yogyata (merit) khatam ho jaati hai. Ek karyakarta 30 saal kaam kare, aur ticket ek 26 saal ke ladke ko mile jiska sirf baap bada tha. Isse system ke andar ki umeed (ch.5 ka fuel) mar jaati hai.
- **Camp B:** Utna nahi jitna lagta hai. Voter ko option hai aur woh dynasty ke logon ko harata bhi hai. Aur dynasty ka aadmi bachpan se politics dekhta hai — usko kaam ki samajh zyada hoti hai. Aur ek practical baat: har dhandhe mein parivaar chalta hai (business, doctor, film) — politics mein hi kyun aitraaz?

Is kitab ka position: yeh moral bahas hai aur main ise settle nahi karunga. Lekin **architecture** ke liye ek baat pakki hai: jab tak retirement ka koi rasta nahi hai aur jab tak neta ki पूरी पूंजी उसके अपने रिश्तों में बंधी है, तब तक dynasty का incentive रहेगा — चाहे लोग उसे पसंद करें या ना करें.

Aur ek data-jaisi baat bhi honestly bolni chahiye: **dynasty ke log har baar nahi jeette**. Bahut baar haarte hain. Matlab voter पूरी तरह बेबा नही है. Lekin unko ladne का **mauka** आम आदमी से काि गुना ज्यादा आसान मिलता है — aur asli असमता वहाँ है, result में नही.

Incentive equation

PURANA NETA (60+):

Uske paas: 25 saal ki poonji (network, sanstha, ehsaan, machine)
Uska darr: retirement = sab kuch khatam.
Uski sanstha par naya MLA kabza karega, uske log 6 mahine mein bhool jayenge
Isliye: woh kursi chhodta nahi – TRANSFER karta hai. Aur transfer ke liye khoon sabse safe hai

PARTY:

Uska hisaab: naya aadmi banane mein 10 saal + seat ka risk; beta lene mein ready
machine + ehsaanmand aadmi
Isliye: party dynasty ko rokta nahi

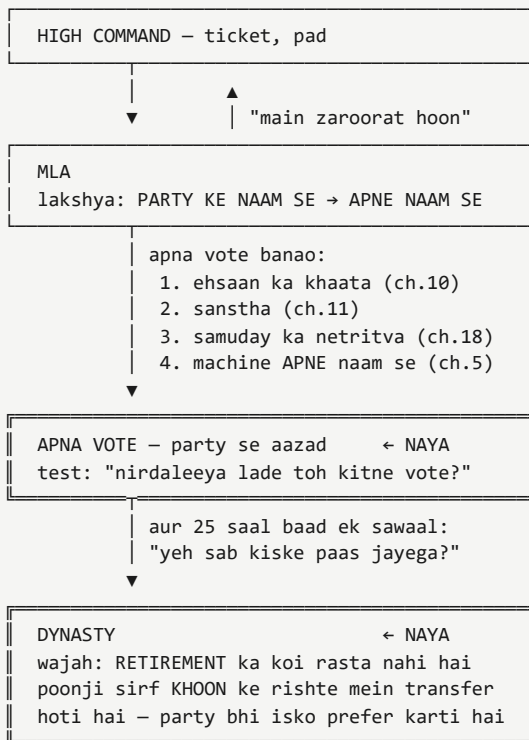

KARYAKARTA (ch.5):

Uska nuksaan: uski "umeed" wali seedhi ka aakhri danda kat gaya
Lekin woh phir bhi rukta hai – kyunki uske paas suraksha aur pehchaan abhi bhi wahin hai (Aur yeh system ka sabse kroor hissa hai)

VOTER:

Usko farak kam padta hai – kyunki uska sawaal "kaun" nahi, "mera kaam hoga ya nahi" hai.
Aur beta aksar wahi network chala raha hota hai

Master map — poonji ka transfer

Yeh box lagane ke baad machine ka ek loop poora ho jaata hai: **taakat** → **sanstha** → **apna vote** → **parivaar** → **agli peedhi ki taakat**.

Baban ki kahani — part 14

Baban 54 ka. Uski credit society ab 4,000 members ki hai. Uske through lagbhag 90 parivaaron ko naukri mili hai. Teen wardon mein log usse "Baban dada" bulate hain.

Aur us saal jo hua, usne uski पूरी zindagi ka hisaab saamne rakh diya.

Uske MLA — 26 saal ka saath — bimaar pade. Do mahine aspताल mein. Party ne agle chunav ki taiyari shuru ki.

Baban ne pehli baar apne liye ticket maanga.

Woh state capital gaya. Teen din ruka. Sabse mila. Aur uski daleel simple thi: "26 saal. Meri society ke 4,000 member. 90 parivaar ki naukri meri sifarish se. Main is seat ko jaanta hoon."

Faisla aaya: ticket **MLA ke bete** ko mila. 31 saal ka ladka, jo teen saal pehle tak Pune mein naukri kar raha tha.

Baban zila adhyaksh se milne gaya — wahi purana aadmi, ab budha. Is baar Baban gussa mein nahi tha. Usne sirf ek sawaal poocha: "Sach batao. Ganit kya tha?"

Adhyaksh ne पूरी imandaari se jawab diya, aur wahi jawab is chapter ka nichod hai:

"Baban, tumhare 4,000 member hain. Uske baap ke college mein 400 staff hain, 2,000 students, aur unke parivaar. Tumhare 90 parivaar naukri wale hain. Uske baap ke 500 hain. Tumhara ehसाan ka khaata 15 saal ka hai. Uske baap ka 26 saal ka hai — aur woh khaata **uske bete ke नाम par transfer ho jayega**, kyunki log kehte hain 'sahab ka ladka hai.'

Tum 26 saal se us khaate ko CHALA rahe the. Lekin woh khaata kabhi tumhare नाम par nahi tha."

Baban ghar aaya. Us raat usne register mein sabse lambi entry likhi:

Aaj mujhe apni zindagi ki sabse badi galti dikhi, aur woh 26 saal purani hai.

Maine 26 saal machine chalayi. Main sabse behtar chalata tha. Lekin main hamesha KISI AUR ke नाम par chalata raha.

Jab maine kisi ka काम karwaya, log kehte the "sahab ne karwa diya." Kabhi-kabhi kehte the "Baban dada ne karwaya" — lekin unke dimaag mein sahab ka chehra tha.

Ehसाan ka khaata ek hi cheez par bharosa karta hai: log kiska NAAM lete hain. Aur नाम hamesha uska hota hai jiske पास KURSI hai — chalane wale ka nahi.

Aur neeche, teen aur line — jo poore chapter ka theory hai, ek aadmi ki zindagi se nikla hua:

1. Party mein 26 saal dene se ticket nahi milta. Ticket us aadmi ko milta hai jiske paas woh cheez hai jo party ke paas NAHI hai. Mere paas jo tha, woh party ka hi tha.
2. Beta jeetega. Aur woh 31 saal ka hai, usne kuch nahi kiya. Lekin uske paas 26 saal ka khaata transfer ho gaya. Yeh anyay nahi hai — yeh ganit hai. Aur ganit se ladne ka koi faayda nahi.
3. Meri society chhoti hai. Lekin woh MERI hai. Aur agar main 8 saal pehle shuru kar deta — jab MLA ne pehli baar mujhse kaha tha "tu samajhdar hai isliye khatarnak hai" — toh aaj 4,000 nahi, 15,000 member hote.

Aur sabse aakhir mein, ek line jo usne bade akshar mein likhi:

KISI AUR KI MACHINE CHALANA EK NAUKRI HAI. APNI CHHOTI SI MACHINE BANANA EK POONJI HAI. Main 26 saal naukri karta raha aur samajhta raha ki poonji bana raha hoon.

Self-test (pehle dimaag, phir check)

1. Neta ki asli taakat naapne ka ek-line test kya hai?

Jawab: "Agar iska ticket kat jaye aur yeh nirdaleeya lade, toh kitne vote layega?" Kam vote = woh party ka aadmi. Bahut vote = party uska aadmi. Yeh test party-ke-naam-par-jeetne wale aur apne-naam-par-jeetne wale ko alag kar deta hai.

2. "Apna vote" kis chaar cheezon se banta hai?

Jawab: (1) Ehsaan ka khaata — jinke kaam usne khud karwaye, (2) sanstha — jinki rozi usse judi hai, (3) apne samuday ka netritva, (4) machine jo uske apne naam se judi ho (party ke jhande se nahi).

3. Dynasty ka asli structural kaaran kya hai?

Jawab: Indian politics mein **retirement ka koi rasta nahi hai**. Kursi chhodne par neta ki 25 saal ki poonji (network, sanstha, ehsaan, machine) bikhar jaati hai — koi mechanism nahi jo usse transfer kare. Isliye woh kursi chhodta nahi, transfer karta hai, aur transfer sirf khoon ke rishte mein bharosemand hai.

4. Party dynasty ko rokni kyun nahi?

Jawab: Party ka apna ganit bhi wahi kehta hai. Naya aadmi banane mein 10 saal aur seat ka risk; bete ko ticket dene mein ready machine, ready sanstha, ready vote — aur upar se woh ehshanmand rehta hai. Dono taraf ka incentive dynasty ki taraf le jaata hai.

5. Baban ki 26 saal purani galti kya thi?

Jawab: Usne machine chalayi lekin hamesha **kisi aur ke naam par**. Ehsaan ka khaata us aadmi ke naam par banta hai jiske paas kursi hai, chalane wale ke naam par nahi. Isliye 26 saal ki mehnat transfer nahi hui — woh MLA ke bete ke paas chali gayi. Kisi aur ki machine chalana naukri hai; apni chhoti machine banana poonji hai.

What this means for you

Kisi bhi neta ko dekho toh yeh poocho: **"iska apna vote kitna hai, aur uska source kya hai?"** Aur agar woh dynasty ka aadmi hai, toh usse kam mat aanko — usko transfer mein jo mila hai woh asli hai (machine, sanstha, khaata), aur woh usse chalana bhi jaanta hai.

Aur ek baat jo tumhare apne kaam ki hai, seedhe shabdon mein: **Baban ki galti sirf politics ki galti nahi hai**. Kisi aur ke platform par, kisi aur ke naam par, kisi aur ke customer ke saath 26 saal lagana — woh naukri hai, chahe woh kitna bhi kaabil kaam ho. Poonji tab banti hai jab log **tumhara naam lete hain**. Yeh baat is kitab se bahar bhi utni hi sach hai jitni andar.

Structure verified: personal vote banks independent of party symbol, institution-based political bases, and family succession are widely documented features of Indian politics across all major parties; dynastic candidates contest and also lose regularly. The "no retirement path" framing is this book's analytical claim, not a cited finding. Baban fictional.

PART 4

The Top Floors

15. MP — Delhi ka alag khel

Sabse aam galatfehmi

Log samajhte hain MP "bada MLA" hai. Seedhi mein agla danda, wahi kaam, zyada area.

Yeh galat hai. MP aur MLA do alag naukriyaan hain, alag physics ke saath. Aur jab tak yeh farak samajh na aaye, tab tak Delhi ki aadhi khabrein samajh nahi aayengi.

Pehle numbers, phir wajah:

	MLA	MP (Lok Sabha)
Voters	2-4 lakh	~18 lakh (average)
Booths	250-350	1,800-2,500
Andar kya hai	—	6-8 vidhan sabha seats (matlab 6-8 MLAs uske area mein baithe hain)
Fund	MLALADS (state ke hisaab se alag)	MPLADS: Rs 5 crore/saal
Kaam kis sarkar se	STATE sarkar	CENTRE sarkar

Aakhri line par ruko. **Yeh poore chapter ka jawab hai.**

MP ghar par kamzor kyun hota hai

Aam aadmi ki roz ki zaroorat kya hai? Chapter 10 ki list yaad karo: police, tehsil, ration card, school admission, bijli, paani, sadak, aspataal, transfer.

Ab poocho: **yeh sab kiske paas hai?**

Police	→ state
Tehsil / patwari	→ state
School, aspataal	→ state (zyadatar)
Bijli, paani, sadak	→ state (zyadatar)
Transfer-posting	→ state
Ration card	→ state implementation

Lagbhag sab kuch state ke paas hai. Aur MP ka rishta Centre se hai, state se nahi.

Ab dekho iska nateeja zameen par kya hota hai:

Ek aadmi apne gaon ka rasta banwane aata hai.	
MLA ke paas jaata hai	→ MLA ka phone chalta hai (agar woh ruling party mein hai) → kaam ho sakta hai
MP ke paas jaata hai	→ MP kya karega? Woh state ke officer ko order nahi de sakta. Woh sirf "kehke dekh sakta hai."

Aur agar MP ki party state mein virodh mein hai, toh uski baat aur bhi kam chalti hai.

Isliye ek line jo har purana karyakarta jaanta hai:

MLA ke paas roz ka kaam hai. MP ke paas roz ka kaam nahi hai. Isliye aam aadmi apna kaam lekar MLA ke paas jaata hai, MP ke paas nahi.

Toh MP ke paas hai kya

Teen cheezein — aur teenon MLA se alag tarah ki hain:

1. MPLADS — Rs 5 crore saalana

Yeh MLA ke fund se aksar bada hota hai. Rules: - Saal ke Rs 5 crore, do kishton mein (2.5 + 2.5), **seedha district authority ko** jaate hain - MP paisa kharch nahi karta — woh District Collector ko kaam **suggest** karta hai - Kam se kam 15% SC bahul ilaakon mein, 7.5% ST bahul ilaakon mein

Ab chapter 10 wala insight yahan bhi lagao: **paisa MP ke haath mein nahi hai, lekin "kis gaon mein" ka faisla uske haath mein hai.** Aur wahi faisla taakat hai.

Aur uska istemal? 6-8 vidhan sabha seats hain uske area mein. Toh MPLADS uska **apne MLAs ke saath rishta banane ya bigadne ka** tool ban jaata hai — kis MLA ke ilaake mein zyada kaam jaayega, kis mein kam.

2. Delhi ki pahunch

Yeh uski asli taakat hai: - Central ministries mein baat pahunchana - Central schemes apne ilaake mein khinchna (railway station, highway, university, central hospital) - Central agencies aur PSU ke kaam

Matlab MP ka product **chhota rozana kaam nahi, bada project** hai. Ek MLA 500 logon ke chhote kaam karta hai. Ek MP ek railway line laata hai.

Farak yeh hai ki chhote kaam **roz vote banate hain**, aur bada project **5 saal mein ek baar dikhta hai** — aur uska credit aksar bat jaata hai.

3. Party ke andar ka kad

Ek MP apni party ka rashtriya chehra hota hai. Uski baat national leadership tak jaati hai. Yeh MLA se zyada hai.

MP aur uske MLAs — ek chhupi hui ladai

Yeh section sabse practical hai, aur is chapter ka dil.

Ek Lok Sabha seat ke andar 6-8 vidhan sabha seats hain. Matlab **6-8 MLAs**, jo aksar usi party ke ho sakte hain.

Ab dekho tension kahan hai:

MP ko chahiye: ki uske ilaake ke MLAs uske liye
kaam karein (unki machine = uski machine)

MLA ko chahiye: ki uski seat par uska naam chale,
MP ka nahi

Aur donon ek hi voter ke saamne khade hain.

Aur ek gehri baat: **MP ke paas apni booth-level machine aksar nahi hoti.** 1,800-2,500 booth ek aadmi nahi sambhal sakta. Toh election ke waqt MP kiski machine par ladta hai?

Apne MLAs ki machine par.

Isliye MP election mein woh cheez hoti hai jo bahar se nahi dikhti: **MP ko apne hi party ke MLAs ko manana padta hai ki woh dil se kaam karein.** Aur agar kisi MLA ka MP se jhagda hai, toh woh MLA apne ilaake mein "kaam karta hua dikhta hai" lekin uska booth-level zor kam ho jaata hai — aur counting ke din woh vidhan sabha segment ka number bata deta hai (ch.9 ka report card, yahan bhi).

MP jeetta hai lehar se aur apne MLAs ki machine se. MLA jeetta hai apni machine se. Isliye MP zyada "hawa" par depend karta hai, aur MLA zyada "zameen" par.

Aur yehi wajah hai ki **wave elections mein MP seats zyada palatti hain, MLA seats kam.**

MP banna kaun chahta hai — aur kyun

Agar MP ghar par kamzor hai, toh log MP kyun banna chahte hain? Chaar wajah:

1. KAD (status)
"Sansad" hona rajya se upar hai. Rashtriya pehchaan.
2. MANTRI KA RASTA
Central mantri banne ka darwaza sirf yahan se khulta hai. Aur central mantri ki taakat kisi bhi MLA se kai guna hai.
3. BADE PROJECT
Bade project = bade theke = bada paisa
(ch.8 ka loop, bade size mein)
4. DELHI KA NETWORK
Central ministries, PSU, industry — yeh network business ke liye MLA wale network se zyada keemti hai

Aur ek honest baat: **kai MLAs MP nahi banna chahte.** Kyunki MLA ke paas roz ki taakat hai (transfer, police, tehsil) aur MP ke paas nahi. Ek strong MLA jo apne ilaake ka raja hai, woh Delhi jaakar 543 mein se ek banne mein nuksaan dekh sakta hai.

Rajya Sabha — teesra darwaza

Ek chhota section, kyunki iske bina picture adhoori hai.

Rajya Sabha ka member janta nahi chunti — **MLAs chunte hain** (state ke vidhayak vote dete hain).

Iska matlab kya hai:

- Rajya Sabha ki seat ke liye tumhe VOTER nahi, MLAs chahiye
- Matlab yeh seat party ke haath mein hai
- Isliye yahan aksar woh log jaate hain jo chunav nahi lad sakte/ladna nahi chahte: paisa dene wale, vishesh log, wakil, patrakar, aur woh neta jinko party "adjust" karna chahti hai

Yeh chapter 7 ka "pad" wala insight hai, sabse upar ke level par. **Rajya Sabha party ka sabse mehnga pad hai.**

Contested corner

Kya MP ka role badal raha hai?

- **Camp A:** Haan. Ab MP bhi local kaam mein ghusta hai — MPLADS, Twitter par shikayat, central schemes ka credit lena. Voter ab MP se bhi rozana kaam maangta hai.
- **Camp B:** Nahi. Structure wahi hai — jo cheezein aam aadmi ko chahiye woh state ke paas hain. MP ka local kaam dikhawa zyada, asar kam. Isliye MP seats par national mudde chalte hain, aur MLA seats par local.

Sach shayad yeh hai ki **MP zyada "dikhne" laga hai, lekin uska structural power wahi hai** — kyunki subject list badli nahi hai.

Incentive equation

MP:

Paata hai: kad, Delhi network, MPLADS 5 cr,
central mantri ka rasta, bade project
Nahi hai: roz ka kaam (state ke paas), aur
apni booth machine (bahut badi seat)
Darr: lehar palat gayi toh kuch nahi bachega –
uska apna vote MLA jitna gehra nahi hota
Isliye: woh apne MLAs ko sambhalta hai, aur
national narrative par depend karta hai

MLA (MP ke ilaake ka):

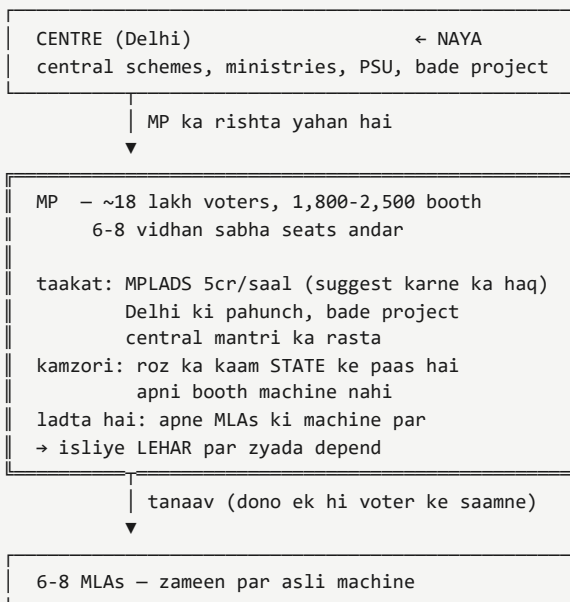

Chahta hai: apni seat par apna naam
Deta hai: election mein machine (ya nahi deta)
Isliye: MP-MLA rishta hamesha thoda tana rehta hai

VOTER:

Woh dono se alag cheez maangta hai:
MLA se – mera kaam
MP se – mera desh/bada project/party ka chehra
Isliye: ek hi aadmi Lok Sabha mein ek party ko
aur Vidhan Sabha mein doosri ko vote de
deta hai – aur yeh irrational NAHI hai

Woh aakhri line bahut important hai. **Split voting** — Lok Sabha mein ek party, vidhan sabha mein doosri — India mein aam hai, aur log isko "confused voter" kehte hain. Voter confused nahi hai. Woh **do alag naukriyon ke liye do alag aadmi chun raha hai**.

Master map — upar ka floor

RAJYA SABHA: janta nahi, MLAs chunte hain
→ party ka sabse mehnga PAD

Baban ki kahani — part 15

Baban 55 ka. Uska chhota ITI college ek saal purana hai. Usko affiliation ke liye ek central body se NOC chahiye thi, aur woh file 8 mahine se Delhi mein atki thi.

Usne apne MLA se kaha. MLA ne saaf bola: "Yeh mera kaam nahi hai. Yeh Delhi ka hai. Tu MP saheb se mil."

Baban pehli baar MP ke office gaya. Aur wahan usne jo dekha, usne uski poori samajh mein ek naya kamra khol diya.

Pehla farak: MLA ke ghar ke bahar subah 40 log baithe hote the. MP ke office ke bahar **6 log** the. Aur unme se 4 thekedaar type dikhte the.

Usne MP ke PA se poocha: "Bheed kam hai?"

PA hansa: "Bheed MLA ke paas jaati hai. Yahan log tab aate hain jab kaam bada ho ya Delhi ka ho. Chhote kaam ke liye koi hum tak nahi aata — unko pata hai humse hoga nahi."

Doosra farak: MP ne Baban ka kaam 3 hafte mein karwa diya. Ek phone Delhi mein, ek chitthi. Jo kaam MLA 8 mahine mein nahi kar paya, MP ne 3 hafte mein kiya.

Baban ne register mein likha:

MLA aur MP mein chhota-bada ka farak nahi hai. DARWAAZE ka farak hai. Har aadmi ke paas kuch darwaaze hain aur baaki band hain. Galat aadmi ke paas sahi kaam le jaana — yehi sabse aam galti hai jo log karte hain, aur phir kehte hain "neta kaam nahi karta."

Teesra farak usne 6 mahine baad dekha, aur woh sabse gehra tha.

Lok Sabha ka chunav aaya. Baban ke ilaake ke MLA — jiske bete ne ab seat sambhali thi — MP ke saath thande the. Purani ranjish.

Baban ne dekha ki MLA ne kya kiya: usne MP ke liye do rally karwayi, poster lagwaye, mancho par saath khada hua. Bahar se poora sath.

Lekin usne apne booth pramukhon ko woh phone nahi kiya jo woh apne khud ke chunav mein karta tha. Koi order nahi diya. Kuch mana bhi nahi kiya. Bas... zor nahi lagaya.

Counting ke din us vidhan sabha segment se MP ko baaki 6 segments se kaafi kam mila.

Baban ne register mein us raat sabse chalak line likhi:

MLA ne MP ko dhoka nahi diya. Usne bas apni poori taakat nahi lagayi. Aur politics mein yeh sabse surakshit hathiyaar hai — kyunki isko koi pakad nahi sakta. "Maine toh rally ki thi, poster lagaye the" — aur baat khatam.

Machine chalane se nahi rukti. Machine dheere chalane se rukti hai. Aur dheemi machine ka koi saboot nahi hota.

Aur neech:

Isliye MP hamesha thoda ghabraya hua rehta hai. Uski kismat un 6-8 MLAs ke haath mein hai jo uske dost nahi, uske pratidwandi hain — kyunki dono ek hi zameen par khade hain.

Self-test (pehle dimaag, phir check)

1. MP ghar par MLA se kamzor kyun hai?

Jawab: Aam aadmi ki rozana zarooratein — police, tehsil, ration, school, bijli, sadak, transfer — lagbhag sab **state** ke paas hain. MP ka rishta Centre se hai. Isliye MP state ke officer ko order nahi de sakta, sirf keh sakta hai. Bheed MLA ke paas jaati hai, MP ke paas nahi.

2. MPLADS ki asli taakat kya hai (paisa nahi)?

Jawab: Rs 5 crore/saal seedha district authority ko jaata hai, MP sirf **suggest** karta hai. Taakat "kis gaon mein" ke faisle mein hai. Aur kyunki uske andar 6-8 vidhan sabha seats hain, yeh fund uske apne MLAs ke saath rishta banane/bigadne ka tool ban jaata hai.

3. MP kiski machine par chunav ladta hai, aur isse kya nateeja nikalta hai?

Jawab: Apne 6-8 MLAs ki machine par — kyunki 1,800-2,500 booth ek aadmi nahi sambhal sakta. Nateeja: MP lehar par zyada depend karta hai aur MLA zameen par. Isliye wave elections mein MP seats zyada palatti hain, MLA seats kam.

4. Split voting (LS mein ek party, VS mein doosri) irrational kyun nahi hai?

Jawab: Voter do alag naukriyon ke liye do alag aadmi chun raha hai — MLA se woh apna rozana kaam maangta hai, MP se desh/bada project/party ka chehra. Alag job description, alag chunav.

5. Rajya Sabha ka member kaun chunta hai, aur isse woh seat kya ban jaati hai?

Jawab: Janta nahi, **MLAs** chunte hain. Matlab woh seat party ke haath mein hai — isliye woh party ka sabse mehnga **pad** ban jaati hai, jo un logon ko diya jaata hai jo chunav nahi lad sakte ya jinko "adjust" karna hai.

What this means for you

Ek practical rule jo tumhe seedha kaam aayega: **kaam le jaane se pehle poocho ki woh kaam kiske darwaze mein hai.** State ka kaam MLA ke paas, Centre ka kaam MP ke paas. Galat darwaze par sahi kaam le jaana sabse aam galti hai — aur uske baad log samajhte hain ki neta nikamma hai, jabki woh sirf galat aadmi tha.

Aur agar tum kabhi kisi MP se milo: yaad rakhna woh MLA se **zyada khula** hota hai naye logon ke liye — kyunki uske office mein bheed kam hai, aur uske paas woh rozana ka kaam nahi hai jisse woh apna naam banaye. Usko chahiye bade dikhne wale kaam, aur unke liye woh naye logon se milne ko tayyar rehta hai.

Verified: MPLADS entitlement is Rs 5 crore per MP per year, released in two instalments of Rs 2.5 crore directly to the district authority, with the MP recommending works to the District Collector; at least 15% must go to SC-inhabited areas and 7.5% to ST-inhabited areas — mplads.gov.in, [MPLADS guidelines PDF](#), vajiramandravi.com. 2024 Lok Sabha: 543 constituencies, ~97.77 crore total electors, giving an average of roughly 18 lakh voters per seat — pib.gov.in. Assembly segments per Lok Sabha seat typically range 6-8 and vary by state. Rajya Sabha members are elected by state legislative assemblies. Baban fictional.

16. Mantri aur CM — jeetne ka MATLAB kya hai

Ab tak ka sabse bada sawaal

13 chapters se hum yeh dekh rahe hain ki log kursi ke liye crores kharch karte hain, 20 saal lagate hain, party badalte hain, parivaar daav par lagate hain.

Ab sawaal: **jeet kar milta kya hai?**

Chapter 1 mein humne kaha tha "taakat". Chapter 8 mein humne kaha tha "theke, zameen, permission". Lekin woh sab **nateeje** hain. Unka **source** kya hai?

Is chapter ka jawab do shabdon mein hai:

FILE aur POSTING.

Sarkar chalti kaise hai? Do cheezon se. Ek — kaagaz par faisla likha jaata hai (file). Do — us kaagaz par likhne wala aadmi kaun hai, yeh tay hota hai (posting).

Jo in dono ko hila sakta hai, uske paas asli taakat hai. Aur woh aadmi hai **mantri**.

MLA se mantri — kya badalta hai

Chapter 6 mein humne kaha tha: MLA ki taakat 20% adhikaar + 80% asar hai. Woh officer ko order nahi de sakta, sirf keh sakta hai.

Mantri banne par yeh ulta ho jaata hai:

	MLA	MANTRI
Officer se	keh sakta hai	ORDER de sakta hai (apne vibhag mein)
File par	request	DASTAKHAT
Transfer	sifarish	FAISLA (apne vibhag mein)
Budget	apna MLALADS	poore vibhag ka
Officers	unse milna padta hai	woh uske NEECHE kaam karte hain

Yeh chhota upgrade nahi hai. **Yeh alag duniya hai.**

Aur isliye mantri pad Indian politics ki sabse zyada ladi jaane wali cheez hai — ticket se bhi zyada. Ticket sirf line mein khada karta hai. Mantri pad taakat deta hai.

Vibhag (portfolio) — sab barabar nahi hote

Yeh section sabse practical hai. Har mantri pad ek jaisa nahi hota. Unme farak hota hai, aur farak teen cheezon se aata hai:

KYA CHAHIYE

KAUNSE VIBHAG MEIN HAI

1. PAISA (bada budget, theke)
 - PWD (sadak/building), Irrigation, Urban Development, Housing, Health (bade tender)
 2. POSTING KI TAAKAT (kitne officers)
 - Home (police), Revenue (patwari/tehsildar), Education (hazaaron master), Health
 3. PERMISSION KA CONTROL
 - Excise (sharab licence), Mining, Transport (permit), Industries (zameen/approval), Urban Development (building)
- KAM KEEMTI (bahar se izzatdaar, andar se khali)
- Culture, Sports, Statistics, Protocol

Ab dhyan do — **jo vibhag "achhe" lagte hain woh aksar kamzor hote hain, aur jo boring lagte hain woh sabse takatwar.**

Culture mantri newspaper mein zyada dikhta hai. Revenue mantri poore state ke patwari-tehsildar ki posting par baitha hai — matlab har zameen ke kaagaz par uska asar hai.

Isliye jab bhi khabar aaye ki "mantrimandal ka batwara hua", asli khabar naam nahi hoti. **Asli khabar yeh hoti hai ki kis gut ko kaunsa vibhag mila.** Jiske gut ko Home, Revenue aur PWD mile, woh sarkar mein bhaari hai — chahe uske paas kitne bhi MLA hon.

Transfer-posting ka arthashastra

Ab is kitab ka sabse honest section. Yeh mechanism samjhe bina Indian sarkar samajh nahi aati.

Sabse pehle structure:

Ek state mein hazaaron sarkari post hain. Aur woh posts BARABAR nahi hain:

"MALDAAR" POST	"KHALI" POST
jahan roz lena-dena hai:	jahan kuch nahi hota:
- bade sheher ka police station	- koi sudoor training centre
- highway wala RTO	- record room
- bade zile ka excise	- archives, library
- mining wala ilaaka	- koi board jisme kaam hi nahi
- bade project wala PWD sub-div	
- bade ilaake ka tehsil	

Ab ek officer ke liye do posts ka farak sirf "kaam" ka nahi hai — **uski पूरी زندگی ka farak hai.**

Aur yahan se poora chakkar shuru hota hai:

1. Officer ko maldaar post chahiye
2. Post ka faisla mantri (aur uske through, uske gut) ke haath mein hai
3. Isliye officer mantri se rishta banata hai
4. Aur mantri jaanta hai ki us post ki keemat kya hai

Nateerja (yeh reported hai, aur ispe ilzaam, jaanch aur adaalat ke faisle hote rahe hain):
kuch jagah posting ki apni ek "keemat" ban jaati hai

Aur ab woh baat jo sabse zaroori hai — **isko sirf paisa mat samjho**. Yeh usse zyada gehra hai:

Transfer-posting ki taakat ka asli istemaal paisa nahi hai. Asli istemaal yeh hai ki har officer jaanta hai ki uski agli posting kis par depend karti hai. Aur jo aadmi yeh jaanta hai, woh apne aap "sahi" faisle lene lagta hai — bina kisi order ke.

Yehi wajah hai ki mantri ko roz order dene ki zaroorat nahi padti. Uska hona hi kaafi hai. Officer khud samajh jaata hai ki file kis taraf jhukni chahiye.

Aur yeh chapter 12 se judta hai: **mantri sirf ek aadmi nahi hai — woh apne poore gut ke logon ke liye transfer, theke aur kaam ka darwaza hai**. Isliye har gut apna mantri chahta hai. Bina mantri ke gut bhookha reh jaata hai, aur bhookha gut toot jaata hai (ch.13).

Mantri vs officer — asli rishta

Ab ek galatfehmi todte hain. Log samajhte hain mantri sab kuch karwa leta hai aur IAS uska naukar hai. **Yeh aadha sach hai.**

Officer ke paas apne hathiyaar hain:

OFFICER KE HATHIYAAR:

1. NIYAM (rules)
"Sir, yeh niyam ke khilaf hai." Isko todna mushkil hai, kyunki galat file par DASTAKHAT officer ke hote hain — mantri ke nahi.
Jab jaanch hoti hai, phansta officer hai.
2. DER (delay)
File ko technically zinda rakho aur chalne mat do.
"Clarification maanga hai." Yeh sabse takatwar aur sabse surakshit hathiyaar hai.
(Ch.15 ka Baban wala insight: dheema chalana kabhi pakda nahi jaata.)
3. LIKHIT ORDER MAANGNA
"Sir, likhkar de dijiye." Yeh sabse bada hathiyaar hai, aur isiliye sabse kam istemaal hota hai — kyunki iske baad rishta khatam.
4. SERVICE KI SURAKSHA
Officer ko nikalna bahut mushkil hai. Zyada se zyada transfer ho sakta hai. Aur uska career 30 saal ka hai; mantri ka 5 saal ka.

Aur yeh aakhri point sabse gehra hai:

Mantri 5 saal ka hai. Officer 30 saal ka hai. Dono ko yeh pata hai. Isliye ek samajhdar officer mantri se ladta nahi — woh WAQT KAAT deta hai.

Isliye asli rishta yeh hai: **dono ko ek doosre ki zaroorat hai aur dono ek doosre se thoda darte hain.** Mantri ko kaam karwana hai, officer ko posting chahiye aur bachna bhi hai. Aur beech mein ek line hoti hai jise dono jaante hain lekin kabhi likhte nahi.

CM — sabse upar

CM ke paas woh sab hai jo mantri ke paas hai, aur teen cheezein aur:

1. MANTRI KA FAISLA
Kaun mantri banega, aur kaunsa vibhag milega.
Matlab har mantri uske haath mein hai.
(Isliye mantri CM se utna hi darta hai jitna
MLA high command se — ch.12 ka pattern dobara)
2. TOP POSTING
Chief Secretary, DGP, collectors, bade officers —
sab CM ke haath mein
3. POORA BUDGET aur ANNOUNCEMENT KA HAQ
Kaun sa project kahan jayega. Aur yeh sabse
bada political hathihaar hai — kyunki har
MLA usse apne ilaake ke liye kuch chahta hai

Aur isliye CM ke saamne har MLA chhota ho jaata hai. Ch.12 mein humne kaha tha "neeche raja, upar naukhar." CM woh aadmi hai jiske saamne poora state naukhar hai.

Lekin CM ki apni kamzori bhi hai, aur woh bilkul wahi hai jo humne poori kitab mein dekhi hai:

CM ki kursi MLAs ki ginti par tiki hai. Isliye CM ko har waqt apni ginti sambhalni padti hai — matlab mantri pad baantne padte hain, gut balance karne padte hain, aur naraz logon ko rokna padta hai. CM sabse takatwar aadmi hai aur sabse zyada blackmail-able bhi.

Chapter 13 (dal-badal) is line ke bina samajh nahi aata.

Contested corner

Kaun zyada takatwar hai — neta ya babu (officer)?

- **Camp A (neta):** Officer transfer ho sakta hai, neta nahi. Aur aakhir mein policy ka faisla chuni hui sarkar ka hai. Officer sirf implement karta hai.
- **Camp B (babu):** Neta 5 saal ka hai, officer 30 saal ka. Officer file likhta hai, aur jo likhta hai wahi record ban jaata hai. Mantri chala jayega, officer rahega — aur system officer ke hisaab se chalta

rahega.

Dono sahi hain, alag-alag paimane par. **Ek faisle mein neta bhaari hai. Poore system mein babu bhaari hai** — kyunki system rozana chalta hai aur rozana officer chalata hai.

Incentive equation

MANTRI:

Paata hai: file par dastakhat + posting ka faisla
+ vibhag ka budget
Deta hai: apne gut ke logon ko kaam, apne ilaake
ko project
Darr: vibhag chhin jaye / CM naraz ho jaye
(kyunki uski kursi CM ke haath mein hai)
Isliye: woh CM ke saamne wahi hota hai jo MLA
high command ke saamne hota hai

OFFICER:

Chahta hai: achhi posting + bachav (jaanch se)
Deta hai: kaam, ya der
Darr: galat file par uske dastakhat hain,
mantri ke nahi
Isliye: woh ladta nahi, WAQT KAATTA hai –
kyunki uska career 30 saal ka hai

CM:

Paata hai: poore state ka control
Darr: ginti. Har waqt.
Isliye: woh poori taakat ke bawajood roz
gut-balancing karta rehta hai

MLA (jiske paas kuch nahi):

Uske liye mantri ka darwaza hi sab kuch hai.
Isliye woh apne gut ke mantri se judta hai –
aur agar uske gut ka koi mantri nahi, toh
woh 5 saal bhookha rehta hai (→ ch.13)

Master map — taakat ka source

Baban ki kahani — part 16

Baban 56 ka. Uske ITI college ko ek sarkari scheme ke tahat equipment grant mil sakti thi. File district se state chali gayi thi. 5 mahine se wahin thi.

Baban ne pehle purana tareeka aazmaya — MLA se kehlwaya. Kuch nahi hua.

Phir usne woh kiya jo 30 saal ke tajurbe ne sikhaya tha: **usne pata lagaya ki file kis TABLE par hai.**

File ek Deputy Secretary ke paas thi. Baban us aadmi se mila. Aur us mulakat ne usko woh sikhaya jo woh 30 saal se aadha-adhoora jaanta tha.

Officer ne file khol kar dikhayi. Bola: "Dekho. Isme ek document ki copy nahi hai. Main isko aage bhej doon toh Audit mein yeh mere naam par aayega. Tumhara mantri mujhse kahega 'bhej do', aur do saal baad jab jaanch hogi toh mantri kahenge 'mujhe kya pata tha, officer ne bheji thi.' **Dastakhat mere hain, mantri ke nahi.**"

Baban ne poocha: "Toh chahiye kya?"

"Woh document. Bas."

Woh document 11 din mein ban gaya. Grant 6 hafte mein aa gayi.

Baban ne us raat register mein likha:

Maine 30 saal socha ki file "sifarish" se chalti hai. Aaj pata chala ki file DAR se rukti hai. Officer ko sifarish nahi chahiye thi — usko apni suraksha chahiye thi.
Jab tak main sifarish bhej raha tha, woh dar raha tha. Jis din maine uska dar hataya, file apne aap chal gayi. Aur mujhe kisi mantri ki zaroorat hi nahi padi.

Do mahine baad usne doosri cheez dekhi, aur woh sabse bada sabak thi.

Uske ilaake ka tehsildar badal gaya. Naya aadmi aaya, aur 3 hafte mein har chhoti file ka rukna shuru ho gaya. Log pareshan.

Baban ne pata lagaya ki naya tehsildar kis mantri ke gut se aaya hai. Aur phir usne kuch nahi kiya — bas intezaar kiya.

7 mahine baad sarkar mein gut badla. Woh tehsildar apne aap transfer ho gaya.

Register mein:

Officer ka behaviour uski niyat nahi hai. Uski POSTING hai. Woh us aadmi ke hisaab se chalta hai jisne usko wahan bithaya, aur us aadmi ke hisaab se jo usko agli jagah bithayega.
Isliye kisi officer ko samajhna ho toh yeh mat poocho ki woh kaisa aadmi hai. Yeh poocho: yeh kiska aadmi hai, aur uski agli posting kiske haath mein hai?

Aur us saal ka aakhri note, jo poore chapter ka nichod tha:

Aaj samajh aaya ki neta kursi ke liye itna kyun ladta hai. Kursi se paisa nahi milta. Kursi se FILE aur POSTING milti hai. Aur poori sarkar sirf yeh do cheezein hain. Baaki sab — scheme, budget, bhashan — un do cheezon ke upar ka kapda hai.

Self-test (pehle dimaag, phir check)

1. Sarkar ki asli taakat kis do cheez mein hai?

Jawab: **File** (kaagaz par faisla) aur **posting** (kaagaz par likhne wala aadmi kaun hoga). Jo in dono ko hila sakta hai, uske paas asli taakat hai. Scheme, budget aur bhashan in dono ke upar ka kapda hai.

2. MLA se mantri banne par kya badalta hai?

Jawab: MLA officer se **keh** sakta hai, mantri apne vibhag mein **order** de sakta hai. MLA sifarish karta hai, mantri dastakhat karta hai. MLA ka MLALADS hai, mantri ke paas poore vibhag ka budget hai. 20% adhikaar + 80% asar wala samikaran ulta ho jaata hai.

3. "Boring vibhag zyada takatwar hote hain" — kyun?

Jawab: Kyunki taakat budget, posting ki sankhya, aur permission ke control se aati hai — glamour se nahi. Revenue (har zameen ka kaagaz) aur Home (police) Culture ya Sports se kai guna bhaari hain. Isliye mantrimandal ki asli khabar naam nahi, **vibhag ka batwara** hoti hai.

4. Transfer-posting ki taakat ka asli istemaal kya hai (paisa nahi)?

Jawab: Har officer jaanta hai uski agli posting kis par depend karti hai — isliye woh **bina order ke** apne aap "sahi" faisle lene lagta hai. Mantri ko roz order dene ki zaroorat nahi padti; uska hona hi kaafi hai.

5. Officer mantri se ladta kyun nahi, aur uska sabse surakshit hathiyaar kya hai?

Jawab: Kyunki mantri 5 saal ka hai aur officer 30 saal ka — samajhdar officer waqt kaat deta hai. Sabse surakshit hathiyaar **der** hai (file ko technically zinda rakho, chalne mat do), kyunki dheema chalana kabhi pakda nahi ja sakta. Aur galat file par dastakhat officer ke hote hain, mantri ke nahi — isliye uska asli dar jaanch ka hai.

What this means for you

Do practical cheezein.

Ek: jab bhi koi sarkari kaam atka ho, yeh mat poocho "kaunse neta se kehlwayein." Yeh poocho: "**file kis table par hai, aur us aadmi ka dar kya hai?**" Aksar file sifarish se nahi rukti — woh officer ke dar se rukti hai. Uska dar hatao, file apne aap chalegi, aur kisi neta ki zaroorat hi nahi padegi.

Do: kisi bhi mantri ya officer ko samajhna ho toh position mat dekho, **vibhag aur posting** dekho. Mantri ka naam kam batata hai, uska vibhag sab batata hai. Aur officer ki niyat kuch nahi batati — yeh batata hai ki uski agli posting kiske haath mein hai.

Structure verified: ministers exercise executive authority within their departments, including transfer and posting decisions, while civil servants hold service protections and sign the file notings that carry audit and legal liability; Chief Ministers decide cabinet composition and portfolio allocation, and top postings (Chief Secretary, DGP, District Collectors) are state-government decisions. The "posting has a price" element is a long-standing, widely reported and repeatedly litigated allegation across states and parties — presented here as a reported mechanism, not as established fact about any individual. Portfolio weightings and officer-tactics descriptions are analytical patterns. Baban fictional.

17. Paise ka rasta — Delhi se gaon tak, aur beech ke haath

Ek nadi, ek naksha

Ab tak humne paisa kai jagah dekha: builder ka paisa (ch.4), chunav ka paisa (ch.8), sanstha ka paisa (ch.11), MPLADS (ch.15), vibhag ka budget (ch.16).

Aaj hum **ek hi nadi** ka poora rasta dekhenge — sarkari paisa. Woh kahan paida hota hai, kis-kis haath se guzarta hai, aur gaon tak pahunchte-pahunchte usme kya hota hai.

Yeh chapter is kitab ka sabse "systems" wala chapter hai. Iske baad har sarkari yojana ki khabar tumhe alag dikhegi.

Paisa aata kahan se hai

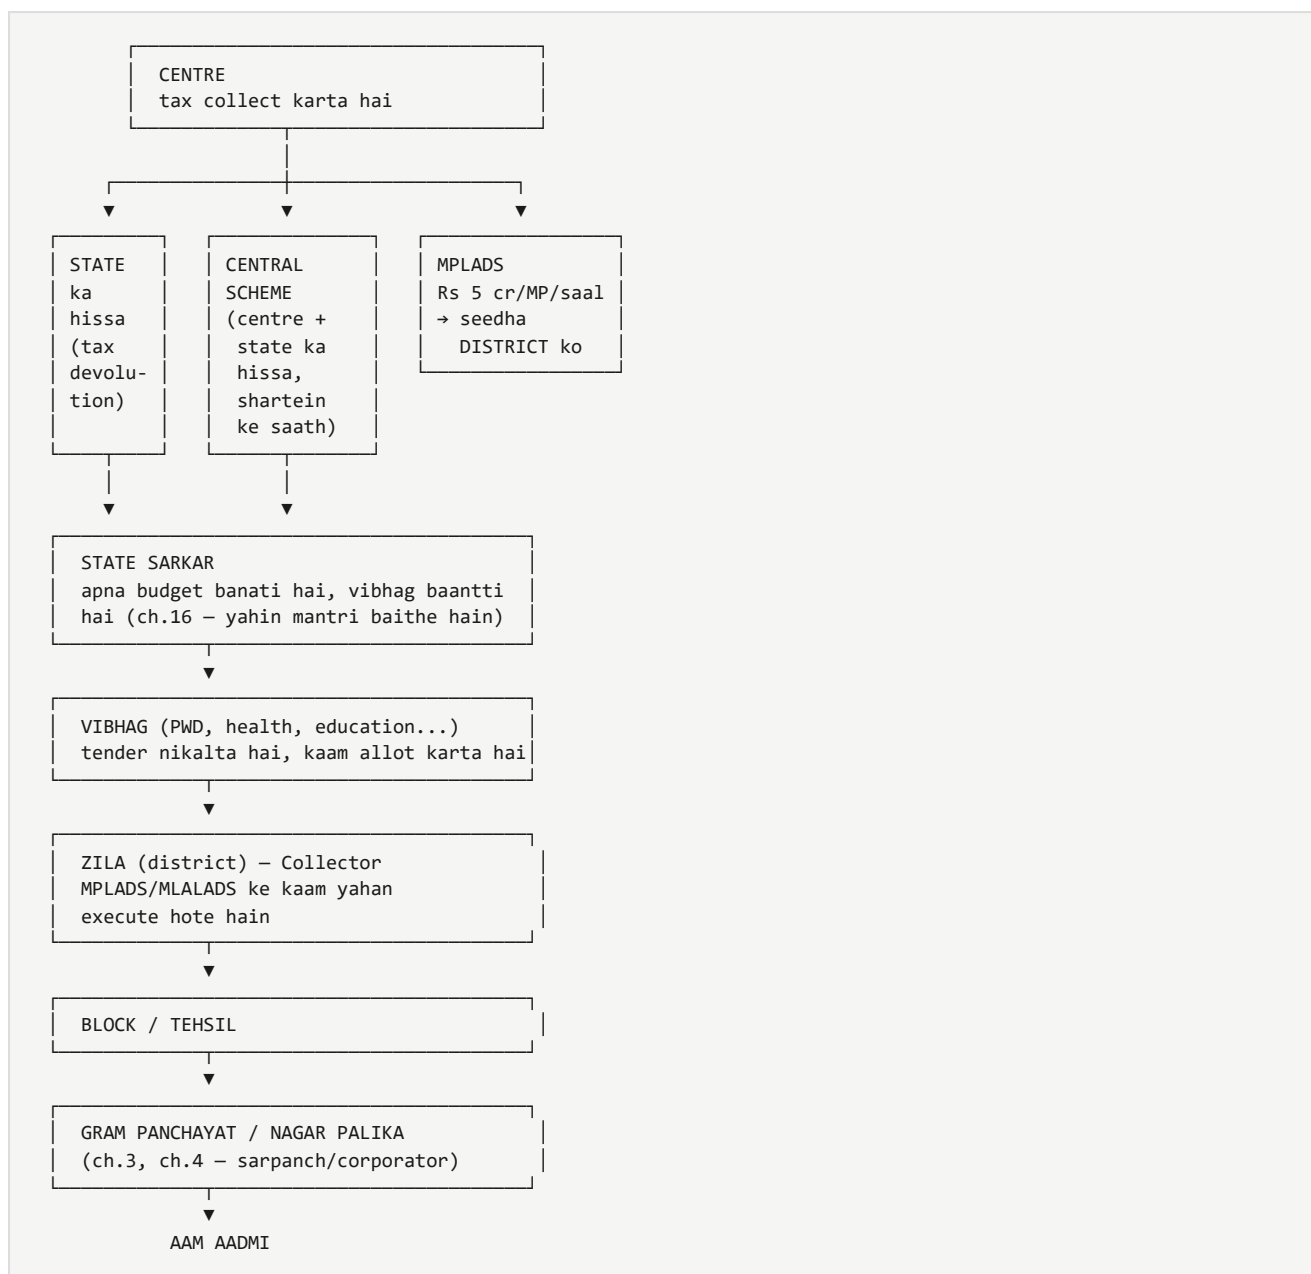

Sabse pehle source. Sarkar ke paas paisa aata hai:

CENTRE ka paisa	STATE ka paisa
- Income tax, corporate tax	- Sharab par tax (excise)
- GST ka centre wala hissa	- GST ka state wala hissa
- Customs	- Zameen/property par
- (aur udhaar)	stamp duty aur registration
	- Vehicle tax
	- (aur udhaar)

Ek baat yahan note karo, kyunki woh poori kitab se judti hai: **sharab aur zameen — do cheezein jo state ki kamai ka bada hissa hain — wahi do cheezein hain jinme politics ka sabse gehra lena-dena hai** (ch.8 ki funder list yaad karo: sharab, mining, zameen, builder). Yeh sanyog nahi hai. Jis cheez se sarkar kamati hai, us cheez par sarkar ka control hota hai — aur jis par control hai, wahi politics ko funding karti hai.

Paisa neeche kaise aata hai

Ab poori nadi, upar se neeche:

Ab is nadi ko dekhkar teen sawaal poocho. Yeh teen sawaal is chapter ka asli content hain.

Sawaal 1: har mod par kaun khada hai?

MOD	WAHAN KAUN KHADA HAI
Centre → State	Central mantri, MP ka asar (kaun sa state, kitna, kab)
State budget	CM aur Finance mantri (kis vibhag ko kitna)
Vibhag → tender	Vibhag ka mantri + officer (kaunsa kaam, kis niyam se)
Tender → thekedar	Officer + local neta (kis thekedar ko)
Zila mein execution	Collector + MLA/MP ki sifarish (kis gaon mein)
Gaon mein kaam	Sarpanch + thekedar (kaise bana, kitna bana)

Aur ab woh line jo poore chapter ka nichod hai:

Har mod par ek FAISLA hai, aur har faisle ke peeche ek aadmi hai. Paisa upar se neeche seedha nahi girta — woh har mod par ek aadmi se poochkar aage badhta hai. Aur jahan-jahan koi poochta hai, wahan-wahan taakat paida hoti hai.

Isliye poori kitab mein har neta ka kaam ek jaisa dikhta hai — chahe woh sarpanch ho ya CM. Sab ek hi cheez kar rahe hain: **apne mod par khade hokar yeh tay kar rahe hain ki paisa kis taraf mudega.**

Sawaal 2: paisa rasta bhar ghisata kyun hai

Ab honest baat. Jab Rs 100 upar se chalta hai, toh gaon tak Rs 100 nahi pahunchta. Kyun?

Do alag wajah hain, aur inko alag samajhna zaroori hai:

Wajah A — system ka kharcha (yeh chori nahi hai)

- Har level par staff, office, transport
- Survey, design, supervision
- Audit aur paperwork
- Aur der: paisa saal ke aakhir mein aata hai, kaam jaldi mein hota hai, quality girti hai

Yeh legal kharcha hai. Har bade sangathan mein hota hai.

Wajah B — leakage (yeh chori hai)

Yeh reported hai, aur iske teen aam roop hain:

1. KAAM KA "KAM" HONA
Kaagaz par 10 cm sadak, zameen par 6 cm.
Kaagaz par 100 bori cement, zameen par 70.
Yeh sabse aam hai kyunki pakadna mushkil hai –
sadak ke andar kaun dekhega?
2. FARZI KAAM
Kaagaz par bana, zameen par kuch nahi.
(Yeh kam hota hai kyunki pakda jaata hai)
3. NAKLI LIST
Beneficiary list mein aise naam jo hain hi nahi,
ya jinko milna nahi chahiye tha.
(Ch.3 yaad karo – sarpanch ke paas LISTS ki
taakat thi. Yeh wahi taakat hai, bade size mein.)

Aur ab sabse zaroori structural baat:

Leakage sabse zyada wahan hoti hai jahan (a) cheez naapna mushkil ho, aur (b) jisko milna tha usko pata hi na ho ki usko kya milna tha.

Isliye sadak aur building mein leakage aasan hai (kaun naapega?), aur seedha khaate mein aane wale paise mein mushkil (aadmi ko pata hai kitna aana tha).

Yehi wajah hai ki pichle kai saalon mein sarkar ne bahut si cheezein **seedha bank khaate mein** bhejni shuru ki. Woh technology ka faisla nahi tha — **woh is leakage-mechanism ka jawab tha.** Beech ke haath hata do, toh beech ka ghisav bhi hat jaata hai.

Sawaal 3: scheme ki khabar ko kaise padhein

Ab tumhare kaam ki cheez. Jab bhi koi khabar aaye — "sarkar ne 5,000 crore ki yojana ghoshit ki" — toh yeh 5 sawaal poocho:

1. YEH PAISA KISKA HAI?
Centre ka, state ka, ya dono ka (aur kis anupaat mein)?
Kyunki jiska paisa hai, uska credit hai – aur uska control bhi.
2. YEH KIS RASTE SE JAYEGA?
Vibhag ke through? District ke through? Seedha khaate mein? Har rasta alag taakat banata hai.
3. FAISLA KAUN KAREGA – "kis gaon mein"?
Yeh sabse important sawaal hai. Paisa bada ho ya chhota, asli taakat "kahan lagega" ke faisle mein hai.
4. KAB AAYEGA?
Ghoshna aur paisa aane mein aksar mahine-saal lagte hain. Chunav se pehle ki ghoshna aur chunav ke baad ka paisa – dono alag cheezein hain.
5. NAAP KAUN SAKTA HAI?
Agar koi naap nahi sakta, toh us paise ka anjaam pehle se pata hai.

Yeh 5 sawaal poochne ke baad tum har yojana ki khabar ko **structure** ki tarah padhoge, headline ki tarah nahi.

Ek aur cheez: paisa hamesha kam hi hota hai

Ek baat jo bahar wale kam samajhte hain: **har MLA ke ilaake ki demand hamesha budget se badi hoti hai.**

Ek MLA ke ilaake mein:
50-150 gaon
Har gaon mein: sadak, naali, paani, school ki
marammat, community hall, shamshan,
bijli ka transformer

Aur uske paas MLALADS ka chhota fund + vibhag mein
sifarish ka asar.

Matlab **woh sabka kaam kabhi nahi kar sakta** — chahe woh kitna hi imaandaar ho.

Aur jab resource kam ho aur demand zyada, toh distribution ka faisla **political** ho jaata hai apne aap. Woh kis gaon mein kaam bhejega? Wahan jahan uska block hai, jahan pichhli baar vote mila, jahan uska mukhiya hai.

Yeh corruption nahi hai. Yeh scarcity hai. Aur scarcity apne aap politics paida karti hai — kyunki jab sabko nahi mil sakta, toh "kisko milega" hi asli sawaal ban jaata hai.

Yeh baat samajh lo toh tum kisi bhi neta se milte waqt ek galti nahi karoge: usse yeh mat poochho ki "aapne yeh kyun nahi kiya." Woh sab nahi kar sakta. Poocho: "aap kis cheez ko pehle rakhte ho, aur kyun."

Contested corner

Kya seedha khaate mein paisa bhejna leakage ka hal hai?

- **Camp A:** Haan, aur yeh sabse bada sudhaar hai. Beech ke haath hat gaye. Jisko milna hai usko seedha milta hai aur usko pata hai kitna milna tha.
- **Camp B:** Aadha hal hai. Cash transfer un cheezon mein kaam karta hai jo paisa hain (pension, subsidy). Lekin sadak, school, aspataal — yeh cheezein cash nahi hain, aur unme purana system hi chalta hai. Aur upar se: list mein naam hona hi asli darwaza hai, aur woh list abhi bhi neech ke logon ke haath mein hai.

Dono sahi hain. Sabse imaandaar version: **cash transfer ne un jagah leakage kam ki jahan cheez naapi ja sakti thi. Jahan naapna mushkil hai, wahan kuch nahi badla.**

Incentive equation

CENTRE:

Chahta hai: apni scheme ka NAAM neeche tak jaye
(credit)
Isliye: har central scheme mein branding ki
shart hoti hai, aur state ko woh
chubhti hai

STATE:

Chahta hai: paisa mile lekin apne hisaab se kharch
karne ki azaadi
Aur: credit apna ho
Isliye: Centre-State ki ladai zyadatar
PAISE aur CREDIT ki ladai hai –
vichardhara ki nahi

MLA/MP:

Chahta hai: "kis gaon mein" ka faisla
Isliye: woh fund ke size se zyada uske
DISTRIBUTION ke haq ke liye ladta hai

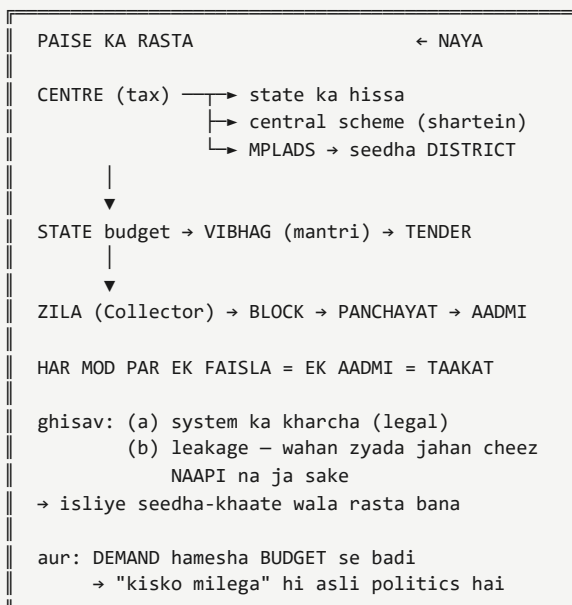

OFFICER:

Chahta hai: niyam ke andar rehna (uske dastakhat
hain – ch.16)
Isliye: woh der lagata hai, aur woh der system
ka sabse bada "kharcha" hai

AAM AADMI:

Usko poori nadi nahi dikhti. Usko sirf aakhri
mod dikhta hai – sarpanch, tehsildar.
Isliye: woh poore system ko us ek aadmi se
judge karta hai jo usne dekha

Master map — nadi juda

Baban ki kahani — part 17

Baban 56 ka. Uske gaon Nimgaon mein — jahan se woh 34 saal pehle nikla tha — ek sadak ka kaam mansoor hua. 2.8 kilometre. Uske purane ghar ke saamne se.

Usne pehli baar apni zindagi mein ek kaam ko **poore raste** follow kiya. Sirf jaanne ke liye.

Usne dekha:

- Yojana central thi, paisa centre aur state dono ka
- State ke vibhag ne district ko allot kiya
- District mein Executive Engineer ne estimate banaya
- Tender nikla. Teen thekedaar aaye.
(Baban ne teenon ke naam dekhe. Do ek hi aadmi ke the — bhai aur saala. Teesra "cover" ke liye tha.)
- Kaam mila. Kaam shuru hua.

Sadak bani. Uske purane padosi ne phone karke kaha: "bahut achhi bani hai."

Aath mahine baad usi padosi ne phir phone kiya: "kinare tootne lage hain."

Baban gaon gaya. Sadak dekhi. Aur usne woh cheez dekhi jo usne 30 saal se sun rakhi thi lekin kabhi apni aankh se nahi dekhi thi.

Sadak ke ek kinare par jahan mitti dhas gayi thi, wahan cross-section dikh raha tha. Uski moti layer kaagaz wali motai se saaf kam thi. Kitni kam, yeh koi engineer hi bata sakta tha. Lekin kam thi.

Baban ne kisi ko shikayat nahi ki. Usne sirf hisaab lagaya, aur register mein likha:

Aaj maine paise ko poora rasta chalte dekha. Centre se chala, state se guzra, vibhag se guzra, district se guzra, thekedaar tak aaya, aur zameen par pahuncha.

Har mod par kisi ne kuch nahi churaya — bas har mod par kisi ne apna FAISLA liya. Kaunsi yojana, kaunsa zila, kaunsa gaon, kaunsa thekedaar, kaunsa estimate. Aur har faisla thoda sa apne aadmi ki taraf jhuka.

Aakhir mein sadak 6 saal ki jagah 3 saal chalegi. Kisi ek aadmi ne bada paap nahi kiya. Sabne chhota-chhota jhukav diya, aur unka jod ek kamzor sadak ban gaya.

Aur do line neeche, jo poore chapter ka asli sabak thi:

Isliye "bhrashtachar" shabd galat hai. Woh ek bade chor ki tasveer banata hai. Asli cheez ek chor nahi hai — asli cheez 8 mod hain, aur har mod par ek aadmi jiske paas thoda sa faisla hai aur bahut sara dabav.

Ek chor ko pakadna aasan hai. 8 mod ko theek karna mushkil hai. Isliye yeh cheez 75 saal se chal rahi hai.

Aur aakhri line, jo usne apne college ke liye likhi:

Aur ab main khud us nadi mein khada hoon — mere college ko bhi grant mili hai. Ab mere paas bhi ek mod hai. Dekhte hain main kya karta hoon.

Self-test (pehle dimaag, phir check)

1. Paisa upar se neeche seedha kyun nahi girta, aur usse taakat kahan paida hoti hai?

Jawab: Har mod par ek faisla hai — kaunsa state, kaunsa vibhag, kaunsa tender, kaunsa thekedaar, kaunsa gaon. Har faisle ke peeche ek aadmi hai. Jahan-jahan koi "poochta" hai, wahan-wahan taakat paida hoti hai. Isliye sarpanch se CM tak sabka kaam ek jaisa dikhta hai.

2. Leakage sabse zyada kahan hoti hai?

Jawab: Wahan jahan (a) cheez **naapna mushkil** ho (sadak ki motai, cement ki bori) aur (b) jisko milna tha usko **pata hi na ho** kitna milna tha. Isliye sadak/building mein aasan, aur seedha khaate mein aane wale paise mein mushkil.

3. Seedha bank khaate mein paisa bhejna kis samasya ka jawab tha?

Jawab: Beech ke haath hataana. Jab aadmi ko pata hai kitna aana tha aur woh seedha aata hai, toh naapna aasan ho jaata hai. Lekin yeh sirf un cheezon mein kaam karta hai jo paisa hain (pension, subsidy) — sadak/school/aspataal mein purana system hi chalta hai.

4. Yojana ki khabar padhne ke 5 sawaal kaunse hain?

Jawab: (1) Paisa kiska hai (centre/state/dono)? (2) Kis raste se jayega? (3) "Kis gaon mein" ka faisla kaun karega? (4) Kab aayega? (5) Naap kaun sakta hai? Paanchwa sawaal anjaam bata deta hai.

5. "Scarcity apne aap politics paida karti hai" — kaise?

Jawab: Har MLA ke ilaake ki demand hamesha budget se badi hoti hai — woh sabka kaam kabhi nahi kar sakta, chahe kitna imaandaar ho. Jab sabko nahi mil sakta, toh "kisko milega" hi asli sawaal ban jaata hai — aur woh faisla apne aap political hota hai (apna block, apna mukhiya, apna vote).

What this means for you

Do cheezein.

Ek, khabar padhne ke liye: ab jab bhi koi yojana ki ghoshna dekho, headline mat padho — **rasta** padho. Paisa kiska, kis raste se, kaun tay karega ki kahan lagega, aur naap kaun sakta hai. In 4 jawabon se tumhe pata chal jayega ki woh yojana zameen par kya banegi.

Do, neta se milne ke liye: kisi bhi MLA/MP ki sabse badi rozana problem yeh hai ki **uske paas demand se bahut kam resource hai**, aur usko roz tay karna padta hai ki kisko na bole. Woh kaam nahi kar paane se utna pareshan nahi hota jitna is baat se ki **usko yaad nahi rehta kisko kya bola tha, aur kiska number ab aana chahiye**. Yeh uska roz ka dard hai — aur ise samajhne wala aadmi uske liye bahar wale se alag hota hai.

Verified: MPLADS funds (Rs 5 crore/year/MP) go directly to the district authority, with the MP recommending works to the District Collector — mplads.gov.in, [MPLADS guidelines](#). Centre-to-state transfers occur through tax devolution and centrally sponsored schemes with state cost-sharing and conditions; state revenue relies significantly on excise and land-related stamp duty/registration. Direct benefit transfer was introduced substantially to reduce intermediation in cash-type entitlements. Leakage mechanisms described (under-specification, ghost works, list manipulation) are documented categories in Indian audit and journalism, presented as patterns, not as claims about any specific project. Nimgaon road, thekedaars and Baban are fictional.

PART 5

The Forces

18. Jaat ka ganit — system ka sabse gehra variable

Pehle ek imaandaar baat

Yeh chapter mushkil hai — likhne mein bhi, padhne mein bhi.

Kyunki jaati ke baare mein do tarah ki baat hoti hai India mein. Ek — "jaati nahi honi chahiye" (yeh ek ichha hai). Do — "jaati se vote milta hai" (yeh ek ilzaam hai).

Yeh chapter dono nahi karega. Yeh chapter jaati ko **ek variable ki tarah** dekhega — kyunki agar tumhe machine samajhni hai, toh yeh us machine ka sabse gehra variable hai, aur ise chhodkar architecture adhoora rehta hai.

Main yahan yeh nahi keh raha ki yeh achha hai. Main yeh keh raha hoon ki **yeh hai**.

Yeh block itna majboot kyun hai

Chapter 2 mein humne dekha: akela vote bekaar, block sab kuch. Chapter 4 mein humne rule banaya: **jahan zaroorat sabse gehri, wahan block sabse pakka**.

Ab jaati ko us rule se naapo:

BLOCK KA TYPE	KITNA PAKKA	KYUN
Mohalla	dheela	log aate-jaate rehte hain
Union/association	medium	membership badalti hai
Bhasha/region	theek	pehchaan hai lekin rozana ka rishta nahi
Basti (ch.4)	pakka	roz ki zaroorat
JAATI/SAMUDAY	SABSE PAKKA	janm se marann tak, shaadi, rishtedaari, mandir, sankat mein sahara, aur roz ka samajik daayra

Yehi jawab hai. **Jaati ka block isliye sabse pakka hai kyunki woh block sirf vote ke liye nahi bana hai**. Woh pehle se maujood hai — shaadi ka daayra, rishtedaari, biradari ki panchayat, sankat mein madad, samajik pehchaan.

Politics ne yeh block banaya nahi. **Politics ne is block ko istemaal kiya, kyunki woh pehle se wahan tha aur sabse sasta tha**.

Ek line mein:

Neta ko block chahiye. Jaati ek ready-made block hai jise banane mein usko ek rupaya bhi nahi lagta.

Ganit kaise chalta hai

Ab practical. Ek seat ka jaati-ganit aisa dikhta hai (numbers kalpanik, structure asli):

EK VIDHAN SABHA SEAT – 3,00,000 voters				
Samuday A	75,000	(25%)	← sabse bada	
Samuday B	54,000	(18%)		
Samuday C	45,000	(15%)		
Samuday D	36,000	(12%)		
Chhote samuday	90,000	(30%)	← bikhre hue	
Jeetne ke liye chahiye: ~70,000 (ch.2 ka hisaab)				

Ab is table se poori strategy nikalti hai. Dekho kaise:

Chaal 1 — Sabse bade ka candidate banao. A ka candidate khada karo. Agar A ka 75-80% mila, toh 55,000-60,000 ho gaya. Baaki 10,000-15,000 kahin se jodo. **Sabse seedhi chaal, aur sabse aam.**

Chaal 2 — Gathbandhan (alliance) banao. B + D milakar 90,000. Agar dono ka 70% bhi mila toh 63,000. Isliye party B ka candidate degi lekin D ko kuch aur degi — koi pad, koi doosri seat, koi mantri pad.

Yeh baat samajhna zaroori hai: "jaati ki rajneeti" ka matlab sirf apni jaati ko bulana nahi hai. Zyada baar iska matlab GATHBANDHAN hai — do-teen samudayon ko ek chhat ke neeche laana.

Chaal 3 — Saamne wale ka block todo. Agar saamne wala A ka hai, toh A ka ek aur candidate khada karwa do (ch.2 ka vote-katwa). A ka 75,000 do hisson mein bata, aur tumhara 60,000 jeet gaya.

Chaal 4 — Bikhre huon ko jodo. Woh 90,000 "chhote samuday" — agar unhe ek saath laaya ja sake, toh woh sabse bada block hai. Yeh sabse mushkil chaal hai lekin sabse takatwar. Kai badi political success stories isi chaal par bani hain: **jo alag-alag chhote the, unko ek nayi badi pehchaan de do.**

Reservation — rule jo ganit badalta hai

Kuch seats SC/ST ke liye reserved hoti hain — wahan sirf us varg ka candidate lad sakta hai.

Ab dekho system ka behaviour (aur ch.3 ka "sarpanch pati" wala pattern dobara):

Reserved seat par:

- Candidate zaroor SC/ST hoga
- Lekin us seat ka VOTER ganit nahi badla – wahan bhi doosre samuday bade ho sakte hain
- Isliye jeetne wala candidate aksar woh hota hai jo apne varg ka hone ke saath-saath BADE samuday ko bhi sweekar ho

Nateeja (aur yeh contested hai):

Kuch log kehte hain isse SC/ST ka asli pratinidhitva kam ho jaata hai – kyunki jeetne wala apne varg se zyada bade samuday par nirbhar hai

Phir wahi sabak: **rule ne candidate ka varg tay kiya, lekin voter ka ganit nahi badla. Aur system ne dono ke beech apna raasta nikaal liya.**

Party aur jaati — kaun kiska istemaal kar raha hai

Ek aam sawaal: kya party jaati ka istemaal karti hai, ya jaati party ka?

Dono. Aur yeh do-tarfa rishta hi asli baat hai:

PARTY KA HISAAB:

Usko har seat par 70,000 chahiye. Sabse sasta raasta = ready-made blocks jodna. Isliye woh ticket dete waqt jaati dekhti hai (ch.7)

SAMUDAY KA HISAAB:

Unko chahiye ki sarkar mein unka aadmi ho – taaki naukri, admission, theke, aur police station mein unki sunwai ho (ch.10 ka favor economy)
Isliye woh apne aadmi ko vote dete hain

Aur dono sahi hain apni jagah par.

Yeh line dhyan se padho, kyunki yeh is chapter ki sabse zaroori baat hai:

Voter jaati ko isliye vote nahi deta ki woh "jaatiwadi" hai. Woh isliye deta hai kyunki uska anubhav yeh hai ki uska kaam tab hota hai jab uska aadmi kursi par ho. Yeh vishwas galat ho sakta hai — lekin woh anubhav se bana hai, nafrat se nahi.

Aur jis din kisi samuday ko lage ki "hamara aadmi bhi hamara kaam nahi karta", us din woh block hilne lagta hai. Yeh hota hai — aur yahi wajah hai ki jaati ka ganit har baar same nahi rehta.

Jaati akeli kaafi nahi hai

Ab balance. Log jaati ko "poora jawab" samajh lete hain. Woh galat hai, aur uske teen saboot hain:

1. Ek samuday hamesha ek taraf nahi jaata. Uske andar ameer-gareeb, sheher-gaon, alag upjaatiyan — sab alag vote kar sakte hain.

2. Lehar jaati ko kaat deti hai. Kuch elections mein sab ganit bekaar ho jaate hain (ch.19).

3. Aur sabse zaroori — jaati ganit ko MACHINE chahiye. Tumhare paas 75,000 ka block ho, lekin agar election ke din unko ghar se nikaalne wala koi nahi (ch.9), toh woh 75,000 kaagaz par hain, EVM mein nahi.

Jaati batati hai ki kaun tumhara ho SAKTA hai. Machine tay karti hai ki woh sach mein vote DEGA ya nahi.

Contested corner

Kya jaati ki rajneeti kam ho rahi hai?

- **Camp A (kam ho rahi hai):** Naye voter, sheher, education, aur bade national mudde jaati ke upar chale gaye hain. Bade wave elections mein jaati ke ganit tootte dikhe hain.
- **Camp B (roop badla hai):** Jaati khatam nahi hui — woh ab khulke nahi boli jaati, lekin ticket ke faisle mein, gathbandhan mein aur booth-level strategy mein pehle jaisi hi hai. Bas uski bhasha badal gayi hai.

Yeh ek genuinely khula sawaal hai aur ispe achhe log alag raay rakhte hain. **Sabse imaandaar version shayad yeh hai: jaati ab akeli kaafi nahi hai, lekin abhi bhi zaroori hai. Jo sirf jaati par lade woh haar sakta hai; jo jaati ko poori tarah ignore kare woh aksar haarta hai.**

Incentive equation

NETA:

Chahiye: 70,000 ka ganit

Milta hai: ready-made block, muft

Darr: apne hi samuday ka doosra neta khada ho
jaye (ch.2 vote-katwa) — isliye woh apne
samuday mein doosra ubharne nahi dena chahta

Isliye: samuday ke andar ki ladaai aksar doosre
samuday se ki ladaai se tez hoti hai

SAMUDAY KA MUKHIYA:

Deta hai: block

Paata hai: apne logon ke kaam + apni izzat +
"hum bhi ginti mein hain" ka ehsaas

Isliye: woh apne block ko jodkar rakhne mein
zinda hai (ch.2 ka mukhiya, gehre roop mein)

VOTER:

Uska tark: "mera aadmi kursi par hoga toh mera
kaam hoga"

Yeh anubhav se bana hai

Isliye: jab uska aadmi kaam nahi karta, toh
woh block dheere-dheere hilti hai

PARTY:

Uska tark: sabse sasta block wahi hai jo pehle
se bana hua hai

Isliye: ticket ke faisle mein jaati hamesha
table par hoti hai — chahe koi bole ya na bole

Master map — sabse gehri layer

Baban ki kahani — part 18

Baban 57 ka. Aur is saal usne apni zindagi ka sabse purana sawaal poocha — jo usne 40 saal se nahi poocha tha.

Uska samuday us zile mein na sabse bada tha na sabse chhota. Beech ka. Lagbhag 9-10%.

Aur ek din, apne ITI college ke office mein baithe hue, usne apne jeevan ka hisaab lagaya:

34 saal politics mein
11 booth se shuru, 3 wardon tak
90 parivaaron ki naukri
4,000+ ka credit society, ab 9,000
Do MLA campaign chalaye, teen jeete

Ticket: kabhi nahi

Aur usne pehli baar apne aap se poocha: **"agar main sabse bade samuday ka hota, toh kya mera ticket 20 saal pehle aa gaya hota?"**

Us raat usne register mein sabse mushkil entry likhi:

Jawab: shayad haan. Aur yeh soch ke mujhe gussa aata hai.

Lekin main imaandaar rahunga apne saath. Meri jaati ne mera raasta chhota kiya — yeh sach hai. Lekin mere paas ek aur sach bhi hai: maine 26 saal kisi aur ke naam par kaam kiya (ch.14). Woh galti meri thi, meri jaati ki nahi.

Aasan hota agar main sab kuch jaati ke sar daal deta. Lekin phir main woh galti kabhi na sudhaarta.

Do mahine baad ek ghatna hui jisne usko chapter ka doosra aadha sikhaya.

Uske zile mein sabse bade samuday ka ek naujawan neta uth raha tha — 30 saal ka, tez, achha bolne wala. Sab kehte the "yeh agla MLA hai."

Aur phir usi samuday ka ek doosra aadmi khada ho gaya. Purana, kam padha-likha, lekin uske paas 25 saal ka network tha.

Do mahine mein us samuday ke andar aisi ladai hui jo Baban ne kisi doosre samuday ke khilaf kabhi nahi dekhi thi. Panchayat mein jhagda, shaadiyon mein alag-alag baithak, mandir committee mein toot.

Naujawan neta ka ticket kat gaya. Purane ko mila. Aur woh haar gaya — kyunki naujawan ke log ghar baith gaye.

Baban ne register mein likha:

Aaj samajh aaya ki sabse badi jaati hona bhi surakshit nahi hai. Bade block mein hamesha DO log hote hain jo usko apna maante hain — aur unki ladai baaki sab se tez hoti hai.

Kyunki tumhara asli pratidwandi woh hai jo TUMHARE HI vote par daawa karta hai. Doosre samuday ka aadmi tumse vote nahi cheenta — woh tumhare paas tha hi nahi.

Aur aakhri line, jo poore chapter ka sabse thanda sach thi:

Jaati ka ganit bahar se ek deewar dikhta hai — "yeh log ek hain." Andar se woh ek AKHADA hai. Aur is akhade mein jeetne wala woh nahi hota jiska khoon sabse shuddh hai. Jeetne wala woh hota hai jiske paas machine hai (ch.5), khaata hai (ch.10), aur sanstha hai (ch.11).

Jaati tumhe darwaze tak le jaati hai. Andar wahi jaata hai jisne 20 saal kaam kiya ho.

Self-test (pehle dimaag, phir check)

1. Jaati ka block sabse pakka kyun hai?

Jawab: Kyunki woh vote ke liye bana hi nahi — woh pehle se maujood hai: shaadi ka daayra, rishtedaari, biradari panchayat, sankat mein sahara, samajik pehchaan. Neta ko ek ready-made block muft mein milta hai. Ch.4 ka rule yahan sabse gehra lagu hota hai: jahan zaroorat sabse gehri, wahan block sabse pakka.

2. "Jaati ki rajneeti" ka sabse aam matlab kya hai — sirf apni jaati bulana?

Jawab: Nahi, zyada baar **gathbandhan** — do-teen samudayon ko ek chhat ke neeche laana, kyunki akela ek samuday aksar 70,000 tak nahi pahunchta. Aur chauthi chaal (bikhre chhote samudayon ko ek nayi badi pehchaan dena) sabse mushkil aur sabse takatwar hai.

3. Voter apni jaati ko vote kyun deta hai — uska tark kya hai?

Jawab: Uska anubhav yeh hai ki uska kaam tab hota hai jab uska aadmi kursi par ho (ch.10 ka favor economy). Yeh nafarat se nahi, anubhav se bana vishwas hai. Aur jis din us samuday ko lage ki "hamara aadmi bhi hamara kaam nahi karta", block hilne lagta hai.

4. Jaati ka ganit akela kaafi kyun nahi hai?

Jawab: Teen wajah: (a) ek samuday ke andar bhi ameer-gareeb, sheher-gaon, upjaatiyan alag vote karti hain, (b) lehar ganit kaat deti hai (ch.19), (c) aur sabse zaroori — 75,000 ka block bina machine ke sirf kaagaz par hai. **Jaati batati hai kaun tumhara ho sakta hai; machine tay karti hai woh vote dega ya nahi.**

5. Sabse bade samuday ka hona bhi surakshit kyun nahi?

Jawab: Kyunki bade block par hamesha do log daawa karte hain, aur unki aapas ki ladai doosre samudayon se ki ladai se tez hoti hai — asli pratidwandi wahi hai jo tumhare hi vote par daawa karta hai. Andar jeetne wala shuddhta se nahi, machine + khaata + sanstha se jeetta hai.

What this means for you

Do baatein, dono practical.

Ek: kisi seat ko samajhna ho toh uska jaati-ganit dekhna zaroori hai — lekin uske baad **doosra sawaal zyada important hai:** "us block ke andar kitne daavedaar hain?" Ek seat jahan sabse bada samuday ek neta ke peeche hai, aur ek seat jahan wahi samuday teen logon mein bata hai — dono bilkul alag seats hain, chahe table par numbers same dikhein.

Do: kisi neta se milte waqt uski jaati ka zikr karna zaroori nahi hai aur aksar galat bhi hai. Lekin **uske dimaag mein woh table hamesha khuli hoti hai.** Jab woh apne ilaake ki baat kare, woh blocks ki

bhasha mein soch raha hoga — aur agar tum bhi blocks ki bhasha mein baat kar sako (bina jaati ka naam liye), toh woh samajh jaayega ki tum bahar ke aadmi nahi ho.

Note on this chapter: caste blocks, caste-based ticket arithmetic, community alliances, vote-splitting candidates and intra-community rivalry are extensively documented features of Indian electoral politics and are treated here analytically, as system variables. The seat table is illustrative with invented numbers; the structure is real. The debate over whether reserved constituencies weaken or strengthen substantive representation is genuinely contested in scholarship. No claim is made about any specific community's behaviour, and none of this is an endorsement. Baban and his district are fictional.

19. Lehar, media, WhatsApp — jahan naksha dhundhla hai

Yeh chapter alag hai

Ab tak har chapter ne tumhe kuch **bataya**. Yeh chapter tumhe kuch **nahi** batayega — aur wahi iska maqsad hai.

Kyunki ek sawaal aisa hai jisme 30-30 saal ke tajurbewale log ek doosre se ulta bolte hain:

Election sach mein jeetaata kya hai?

Is sawaal ka koi settled jawab nahi hai. Aur jo aadmi ispe pakka jawab deta hai, woh yaa toh kuch bech raha hai, yaa usne kaafi elections nahi dekhe.

Toh is chapter mein main tumhe **teen theories** dunga, teenon ka evidence dunga, aur phir batunga ki practitioners aakhir mein kya karte hain.

Yeh clarity ka ulta nahi hai. Yeh clarity ka sabse upar ka level hai — kyunki asli samajh yeh jaanne se aati hai ki kaunsa sawaal khula hai.

Theory 1: ZAMEEN — machine jeetati hai

Daawa: Election booth par jeeta jaata hai. Jiske paas 300 booth par apne log hain, jo apna voter ghar se nikaal sakta hai, wahi jeetta hai. Baaki sab shor hai.

Iske paksh mein: - Ch.9 ka ganit: 80,000 pakke samarthak par 60% vs 75% turnout ka antar 12,000 vote hai. Bahut si seats isse kam par tay hoti hain. - Wahi candidate, wahi party, wahi lehar — lekin do alag seats ke result alag aate hain. Antar zameen ka hota hai. - Har badi party pichhle dashak mein booth-level sangathan par zyada kharch kar rahi hai, kam nahi. Agar machine bekaar hoti toh yeh ulta hota.

Iske khilaf: - Kuch elections mein poori-poori machine wale log saaf ho gaye. Agar machine hi sab kuch hoti, toh 20 saal ke sangathan wale kabhi na haarte.

Theory 2: LEHAR — hawa jeetati hai

Daawa: Log candidate ko nahi, mahaul ko vote dete hain. Jab lehar chalti hai, tab machine, jaati, paisa — sab bekaar ho jaate hain. Log party ka nishaan dekh kar button dabate hain.

Iske paksh mein: - Wave elections mein aise log jeet jaate hain jinka naam bhi seat mein kisi ko pata nahi tha. Unke paas na machine thi, na khaata, na sanstha. - Aur usi baar bade-bade "unbeatable" neta haar gaye. - Yeh baar-baar hua hai, alag-alag saalon mein, alag-alag partiyon ke saath.

Iske khilaf: - Lehar har baar nahi aati. Zyadatar elections normal hote hain, aur normal elections mein zameen chalti hai. - Aur lehar ke andar bhi: kuch seats bach jaati hain. Kaun bachta hai? Aksar wahi jiske paas apna vote hai (ch.14).

Theory 3: MUDDA/KAAM — performance jeetati hai

Daawa: Voter ab dekhta hai ki kaam hua ya nahi. Sadak, paani, bijli, ration, gas, ghar — jo sarkar deti hai, uska hisaab hota hai.

Iske paksh mein: - Jin sarkaron ne dikhne wali cheezein di hain (bijli, sadak, seedha khaate mein paisa — ch.17), unhone dobara jeeta hai kai baar. - Aur incumbency har jagah anti nahi hai — kai sarkarein dobara aayi hain.

Iske khilaf: - Bahut se achha kaam karne wale MLA haar jaate hain aur bahut se nikamme jeet jaate hain (ch.10 ka contested corner). - Aur "kaam" ka credit aksar upar chala jaata hai — MLA kaam karta hai, credit CM ya PM ko milta hai. Toh local performance ka reward local aadmi ko milega, yeh pakka nahi.

Ab WhatsApp aur digital — naya kya hai

Ab 2026 ki layer. Yahan bhi do camp hain, aur pehle honest structure samajh lo:

Jo sach mein badla hai:

1. RAFTAAR
Pehle ek baat gaon tak pahunchne mein din lagte the. Ab minute lagte hain.
2. KHARCHA
Ek video banakar 50,000 logon tak pahunchna ab lagbhag muft hai. Pehle iske liye rally, gaadi, poster chahiye tha.
3. PARTY KA APNA CHANNEL
Pehle party ki baat akhbaar/TV se hokar jaati thi. Ab party seedha logon ke phone tak pahunch sakti hai – beech mein koi nahi.
4. DATA
Voter list + phone number + local information ka jod. Ab yeh naapa aur target kiya ja sakta hai.
5. AUR SABSE ZAROORI – MACHINE KA UPGRADE
Yeh sabse kam samjha jaata hai. WhatsApp ne karyakarta ki jagah nahi li – usne karyakarta ko TEZ kar diya. Ab booth pramukh ko har din ki line, har din ka message, aur har din ka kaam phone par milta hai. Machine wahi hai, uska nervous system naya hai.

Jo nahi badla:

1. Vote abhi bhi ghar se nikalna padta hai.
Koi message aadmi ko booth tak nahi le jaata – aadmi le jaata hai (ch.9).
2. Bharosa abhi bhi aadmi se aata hai. Gaon mein log message par utna vishwas nahi karte jitna us aadmi par jo woh message lekar aaya.
3. Aur sabse badi baat: digital ne machine ko REPLACE nahi kiya. Jinke paas machine hai, unka digital kaam karta hai. Jinke paas nahi, unke liye woh sirf shor hai.

Aur ek naya khatra jo pehle nahi tha:

Galat khabar (misinformation) ab utni hi tez failti hai jitni sahi. Aur woh ilaake-ilaake mein alag hoti hai – jo baat ek gaon ke group mein chal rahi hai, woh doosre gaon mein nahi. Isliye ab campaign ko woh cheez ladni padti hai jo **dikhti hi nahi**.

EVM – chhoti, imaandaar baat

Yeh sawaal is chapter mein aana chahiye kyunki log ise "kya jeetaata hai" ke saath jodte hain.

- Machine se voting hoti hai, VVPAT parchi voter ko dikhti hai aur box mein girti hai; kuch booths ki parchiyon ka milaan bhi hota hai.
- Ilzaam lage hain; EC aur adaalat ne bar-bar iski jaanch ki hai.
- **Is kitab ka position:** yeh ek contested public bahas hai aur main ise settle nahi karunga.

Lekin ek architectural baat pakki hai, jo bahas se alag hai aur ch.9 mein bhi thi:

Jis party ke paas booth par apne log nahi hain, woh kisi bhi system mein — kaagaz ya machine — kamzor rahegi. Technology gawaah ki zaroorat khatam nahi karti.

Toh practitioner karta kya hai

Ab sabse kaam ki baat. Agar teeno theories mein sach hai, toh zameen par log kya karte hain?

Woh teeno maante hain, alag-alag anupaat mein:

NORMAL ELECTION (koi badi lehar nahi):
zameen (machine) ██████████ sabse bhaari
mudda/kaam ██████
hawa █████

WAVE ELECTION:
hawa ██████████ sab kuch kha jaati hai
zameen ██████ (bas bachav karti hai)
mudda █████

Aur problem yeh hai: PATA NAHI CHALTA ki yeh
wave election hai ya normal — jab tak result na aaye.

Aur isliye har samajhdar candidate ek hi strategy chalata hai:

Machine par kaam karo jaise lehar aayegi hi nahi. Aur narrative par kaam karo jaise machine kaafi nahi hogi. Kyunki tumhe pehle se nahi pata ki is baar kaunsa election hai.

Yeh strategy inefficient hai — dono jagah kharcha hota hai. Lekin yeh **rational** hai, kyunki uncertainty asli hai.

Contested corner (poora chapter hi contested hai, toh yahan sabse gehra)

Kya karyakarta ka zamana khatam ho raha hai?

- **Camp A:** Haan. Naya ladka 5 saal muft kaam nahi karega jab uske paas naukri aur Instagram dono hain. Ab paisa aur digital hi machine hai.
- **Camp B:** Nahi. Jo party booth-level sangathan sabse achha banati hai, wahi jeetti hai — aur yeh pichle dashak mein zyada sach hua hai, kam nahi. Digital ne machine ko badla hai, hataya nahi.

Beech ka version, aur shayad sabse imaandaar: karyakarta ka **fuel** badal raha hai. Purana fuel tha "umeed + pehchaan" (ch.5). Naye ladke ke liye woh kam kaam karta hai — usko zyada seedha fayda chahiye. Isliye machine ab pehle se **mehngi** hoti ja rahi hai. Woh khatam nahi ho rahi; uska rate badh raha hai.

Incentive equation

CANDIDATE:

Nahi jaanta: yeh wave election hai ya normal
Isliye: dono par kharch karta hai (machine + narrative). Inefficient lekin rational.

PARTY (bade level par):

Uske paas narrative banane ki taakat hai (national campaign, media, digital)
Isliye: party lehar par kaam karti hai, candidate zameen par – aur dono ek doosre ko blame karte hain jab haarte hain

KARYAKARTA:

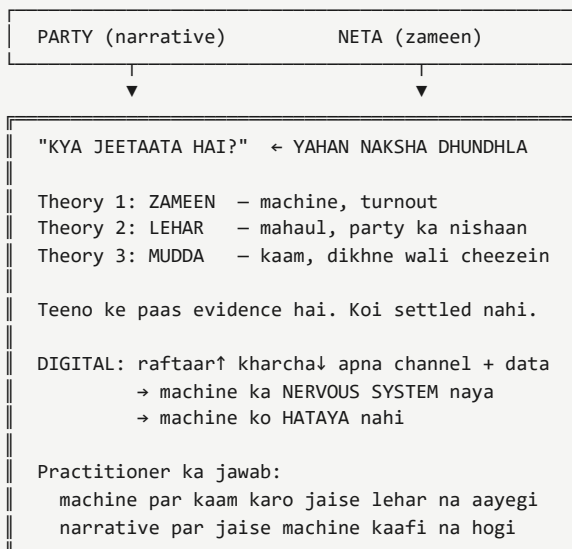

Naya fuel maang raha hai (seedha fayda)
Isliye: machine mehngi ho rahi hai

CONSULTANT/VENDOR:

Woh hamesha kehta hai ki uska wala factor decisive hai (data wala data kahega, ground wala ground)
Isliye: is sawaal par kisi vendor ki baat ka weight kam rakhna

Woh aakhri box practical hai. Jab bhi koi tumse kahe "aaj kal elections X se jeete jaate hain," pehle poocho: **X bechne wale kaun hain?**

Master map — dhundhli layer

Baban ki kahani — part 19

Baban 57 ka. Aur us saal ek 26 saal ka ladka uske paas kaam maangne aaya — Sameer. Laptop, phone, aur ek presentation.

Sameer ne kaha: "Dada, aapka tareeka purana hai. Ab main aapko dikha sakta hoon ki kaunse booth par kaunsa mudda chal raha hai, kis ghar mein kitne voter hain, aur kis message ka kya asar hua."

Baban ne poori presentation dekhi. Phir usne ek sawaal poocha:

"Booth number 114 — Shivaji Nagar. Wahan 780 vote hain. Tumhara data kya kehta hai?"

Sameer ne screen dekhi: "612 households mapped, 71% reachable, top issue: water supply."

Baban ne kaha: "Theek. Ab main batata hoon. Us booth mein 780 vote hain, lekin 40 ghar ek hi khaandaan ke hain aur unka mukhiya Ganesh hai. Ganesh ki ladki ki shaadi pichhle saal atki thi kyunki ladke wale dahej mein gaadi maang rahe the. Maine woh mamla settle karwaya tha. Us din se woh 40 ghar mere hain — chahe koi bhi khada ho, chahe paani aaye ya na aaye."

Sameer chup ho gaya.

Baban ne aage kaha, aur bina taunt ke kaha: "Tumhara data mujhe batata hai ki wahan 780 log hain aur unko paani chahiye. Yeh mujhe pehle se pata hai. **Tumhara data mujhe yeh nahi batata ki kis ghar mein kis aadmi ka ehsaan hai.** Aur election us ehsaan se chalta hai, us paani se nahi."

Sameer ne kaha: "Toh mera kaam bekaar hai?"

Aur ab Baban ne woh kiya jo usne apni zindagi mein pehle kabhi nahi kiya tha — usne apni hi baat ko kaata.

"Nahi. Baith."

Usne register nikala, purane wala. Aur bola:

"Mere paas 34 saal ka hisaab hai, lekin woh MERE dimaag mein hai aur is copy mein. Jis din main mar jaunga, yeh sab khatam. Aur ek aur baat — main 11 booth theek se jaanta tha. Ab mere paas 40 booth ka kaam hai aur main sach bataun toh mujhe 40 booth ka detail yaad nahi rehta. **Main bhool raha hoon, aur yeh mujhe kisi ko batana nahi hai.**"

"Tumhara laptop mere dimaag ki jagah nahi le sakta. Lekin woh meri COPY ki jagah le sakta hai. Aur agar tum us copy mein woh column bana sako jo maine 40 saal pehle banaya tha — 'word ka pakka?' — toh tumhara data kaam ka ho jayega."

Us raat register mein:

Sameer galat nahi hai aur main bhi galat nahi hoon. Woh dekh sakta hai ki KITNE log hain. Main jaanta hoon ki KAUN kis ka hai. Dono zaroori hain.

Lekin ek farak hai jo mere haq mein nahi jaata: mera gyaan mere saath khatam ho jayega, uska gyaan file mein rahega. Aur jo cheez likh li jaati hai, woh agli peedhi ko mil jaati hai.

Maine 34 saal apna sabse keemti maal apne dimaag mein rakha, isliye ki wahi meri suraksha tha. Aur usi wajah se woh kabhi kisi ko de nahi paya.

Aur aakhri line, jo poore chapter ka nichod thi:

Naya tareeka purane ko nahi harata. Naya tareeka purane ko TEZ karta hai. Jo aadmi sirf naya jaanta hai, uske paas raftaar hai lekin pata nahi kahan jaana hai. Jo sirf purana jaanta hai, usko rasta pata hai lekin woh dheere chalta hai — aur ek din woh bhoolne lagta hai.

Self-test (pehle dimaag, phir check)

1. "Kya jeetaata hai" ki teen theories aur unka core daawa?

Jawab: (1) **Zameen** — machine aur turnout; jo apna voter nikaal sakta hai wahi jeetta hai. (2) **Lehar** — mahaul; jab hawa chalti hai toh machine/jaati/paisa sab bekaar. (3) **Mudda/kaam** — voter dikhne wali cheezon ka hisaab karta hai. Teenon ke paas evidence hai; koi settled nahi.

2. Practitioner is uncertainty ka kya jawab deta hai?

Jawab: "Machine par kaam karo jaise lehar aayegi hi nahi, aur narrative par jaise machine kaafi nahi hogi." Kyunki pehle se pata nahi chalta ki yeh wave election hai ya normal — result se pehle koi nahi jaanta. Dono par kharch inefficient hai lekin rational hai.

3. Digital ne machine ke saath kya kiya — replace ya upgrade?

Jawab: Upgrade. Usne machine ka **nervous system** badla (raftaar, kharcha, apna channel, data, booth pramukh ko rozana line). Lekin vote abhi bhi ghar se nikalna padta hai aur bharosa abhi bhi aadmi se aata hai. Jinke paas machine hai unka digital kaam karta hai; jinke paas nahi, unke liye woh shor hai.

4. Karyakarta system ke baare mein sabse imaandaar version kya hai?

Jawab: Woh khatam nahi ho raha — uska **fuel** badal raha hai. Purana fuel (umeed + pehchaan) naye ladke par kam kaam karta hai, usko seedha fayda chahiye. Isliye machine mehngi hoti ja rahi hai, gayab nahi ho rahi.

5. Jab koi kahe "aaj kal elections X se jeete jaate hain" toh pehla sawaal kya?

Jawab: "X bechne wale kaun hain?" Data wala data ko decisive kahega, ground wala ground ko. Is sawaal par vendor ki baat ka weight kam rakho.

What this means for you

Yeh chapter tumhe ek cheez de raha hai jo baaki kitab se ulti lagti hai: **yahan pakka mat bolna.**

Agar kisi neta ke saamne tum kaho "sir, aaj kal toh sab digital se hota hai" ya "sir, ground hi sab kuch hai" — dono mein se koi bhi line tumhe bahar ka aadmi bana degi, kyunki har tajurbewale aadmi ne dono ke exceptions dekhe hain.

Andar ka aadmi kya kehta hai? Woh kehta hai: "**depend karta hai — is baar hawa kaisi hai?**" Yeh ek line poore chapter ka summary hai, aur wahi line tumhe us kamre mein us aadmi jaisa banati hai jisne kaafi elections dekhe hain.

Aur agar tum kabhi is duniya ke liye kuch banao: Baban aur Sameer dono ki baat yaad rakhna. Data yeh bata sakta hai ki **kitne** log hain. Woh abhi tak yeh nahi batata ki **kaun kiska hai** — aur election usi doosri cheez par chalta hai. Jo us gap ko bhar dega, uske paas is duniya ki sabse keemti cheez hogi.

Note: this chapter deliberately does not adjudicate. The relative weight of organisation, wave and performance in Indian elections is genuinely contested among scholars and practitioners, with real evidence cited on multiple sides; the same is true of the effect of digital campaigning and of the EVM debate. Descriptions of what digital changed (speed, cost, direct channels, data, booth-level coordination) are structural and widely observed. Baban and Sameer are fictional.

20. Careers ki maut — jo galtiyan system ke niyam dikhati hain

Ulta padhne ka faayda

Ab tak humne dekha ki careers kaise **bante** hain. Aaj dekhenge ki woh kaise **khatam** hote hain.

Wajah sirf yeh nahi ki failure dilchasp hai. Wajah yeh hai:

Har system ka asli niyam tab dikhta hai jab koi usse todta hai. Jab tak sab theek chal raha hai, niyam invisible rehte hain.

Yeh chapter 6 maut dikhayega. Har ek ke peeche ek niyam hai jo humne pehle padha — aur ab woh niyam saabit hoga.

Maut 1: Machine ke bina jeetna

Kahani ka aakar: Lehar aayi. Ek aadmi jeet gaya jiske paas na machine thi, na khaata, na sanstha. Party ka nishaan tha aur hawa thi.

Phir 5 saal mein kya hua:

Saal 1: Woh khush hai. Log aa rahe hain.
Saal 2: Log kaam maang rahe hain. Uske paas karyakarta nahi hain jo unke kaam dekhein. Woh khud sab nahi kar sakta.
Saal 3: Log kehne lage "yeh milta nahi hai." Uske ilaake ke chhote neta doosri taraf dekhne lage.
Saal 4: Party ke survey mein uska naam neeche.
Saal 5: Ticket kata — ya mila aur haar gaya.

Niyam jo saabit hua (ch.5, ch.9):

Lehar tumhe kursi de sakti hai. Lehar tumhe machine nahi de sakti. Aur bina machine ke kursi ek udhaar hai jiska bill 5 saal baad aata hai.

Yeh sabse aam maut hai. Har wave ke baad agli baar mein aise bahut se log gayab ho jaate hain.

Maut 2: Ticket kata, aur bagawat galat ki

Kahani ka aakar: 20 saal ka wafadaar. Ticket kat gaya (ch.7). Gusse mein nirdaleeya khada ho gaya.

Do anjaam hote hain, aur farak ek hi cheez se aata hai:

AGAR uske paas APNA vote tha (ch.14):

- woh 40-60,000 le gaya
- apni hi party ka candidate hara diya
- party ko dikha diya ki "mere bina yeh seat nahi"
- 5 saal baad party usko wapas le aayi,
aur is baar ticket diya

AGAR uske paas party ka vote tha:

- woh 8,000 par simat gaya
- party ne dekh liya ki iski keemat kya hai
- aur ab woh party ke liye bhi bekaar hai
(kyunki usne bagawat ki thi)
- khatam. Dono taraf se.

Niyam (ch.14):

Bagawat ek TEST hai jo tum apne upar khud lete ho, aur uska result public hota hai. Agar tumhare paas apna vote hai toh bagawat bargaining hai. Agar nahi hai toh bagawat aatmahatya hai.

Aur sabse kroor baat: bagawat se pehle tumhe khud nahi pata hota ki tumhare paas kya hai. Isliye log galat andaza lagate hain — aur ek baar lagane ke baad wapas nahi le sakte.

Maut 3: Galat gut chuna

Kahani ka aakar: Do gut the. Usne ek chuna — soch samajh kar, wafadaari se. Uska gut party ke andar haar gaya (ch.12).

Phir:

- Uska mantri se rishta khatam
- Uske ilaake ke transfer doosre gut ke hisaab se
- Uske project "review" mein
- Uske karyakarta dheere-dheere doosri taraf
(kyunki unko kaam chahiye — ch.5)
- 5 saal mein machine aadhi

Aur yahan sabse kroor cheez: **usne kuch galat nahi kiya tha.** Usne sirf ek taraf chuna, aur woh taraf haar gayi.

Niyam (ch.12):

Gut chunna zaroori hai (akela aadmi nanga hai), lekin gut chunte waqt tum apna bhavishya kisi aur ke haath mein de dete ho. Aur uske haarne par tumhari seat par kiya hua kaam tumhe nahi bachayega.

Isliye tajurbewale log kya karte hain? Woh gut mein rehte hain lekin **doosri taraf ka darwaza band nahi karte**. Bahar se yeh do-moocha lagta hai. Andar se yeh survival hai. (Aur haan — Tatya wali galti bhi yaad rakhna, ch.2: dono taraf khulke haan bol dena alag baat hai aur usme bhaav girta hai. Farak "rishta rakhna" aur "waada karna" ka hai.)

Maut 4: Kursi chali gayi, aur peeche kuch nahi tha

Kahani ka aakar: Do term ka MLA. Achha kaam kiya. Paisa bhi banaya. Lekin sab kuch **kursi ke saath juda** tha — koi sanstha nahi, koi permanent base nahi (ch.11).

Haarne ke baad:

Mahina 1:	log abhi bhi aate hain
Mahina 3:	bheed aadhi
Mahina 6:	phone uthna kam. Uske apne PA ne doosri naukri dhoondh li
Saal 1:	uske purane karyakarta naye MLA ke saath dikhte hain
Saal 2:	woh shaadi-mayyat mein jaata hai aur usko aage nahi bithate

Aur woh aadmi ab kya kar sakta hai? Uske paas na naukri hai, na dhandha, na sanstha. Sirf ek pehchaan hai jo dheere-dheere mit rahi hai.

Niyam (ch.11):

Taakat udhaar ki cheez hai. Sanstha apni cheez hai. Jisne taakat ko sanstha mein nahi badla, uski poori zindagi ek 5-saal ke lease par thi.

Aur yeh maut sabse dukh bhari isliye hai kyunki **uska waqt tha aur usne dhyan nahi diya**. Woh 10 saal kursi par tha. Woh kar sakta tha.

Maut 5: Beta nahi sambhaal paya

Kahani ka aakar: Bade neta ne 30 saal ka saamraajya banaya — sanstha, machine, khaata, sab. Beta ko diya (ch.14).

Aur beta doob gaya. Kyun?

Baap ne 30 saal mein network banaya – matlab usne 30 saal LOGON KE KAAM kiye. Har rishta usne khud banaya tha.

Beta ko network MILA. Usne banaya nahi.

Aur network ek cheez nahi hai – woh RISHTON KA JOD hai. Rishta transfer nahi hota; sirf uski LIST transfer hoti hai.

Beta list ke logon ko phone karta hai. Woh log aate hain – pehli baar baap ki wajah se. Doosri baar? Ab beta ko khud kuch karna hoga.

Aur agar woh nahi kar paya – kyunki usne kabhi subah 7 baje darbar mein nahi baitha, kabhi mayyat mein 4 ghante gaadi nahi chalayi – toh list 3 saal mein khali ho jaati hai.

Niyam (ch.10, ch.14):

Ehsaan ka khaata transfer hota hai. Ehsaan banane ki AADAT transfer nahi hoti. Aur khaata kharch hota rehta hai — agar naya jama nahi hua toh woh khali ho jaata hai.

Isliye kuch dynasty chalti hain aur kuch teen saal mein baith jaati hain. Farak paisa nahi hai — farak yeh hai ki bete ne kaam seekha ya sirf virasat li.

Maut 6: Zamana badal gaya, aadmi nahi

Kahani ka aakar: 25 saal ka mazboot neta. Machine solid, khaata bhara, sanstha chalti hui. Aur phir uske ilaake ka ganit hi badal gaya:

- Naya industrial area aaya, bahar se log aa base (uske purane blocks ka anupaat gir gaya)
- Naye ladke naukri ke liye sheher gaye – unka gaon ke mukhiya se rishta khatam
- Uske samuday ka ek naya, tez neta uth gaya
- Aur mudde badal gaye: uska "sadak-paani" wala pitch naye voter ke liye purana ho gaya

Usne wahi kiya jo 25 saal se kar raha tha. Aur woh ab kaam nahi kiya.

Niyam (ch.19):

Har machine ek KHAAS zamane ke liye tune ki jaati hai. Jo cheez tumhe 25 saal chalati hai, wahi cheez tumhe ek din marti hai — kyunki tum usse chhodne ko tayyar nahi hote jisne tumhe banaya.

Aur ek maut jo dikhti nahi: dheere-dheere wali

Upar ki 6 mein se har ek dramatic hai. Lekin sabse aam maut dramatic nahi hoti:

Aadmi jeetta rehta hai, lekin har baar margin kam
hota jaata hai.
Woh dekh raha hai lekin maan nahi raha.
Uske do-teen achhe log chale gaye aur usne naye
nahi banaye.
Uski sanstha chal rahi hai lekin badh nahi rahi.
Aur ek din woh 4,000 vote se haar jaata hai –
aur sab kehte hain "achanak kaise?"

Achanak kuch nahi hua. 10 saal se ho raha tha.

Yeh sabse aam maut hai, aur sabse kam likhi jaati hai.

Contested corner

Kya political career bachaya ja sakta hai?

- **Camp A:** Haan. Jo aadmi waqt par pehchaan le — sanstha bana le, beta tayyar kar le, naye logon ko jagah de de — woh generations chal jaata hai. Bahut se parivaar chal rahe hain.
- **Camp B:** Nahi, aakhir mein sab girta hai. Har base kabhi na kabhi purana ho jaata hai, aur nayi peedhi purane ko nahi maanti. Bas kuch der zyada chal lete hain.

Beech ka sach: koi permanent nahi hai, lekin **umar bahut alag ho sakti hai** — 5 saal se 50 saal tak. Aur woh farak in chapters mein likhi cheezon se banta hai, kismat se nahi.

Incentive equation — maut ke waqt

NETA (girta hua):
Uska sabse bada dushman: INKAAR (denial)
Kyunki maanne ka matlab hai ki uski poori
pehchaan hil rahi hai
Isliye: woh aksar aakhri tak yeh kehta hai
"is baar ganit alag tha"

USKE LOG:
Woh pehle jaante hain — kyunki zameen par
woh hain
Lekin woh usse bata nahi sakte, kyunki bure
samachar lane wala aadmi pehle nikala jaata hai
Isliye: girta hua neta hamesha SABSE AAKHIR
mein jaanta hai

PARTY:
Uske paas survey hai — usko pehle pata chal
jaata hai
Isliye: ticket ka faisla aksar neta ke
apne andaze se pehle ho jaata hai

NAYA AADMI:
Yeh uska mauka hai. Har girti hui machine
ke tukde kisi na kisi ke paas jaate hain

Woh doosra box sabse gehra hai. **Girta hua aadmi sabse aakhir mein jaanta hai** — kyunki uske aas-paas ke log usse sach nahi bata sakte. Yeh sirf politics mein nahi hota; yeh har sangathan mein hota hai.

Master map — poora chakra

CAREERS KI MAUT

← NAYA

1. lehar se jeeta, machine nahi banayi
→ bina machine ki kursi = 5 saal ka udhaar

2. bagawat galat ki
→ apna vote hai? bargaining. nahi? khatam.

3. galat gut chuna
→ seat par kiya kaam tumhe nahi bachayega

4. sanstha nahi banayi
→ taakat udhaar, sanstha apni

5. beta list le paya, AADAT nahi
→ khaata kharch hota hai, jama nahi hua

6. zamana badla, aadmi nahi
→ jo chalata hai wahi ek din maarta hai

+ SABSE AAM: dheere-dheere wali maut
(margin girta raha, kisi ne sach nahi bola)

Baban ki kahani — part 20

Baban 58 ka. Aur us saal uske MLA — 30 saal ka saath — chale gaye.

Bimari lambi thi. Aakhri do mahine woh ghar par the.

Baban roz jaata tha. Aur usne wahan woh dekha jo poore chapter ka sabse gehra sabak tha.

Pehle mahine: ghar ke bahar 30-40 log roz. Neta log, karyakarta, thekedaar. Gaadiyaan.

Doosre mahine: 8-10 log.

Aakhri hafte: ghar par sirf parivaar tha, do purane karyakarta, aur Baban.

Ek shaam MLA ne — bahut kamzor awaaz mein — Baban se kaha:

"Baban, main sochta tha mere 5,000 aadmi hain."

Baban chup raha.

"Aaj ginta hoon toh 6 nikalte hain."

Baban ne kaha: "Sahab, woh 5,000 aapke aadmi the. Woh aapki KURSI ke aadmi the. Kursi chali gayi toh woh chale gaye. Aur yeh unki galti nahi hai — unko bhi apna kaam karwana hai, aur ab woh kisi aur ke paas hoga."

MLA hansa — dheere se. Bola: "Tu hamesha sach bolta tha. Isliye maine tujhe ticket kabhi nahi diya."

Baban chaunk gaya. 30 saal mein pehli baar yeh baat khulke aayi.

MLA ne aage kaha: "Tu jaanta tha ki asli ginti kya hai. Tu 14 ki jagah 6 bolta. Aur is dhandhe mein jo aadmi sach bolta hai, usse log kursi nahi dete — usse log kaam karwate hain. **Sach bolne wala aadmi zaroori hota hai, lekin usko upar nahi jaane dete. Kyunki upar wale ko jhooth chahiye — apne baare mein.**"

Do hafte baad woh chale gaye.

Antim yatra mein 4,000 log the. Do mantri aaye. Akhbaar mein photo aaya.

Baban peeche khada tha. Aur usne dekha ki woh 4,000 log — jinme se zyadatar 6 mahine se ghar nahi aaye the — sab wapas aa gaye the. Ek din ke liye.

Us raat register mein, sabse lambi entry:

Aaj sab wapas aaye the. Aur kal koi nahi aayega.

Maine 30 saal is aadmi ka kaam kiya. Woh achha aadmi tha. Aur woh isliye nahi dooba ki usne kuch galat kiya — woh isliye dooba ki uske paas kursi ke alawa kuch nahi tha. Uska college tha, haan — lekin woh bhi usne bete ke naam par rakha, apne network ko usse joda nahi. Do cheezein alag-alag chalti rahi.

Aur maine aaj 6 tarah ki maut ek saath dekhi: - uske paas machine thi, lekin machine uski kursi se judi thi, uske naam se nahi - usne gut chuna aur woh gut haara - usne sanstha banayi lekin usko apne network se nahi joda - uska beta list leke aaya, aadat nahi - zamana badal gaya aur woh wahi pitch dete rahe - aur sabse badi baat: 10 saal se sab gir raha tha aur kisi ne unko nahi bataya. Main bhi nahi bataya. Kyunki bura samachar laane wala aadmi pehle nikala jaata hai.

Aur aakhri do line, jo uski poori zindagi ka faisla thi:

Main 58 saal ka hoon. Meri society 9,000 ki hai, mera college chhota hai, mera koi ticket nahi hai. Kisi kitaab mein mera naam nahi aayega.

Lekin agar kal main chala jaun, toh mere 90 parivaar ki naukri nahi jaayegi, meri society chalti rahegi, aur mera college khula rahega. Maine kursi kabhi nahi paayi. Lekin maine woh cheez bana li jo kursi ke baad bhi rehti hai. Aur ab mujhe lagta hai ki maine hisaab jeet liya — bas woh hisaab nahi jo main 25 saal ki umar mein jeetna chahta tha.

Self-test (pehle dimaag, phir check)

1. Lehar se jeetne wale ki maut kaise hoti hai?

Jawab: Lehar kursi deti hai, machine nahi. Bina machine ke woh logon ke kaam nahi kar paata (uske paas karyakarta nahi), 3 saal mein log kehne lagte hain "yeh milta nahi", uske chhote neta doosri taraf jaate hain, aur agli baar ticket kat jaata hai ya woh haar jaata hai. **Bina machine ki kursi 5 saal ka udhaar hai.**

2. Bagawat kab bargaining hai aur kab aatmahatya?

Jawab: Agar uske paas **apna vote** hai (ch.14) toh woh 40-60,000 le jaakar apni party ko harata hai, apni keemat saabit karta hai, aur wapas aa jaata hai. Agar uske paas party ka vote tha toh woh 8,000 par simat jaata hai aur dono taraf se khatam. Kroor baat: bagawat se pehle usko khud nahi pata hota ki uske paas kya hai.

3. "Beta list le paya, aadat nahi" ka matlab?

Jawab: Ehsaan ka **khaata** transfer hota hai, lekin ehsaan **banane ki aadat** transfer nahi hoti. List ke log pehli baar baap ki wajah se aate hain; doosri baar bete ko khud kaam karna padta hai. Agar usne kabhi darbar mein nahi baitha, mayyat mein nahi gaya, toh khaata 3 saal mein khali ho jaata hai — kyunki woh kharch hota rehta hai aur jama nahi hota.

4. Sabse aam maut kaunsi hai, aur woh kyun dikhti nahi?

Jawab: **Dheere-dheere wali** — margin har baar thoda girta hai, achhe log jaate hain aur naye nahi bante, sanstha badhti nahi. Ek din woh haar jaata hai aur sab kehte hain "achanak kaise?" Achanak kuch nahi hota, 10 saal se ho raha hota hai.

5. Girta hua neta sabse aakhir mein kyun jaanta hai?

Jawab: Uske log zameen par hain, unko pehle pata chal jaata hai — lekin woh bata nahi sakte, kyunki **bura samachar laane wala aadmi pehle nikala jaata hai**. Aur neta ka apna sabse bada dushman inkaar hai, kyunki maanne ka matlab hai apni poori pehchaan ka hilna. Party ko survey se pehle pata chal jaata hai — isliye ticket ka faisla aksar neta ke apne andaze se pehle ho jaata hai.

What this means for you

Yeh chapter tumhe do cheezein deta hai.

Ek, padhne ke liye: jab bhi koi neta girta hua dikhe, ganit kar lo ki woh kaunsi maut mar raha hai. Aur yaad rakhna ki **woh khud sabse aakhir mein jaanega**. Isliye girte hue aadmi ke saamne "aap toh mazboot hain" bolna aasan hai aur bekaar hai — aur uske aas-paas har aadmi wahi bol raha hoga.

Do, apne liye — aur yeh is kitab ki sabse zaroori baat hai: in 6 mahton mein se 5 ka ilaaj ek hi hai, aur woh ilaaj kursi milne se pehle karna padta hai. **Kuch aisa bana lo jo tumhari kursi ke bina bhi chale, aur jo tumhare NAAM par ho.** Baban ko ticket kabhi nahi mila. Lekin 58 saal ki umar mein uske paas woh cheez thi jo 30 saal ke us MLA ke paas nahi thi jiske paas sab kuch tha.

Yeh baat politics se bahar bhi utni hi sach hai.

Note: the six failure modes here are analytical patterns assembled from widely observed features of Indian political careers — wave-elected first-timers losing re-election, rebel candidates splitting votes, factional losers being starved of postings and funds, defeated leaders losing their networks, dynastic successors failing to sustain inherited bases, and long-serving leaders being overtaken by demographic and issue change. They are presented as mechanisms, not as accounts of any specific individual. Baban and his MLA are fictional.

CLOSING

Closing

21. Das minute ka naksha — poori machine, ek page par

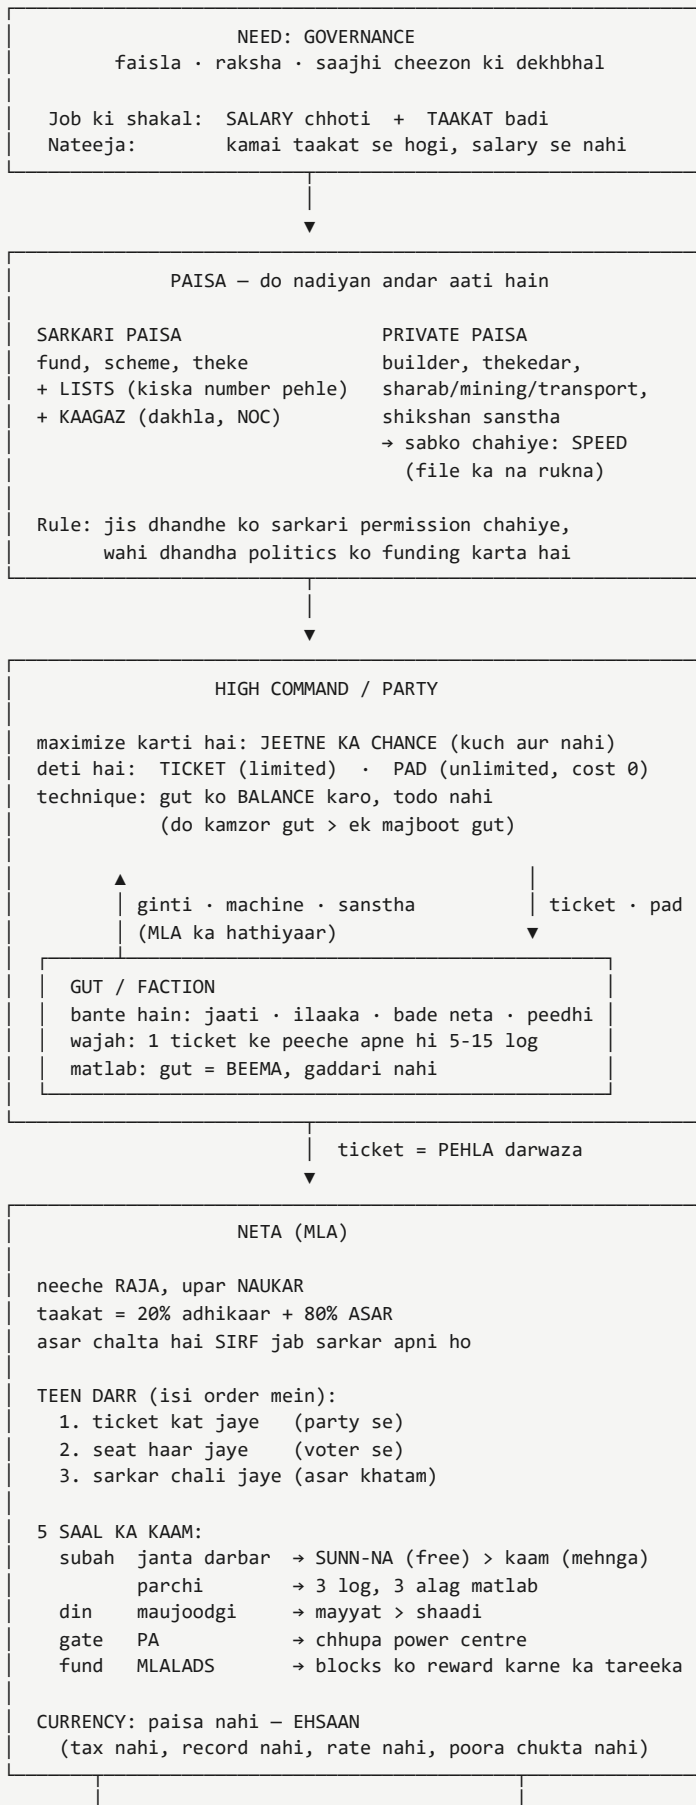

Yeh chapter kya hai

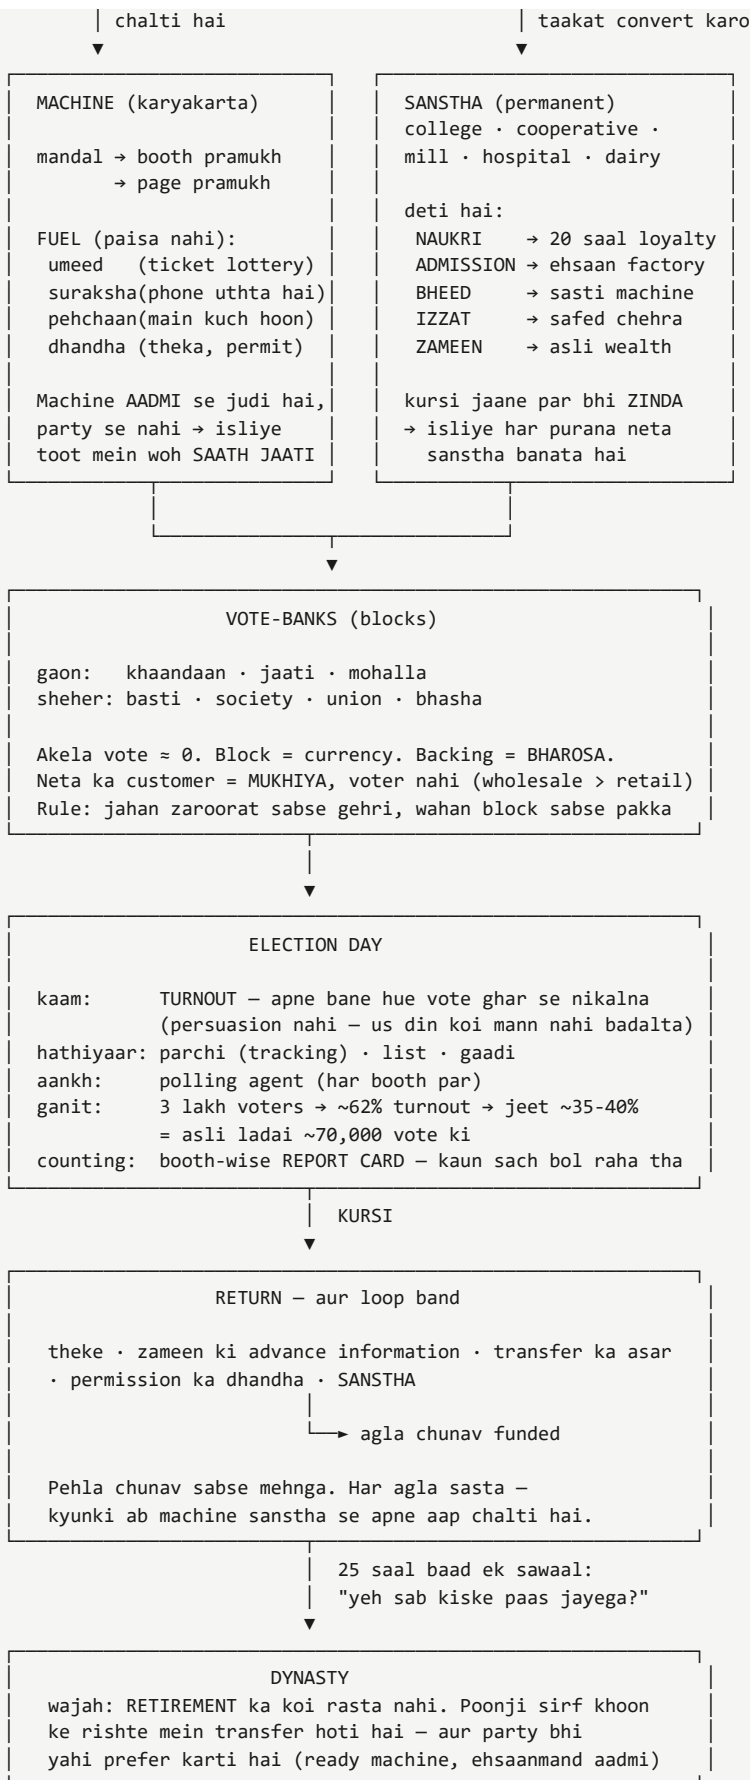

Ab tak 20 chapters mein humne ek-ek box banaya. Aaj woh poora naksha ek page par aayega.

Aur uske baad ek method — taaki jab tum kisi bhi neta se milo, ya koi bhi political khabar padho, tumhe **10 minute mein** samajh aa jaye ki woh aadmi kahan khada hai aur kya chahta hai.

Yeh kitab ka compression test hai. Agar yeh chapter ke baad har nayi political baat ka ek khaana ban jaye tumhare dimaag mein — toh kitab ne kaam kar diya.

POORA NAKSHA

AUR JAB KOI PHANS JAAYE: DAL-BADAL

wajah: virodhi dal mein machine ka COMPOUNDING DECAY

kanon: 2/3 merge chhoot → retail toot band, wholesale shuru
bhaav: akela neta = aadha · neta + machine = poora

Ab method — kisi bhi neta ko 10 minute mein padhna

Chaar sawaal. Isi order mein. Har sawaal ka jawab agla sawaal kholta hai.

Sawaal 1: LEVEL — yeh kis danda par hai? (2 minute)

sarpanch / corporator	→ chhota base, roz ka sampark, zyada available, ticket ka bhookha
MLA	→ 2-4 lakh voters, 250-350 booth, teen darr, machine + sanstha ka khel
MP	→ ~18 lakh voters, Delhi ka rishta, ghar par kamzor (roz ka kaam state ke paas hai), apne MLAs ki machine par ladta hai → lehar par depend
mantri / CM	→ FILE + POSTING. Asli taakat yahan hai. Vibhag dekho, naam nahi. CM ki kamzori: ginti

Aur saath mein ek zaroori sub-sawaal: yeh SATTA mein hai ya VIRODH mein? Yeh ek jawab uski aadhi haalat bata deta hai (ch.6 ki table).

Sawaal 2: POWER SOURCE — iski taakat kahan se aati hai? (3 minute)

Yeh sabse important sawaal hai. Chaar mein se koi ek (ya zyada):

- A. PARTY KA NISHAAN
→ lehar par jeeta. Ticket kata toh khatam.
→ PARTY ka aadmi hai. Party se darta hai.
- B. APNA EHSAAAN KA KHAATA (ch.10)
→ 15-25 saal ke chhote kaam. Apna vote hai.
- C. SANSTHA (ch.11) ← sabse pakka
→ college/cooperative/mill. Naukri + admission.
→ haarne par bhi zinda rehta hai.
- D. JAATI/SAMUDAY KA NETRITVA
→ block uske saath party badalne par bhi jaata hai

Test: "agar iska ticket kat jaye aur yeh nirdaleeya lade, toh kitne vote layega?" Kam = party ka aadmi.
Bahut = **party uska aadmi.**

Sawaal 3: RISK — yeh abhi kis khatre mein hai? (3 minute)

Ticket ka khatra?	→ uske hi ilaake mein apni party ka koi naya ladka bheed dikha raha hai? (ch.7 – application form yehi hai)
Seat ka khatra?	→ pichhla margin kitna tha? machine ka kya haal hai?
Gut ka khatra?	→ uska gut party ke andar upar hai ya neeche? (ch.12) Gut neeche = uska phone uthna kam, uske project "review" mein, uske log khiskna shuru
Sanstha ka khatra?	→ uski sanstha par jaanch/audit? (yeh sabse gehri chot hai – uska permanent base hil raha hai)

Jitna zyada khatra, utna zyada woh khula hai — kisi bhi aisi cheez ke liye jo usse bacha sake. Yeh baat business ke liye bhi sach hai aur samajhne ke liye bhi.

Sawaal 4: NEED — isko abhi kya chahiye? (2 minute)

Upar ke teen jawab jodo, aur zaroorat apne aap nikal aayegi:

Ticket ke khatre mein	→ party ko dikhane layak kuch: bheed, data, "mere paas woh hai jo doosron ke paas nahi"
Seat ke khatre mein	→ machine ka sach: kaun sach bol raha hai, kaunsa booth khali hai
Gut neeche hai	→ upar tak apni awaaz, aur waqt kaatna
Naya/pehli baar	→ pehchaan aur ehsaan ka khaata banane ke tareeke
Purana aur surakshit	→ izzat, virasat, "legacy" – aur bete ka rasta
Sanstha wala	→ uski sanstha ki brand aur usse nikalne wale ehsaan

Do rules jo hamesha kaam aayenge

Rule 1 — Har behaviour ke peeche incentive dhoondho, niyat nahi.

Jab bhi koi political cheez ajeeb lage — koi wafadaar ka ticket kat gaya, koi neta ne party badal di, koi bade neta ne chhoti si baat par itna zor lagaya — yeh mat poochho "yeh aisa kyun kar raha hai, kitna galat hai." Yeh poocho:

"Is aadmi ki jagah par khade hokar, iske teen darr aur iske resources ko dekhte hue — yeh faisla rational hai kya?"

95% baar jawab haan hoga. Aur jab jawab haan hota hai, tab tumhe system samajh aata hai, sirf ghatna nahi.

Rule 2 — Yaad rakho ki naksha kahan dhundhla hai.

Kuch cheezein settle nahi hain, aur unpe pakka bolna hi outsider ki nishaani hai:

- Kya paisa/sharab sach mein vote khareedta hai?
(Shayad turnout ka tool hai, persuasion ka nahi)
- Kya "kaam" se vote milta hai?
(Zaroori base hai, akela kaafi nahi)
- Kya jaanch agencies hathihaar hain?
(Sabse garam bahas — lekin DAR ka asar asli hai, chahe istemal ho ya na ho)
- Kya karyakarta system kamzor ho raha hai?
(Dhaancha abhi bhi decisive, lekin uska tareeka badla)
- Kya anti-defection law kaam kar raha hai?
(Stability aayi, lekin MLA party ka gulaam bhi ban gaya)

Veteran ki nishaani yeh nahi hai ki uske paas har sawaal ka jawab hai. **Veteran ki nishaani yeh hai ki usko pata hai kaunse sawaal ka jawab kisi ke paas nahi hai.**

Baban ki kahani — aakhri part

Baban 58 ka hai.

MLA ka beta jeet gaya tha — do baar. Baban ne dono baar uska campaign chalaya. Teesri baar usne mana kar diya.

Uski credit society ab 9,000 members ki hai. Usne 4 saal pehle ek chhota ITI college shuru kiya — 200 students, 30 staff. Chhota hai. Lekin uske naam par hai.

Us saal ek 24 saal ka ladka uske paas aaya. Padha-likha, sheher se, kuch karna chahta tha politics mein. Usne poocha: "Dada, shuru kahan se karun?"

Baban 20 minute chup raha. Phir usne apna purana register nikala — woh hi jo 15 saal ki umar mein school ki copy tha — aur usme se paanch line padh kar sunayi:

Ek: "Akela vote bekaar hai. Block sab kuch hai. Aur block ki backing bharosa hai — jo mukhiya apna word nahi rakhta, uska block ginti mein nahi aata."

Do: "Election ke din koi election nahi jeeta jaata. Us din sirf ginti hoti hai us kaam ki jo 5 saal mein hua ya nahi hua."

Teen: "Politics mein sabse mehngi cheez woh nahi hai jo tum kharch karte ho. Sabse mehngi cheez woh hai jahan tum maujood nahi the."

Chaar: "Party paisa nahi deti. Party rasta deti hai. Aur jo aadmi rasta le leta hai, woh apne raste se bandha jaata hai."

Aur phir usne register band kar diya aur aakhri baat bina padhe kahi — kyunki woh use zubani yaad thi:

Paanch: "Aur sabse zaroori — jo kaam tum karo, woh apne NAAM par karo. Main 26 saal duniya ki sabse achhi machine chalata raha, kisi aur ke naam par. Log mera chehra dekhte the aur kisi aur ka naam lete the. Us din mujhe pata chala ki main mehnat kar raha tha, poonji nahi bana raha tha."

Ladke ne poocha: "Toh aapko afsos hai?"

Baban hansa — pehli baar us poore saal mein.

"Afsos? Nahi. Maine sab kuch seekh liya. Bas 20 saal der se apne liye lagana shuru kiya. Tu meri baat sun raha hai — matlab tere 20 saal bach gaye. Ab ja, aur chhoti si cheez shuru kar. Kuch bhi — 200 logon ka koi kaam. Lekin apne naam par."

Us raat, 43 saal baad, Baban ne us purani copy ke aakhri page par ek aakhri line likhi:

Yeh machine kisi ne banayi nahi hai. Yeh apne aap bani hai — kyunki har aadmi apna sahi kaam kar raha tha. Voter apna, karyakarta apna, neta apna, builder apna. Kisi ne sazish nahi ki. Aur isiliye yeh itni majboot hai.

Jo aadmi isko "galat" kehkar samajhna chhod deta hai, woh isse kabhi nahi ladh sakta aur na hi isme kaam kar sakta. Aur jo isko samajh leta hai — usko phir yeh chunna padta hai ki isme khada kahan hona hai.

Aakhri self-test — poori kitab ka

Yeh 8 sawaal poori kitab ka test hain. Bina peeche dekhe jawab do.

1. Neta ki job ki shakal kya hai, aur usse kya nikalta hai?

Chhoti salary + badi taakat → kamai taakat se hogi, salary se nahi. Yeh corruption ka design hai, niyat nahi.

2. Neta ka asli customer kaun hai aur kyun?

Mukhiya/block-leader. Ek voter = 1 vote (retail), ek mukhiya = 40-500 vote (wholesale). Limited time mein wholesale hi rational hai.

3. Karyakarta muft kyun kaam karta hai?

Umeed, suraksha, pehchaan, dhandha. Aur party ka unlimited zero-cost product — pad/izzat — yehi kharidta hai.

4. Ticket kis cheez par milta hai?

Sirf jeetne ke chance par. Wafadaari ginti mein nahi aati kyunki wafadaar ka vote already party ka hai. Party woh khareedti hai jo abhi uska nahi.

5. Election ke din ka kaam kya hai?

Turnout, persuasion nahi. Apne bane hue vote ko ghar se nikalna. Parchi = tracking, polling agent = aankh, counting = report card.

6. Neta institution kyun banata hai?

Kursi nazuk hai (80% asar, jo sarkar badalte hi khatam). Sanstha taakat ka permanent version hai — naukri, admission, bheed, izzat, zameen — jo haarne par bhi chalti rehti hai.

7. Dal-badal ka asli kaaran kya hai?

Virodhi dal mein machine ka compounding decay. Machine ke bina wapasi namumkin hai, isliye toot survival hai. Aur akela tootne wale ka bhaav aadha — keemat machine mein hai, naam mein nahi.

8. Dynasty kyun banti hai?

Retirement ka koi rasta nahi. 25 saal ki poonji transfer karne ka sirf ek bharosemand raasta hai — khoon. Aur party ko bhi ready machine sasti padti hai.

Agar aathon ka jawab bina peeche dekhe aa gaya — **naksha tumhare dimaag mein hai**. Ab koi bhi political khabar tumhare liye shor nahi rahegi; har baat ka ek khaana hoga.

What this means for you — aakhri baar

Is kitab ne tumhe do cheezein di hain.

Pehli: **ek naksha**, jisme har nayi political jaankari ka ek khaana hai. Ab jab koi khabar aaye — koi neta toota, koi ticket kata, koi sarkar bani — tumhe pata hoga kahan dekhna hai: uska power source kya tha, uski machine ka kya haal tha, uska gut kahan khada tha.

Doosri, aur zyada zaroori: **ek nazariya**. Yeh machine kisi ne design nahi ki. Woh sirf incentives ka jod hai — har aadmi apna rational kaam kar raha hai, aur unka total ek aisa system banata hai jo kisi ek aadmi ki niyat se nahi chalta.

Aur isi wajah se, jab tum kisi neta ke saamne baithoge, tum us kamre mein ek alag aadmi hoge. Tum us aadmi ko "neta" ki tarah nahi dekhoge. Tum dekhoge: iska level, iska power source, iska abhi ka khatra, aur isliye iski abhi ki zaroorat.

Aur jab tum kisi ki zaroorat theek se dekh lete ho, tab tumhe usse kuch bechne ki zaroorat nahi padti. Tum sirf usse woh dete ho jo usko waise bhi chahiye tha.

Yeh kitab ka aakhri chapter hai. Agar tumne yahan tak padha hai, toh tumhare paas ab woh naksha hai jo shuru mein ek gaon ke jhagde se shuru hua tha aur Delhi tak pahuncha. Isko istemaal karo — khabar padhte waqt, kisi se milte waqt, aur khaas kar tab jab koi tumse kahe ki politics samajhna mushkil hai. Woh mushkil nahi hai. Woh sirf likha hua nahi tha.
